Dear members of the Unifor Telecommunication Council:

As many of you are aware, following our recent Council discussions and the national launch, which generated headline media coverage in recent weeks, our sector is entering a new phase of coordination and advocacy.

Here are some noteworthy elements of our new approach:

Telco Council Facebook Page

Our Telco Council Facebook page has become a key tool for:

- Sharing sector-specific updates
- Highlighting bargaining wins and workplace realities
- Promoting member engagement
- Amplifying the voice of telecommunications workers across Canada

Building a visible and coordinated online presence helps counterbalance the employer-driven narrative that often dominates public discussion in our industry.

Sector Website – telco.unifor.org

We encourage you to visit our website telco.unifor.org – it serves as the central hub for:

- Council updates
- Sector reports and briefing materials
- Public-facing information on telecommunications work in Canada
- CTWA-related policy positions and recommendations

As local leaders, you can elevate sector-specific realities through our shared platforms!

Thank you for your advocacy,

Your Telecommunication Industry Council Executive
