At PDS Systems, we collaborate to create durable and efficient flexible packaging solutions.

**PACKAGING EQUIPMENT SERVICE, HAYSSEN REBUILDS, VFFS or HFFS RECONSTRUCTIONS
AND REBUILDS, REPAIRS, TRAINING, INSTALLATIONS, PARTS, VFFS OR HFFS MACHINE
CONTROLS UPGRADE, FORMING TUBES AND JAWS**

PDS, founded by Roger Abea, offers a wide range of services and components for industrial and packaging equipment.

We are committed to providing a lifetime of outstanding support by offering you a full range of services including parts, upgrades, remanufacturing, service, and training.

PDS Systems and its partners—WE have over 60 years of experience designing and building packaging systems. It's no wonder, then, that our systems are consistently among the industry's most relied-upon in service today.

We can design turn-key solutions, deliver single-piece orders, or create and deliver something in-between.

Contact us today to begin designing the right solution for your packaging needs!

Our packaging solutions include:

- free-flowing and semi-free flowing bag filling and sealing
- horizontal flow wrappers (HFFS)
- vertical form fill seal (VFFS)
- bag and film converting
- scales
- bag sealing
- palletizing

Additionally, PDS provides a suite of technical services to support your packaging equipment, Automation, IT, Data collection and processing equipment needs.

Disclaimer: PDS is not sanctioned or approved by any manufacturer listed. PDS develops channels to purchase product at equal / highest quality available, and is not an authorized distributor or representative for the listed manufacturers or trade names. PDS is an independent supplier of quality replacement parts having no affiliation with any original equipment manufacturer. The trademark of any original equipment manufacturer described or shown in this literature is owned by that manufacturer and not PDS.

Commit your work to the LORD, and then your plans will succeed. Proverbs 16:3

We offer controls system replacements for most brands of intermittent VFFS baggers. Hayssen control systems have been the most popular, with more than 100 deployments. Trained specialists can install controls upgrades on-site in about three days. Customers with new controls enjoy many benefits such as higher speeds, less setup and

scrap, less downtime, and less maintenance. Parts used are non-proprietary and readily available through local parts houses.

Our standard offering uses Allen Bradley PLC/HMI with Ethernet connection and Mitsubishi servo motors. Other brands of controls are available to meet your needs.

HORIZONTAL PACKING MACHINE CONTROL UPGRADE

Our customers with horizontal packaging machines are upgrading their control systems (PC board or old PLCs) to a robust platform that offers profitability, and reliability to ensure that production goals will be reached.

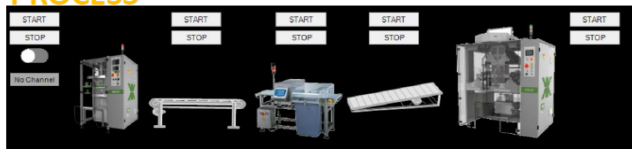

PLC, HMI, Drives, and Servo Upgrade

We work with the most recognized brands of automation and control to offer our customer a flexible solutions according their requirements.

From the PLC, HMI to motion control we can solve your problem with obsolete cards or equipment.

PROCESS

Integration solution for all your process and packing line can be provided to solve downtimes and increase the production lines efficiency.

Disclaimer: PDS is not sanctioned or approved by any manufacturer listed. PDS develops channels to purchase product at equal / highest quality available, and is not an authorized distributor or representative for the listed manufacturers or trade names. <https://packagingdiagnosticservices.com/>

Many older machines running today have older or obsolete electronics, schematics that have not been updated, or mechanical transmissions that are inefficient with many moving parts.

In today's packaging environments, equipment owners want efficiency and machine control that can't be provided with older machines that have relay logic or older plc's.

PDS can provide new controls and replace mechanical transmissions with servo controls as needed with new schematics. Standard packages and conversions are available with short lead times and onsite installation by PDS travel service techs.

Major conversions should be performed at our facility by highly skilled and trained personnel and engineering staff.

Parts for HAYSSEN ®, and other Packaging Machines

Our experienced product support and parts executives offer you immediate, multilingual assistance. Combining these experts with a streamlined part ordering system and efficient distribution provides you with total customer support

Hayssen Replacement Parts and Electronic Repair Services

WE know Hayssen. Our factory-trained and certified technicians are intimately familiar with a wide range of Hayssen products. You can be completely confident that your Hayssen machine is in good hands when you send it to us.

You can call us to speak to a live, knowledgeable expert about your repair, or you can track the repair online for peace of mind. That said, the truth is, you won't have much time to think about it — we'll have your Hayssen device fixed and on its way back to you in five days or less. When you get it, you'll know you can put it right back into operation because we rigorously test every component before we put it all back together and send it on its way.

PACKAGING AND TAPE MACHINE KNIVES FROM PDS

PDS CUTTING EDGE HAS PROVEN OURSELVES IN THE MARKET TIME AND TIME AGAIN. PACKAGING KNIVES REQUIRE CLOSE TOLERANCES AND WE HAVE THE EXPERTISE TO DEAL WITH SPECIAL REQUIREMENTS THAT ARE NOT VISIBLE TO THE NAKED EYE. WE CARRY STOCK ITEMS ON POPULAR BRANDS AND MANUFACTURE PDS BRAND OEM COMPATIBLE BLADES AND KNIVES FOR ALL PACKAGING MACHINES SUCH AS:

- FORM, FILL AND SEAL
- VACUUM PACKAGING
- FILM WRAPPING
- TRAY FORMING/CARTON SEALING INCLUDING TAMPER-EVIDENT

WE PROVIDE V-TOOTH, SCALLOPED TOOTH, SERRATED TOOTH, ZIG-ZAG, AND KNIFE AND ANVIL SETS. WITH OUR KNOWLEDGE OF SPECIAL MATERIALS AND COATINGS, WE CAN OFTEN DESIGN A KNIFE THAT WILL IMPROVE YOUR PRODUCTION. PDS OFFERS A COMPREHENSIVE RANGE OF PRECISION GROUND BLADES, MADE FROM HIGH QUALITY HARDENED AND TEMPERED STAINLESS AND CARBON STEELS. ALL PACKAGING KNIVES ARE MADE TO THE MOST EXACTING OEM STANDARDS. THIS ENABLES OUR CUSTOMERS TO OBTAIN THE BEST POSSIBLE RESULTS FOR THEIR CUTTING REQUIREMENTS AND LOWERING THEIR OVERALL PRODUCTION COSTS.

PDS OFFERS PACKAGING AND FORM, FILL, AND SEAL SOLUTIONS COMPATIBLE WITH THE FOLLOWING OEMS:

**PACKAGING KNIVES FOR VERTICAL and
HORIZONTAL FORM, FILL, & SEAL MACHINES**

WE can provide a variety of packaging knives for flow wrapping, shrink-wrapping, overwrapping, diamond wrapping, diefold wrapping, and horizontally fed pouch-filling machinery. All packaging knives for VFF or HFFS machinery are manufactured using premium steel and heat-treated to ensure long-lasting quality. If necessary, WE can modify or provide custom packaging knives as well as customized coatings for longer wear resistance.

WE can provide the following blades for Horizontal Form, Fill & Seal Machines:

- Flow wrapping knives
- Shrink wrapping knives
- Pouch knives
- Straight-cut knives
- Bagger knives
- Heat seal bands
- Pouch knives
- Sealing jaws

Recommended cutting applications:

- Food/tray products
- Fresh meats/dried jerky
- Bakery products
- Coffee & tea
- Candy (bars, pouches, and individually wrapped)
- Nutrition bars
- Cosmetic products & soaps
- Medical products
- Frozen goods and popsicles
- Pet foods
- Snack foods
- Wet wipes
- Industrial products

Compatible OEM HFFS machinery:

- ACMA GD
- Bassar
- Doboy
- Gram Equipment
- Fuji
- Klockner
- Nortech
- Sigpack
- Sig/Sasib
- ULMA
- Allpak
- Bosch
- Campbell
- Ideal
- HMC
- Loesch
- OSSid
- Scandia
- Theegarten
- Viking Masek

Panel building and upgrades

With years of expertise, PDS Integrated Systems is a trusted partner to packaging companies and offers a broad range of expertise.

Our seamlessly designed integrated packaging systems are critical to our customers' success.

Whether you are implementing a new packaging system or are ready to optimize an

existing system, PDS Systems has the talent and experience to provide a best in class system that meets your needs.

With core competencies stretching from packaging line execution to robotic automation, PDS Integrated Systems not only provides packaging systems solutions for virtually every segment of the consumer-packaged goods industry, we also offer customized integration solutions for some of the world's best known automotive, industrial and logistics companies.

Our key markets include:

- Beverage
- Food
- Pet Food
- Automotive
- Wineries and Distilleries
- Can and Can End Manufacturers
- Industrial
- Household
- Personal Care

Repair & Refurbishment of Forming Shoulders & Sealing Jaws

Former Fab can help you get maximum use out of the equipment you have already invested in.

Forming Tube Storage Carts

Former Fab manufactures stainless steel forming tube storage carts with maintenance-free casters and we offer a wall mounted model as well. These storage carts can carry between 2-8 forming assemblies depending on your needs and will keep your formers off the floor, away from bacteria and possible damage.

We offer Ishida Inspira Forming Tubes and TNA Formers

We offer the following forming

shoulder/forming tube options, just to name a

few:

- Rectangular, round or oval units
- Nitrogen gas flush lines
- Top and side zipper modifications

- Back seals (adjustable crossover), quad and side seals
- Product transition funnels
- Flat bottom bag attachments
- Gusset finger attachments
- Vacuum and dust ports
- Creaser roller assemblies

Not only can **our companies** provide the highest quality forming assemblies for your vertical and horizontal packaging machines but now we offer sealing jaws as well. Our end seal division has opened and all sets are manufactured from precision ground tool steel. We offer horizontal, vertical and diagonal standard serrations as well as our "SST" profile to rid of those stubborn package leaks. All seal bars are plated with electroless nickel coating but we also offer our non-stick "NTC" coating that increases film release.

ULTRASONIC CROSS SEALING INTEGRATION

Convert your existing vertical form fill seal (VFFS) machine with ultrasonic sealing technology economically and accurately.

7 Reasons Why Ultrasonic Sealing Conversion

1. REDUCED FILM COST
2. LESS PRODUCT WASTE
3. ENHANCED THROUGHPUT
4. IMPROVED PRODUCT QUALITY
5. ENHANCED SAFETY & MAINTENANCE
6. REDUCED ENERGY CONSUMPTION
7. ULTRASONIC SEALING IS AN 'INTELLIGENT' PROCESS

The Stand-Alone Ultrasonic Sealing Unit is the ideal solution for retrofitting existing baggers with ultrasonic sealing technology.

The Ultrasonic Stand-Alone Unit provides accurate positioning, seal time, and consistent seal force to support the ultrasonic sealing process.

HMI COLOR INTERFACE

Standard with each unit has multiple screen levels to provide the end-user with complete control over the ultrasonic sealing process.

- **Universal designs** for baggers
- **Versatile use** with ultrasonic and heating systems
- **Precise seal** face alignment
- **Consistent seal** force control

This unit has independent motion control separate from the bagger.

Custom Metal Fabrication

We are pleased to inform you about our recent collaboration with Package Pros and Former Fab in Houston, Texas. Package Pros specializes in providing a range of enhancements and renovations for your current VFFS baggers.

We are able to customize the enhancement of your bagger to align with the requirements of your company. We provide mechanical enhancements, as well as the latest and most advanced control system replacements. The control system has a successful track record of 10 years of implementation with this particular design in use at numerous production facilities.

Package Pros, situated in Pearland, Texas, provides Packaging Machine Reconditioning Services to revitalize your aging packaging equipment and improve your production line's efficiency. We are excited to share the opening of a new 30,000-square-foot facility for design, development, and product testing on five acres in Pearland, Texas. This expanded space offers excellent accessibility and enables Package Pros, LLC to progress alongside our clients and support our growth.

We are capable of addressing all your packaging equipment requirements..

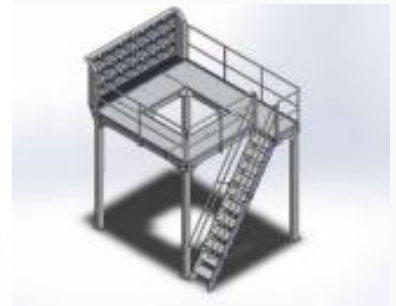

Commit your work to the LORD, and then your plans will succeed. Proverbs 16:3

<https://packagingdiagnosticservices.com/>

Third-party maintenance (TPM) is a service that provides IT hardware and equipment support from an independent provider, rather than the original equipment manufacturer (OEM). TPM can be a cost-effective alternative to OEM support, and can be especially useful when a device's warranty has ended.

TPM can include a variety of services, such as:

Hardware repair and replacement

Preventive maintenance

Technical support

On-site engineering assistance

Data backup

Remote monitoring

Operating system support

TPM can be a good option when an OEM stops supporting a device or stops manufacturing parts for it. TPM can also be a good choice when a device has reached the end of its service life (EOSL).

Some benefits of TPM include:

Cost savings: TPM can be less expensive than OEM support.

Flexibility: TPM can offer more flexible service agreements and timetables.

Expertise: TPM providers can offer expertise across a wide range of hardware brands and manufacturers.

Disclaimer: PDS is not sanctioned or approved by any manufacturer listed. PDS develops channels to purchase product at equal / highest quality available, and is not an authorized distributor or representative for the listed manufacturers or trade names. PDS is an independent supplier of quality replacement parts having no affiliation with any original equipment manufacturer. The trademark of any original equipment manufacturer described or shown in this literature is owned by that manufacturer and not PDS.
