

## DGC-1000A Clamp Ground Resistance Tester | Amprobe

- Accurate ground resistance measurement from 0.025 to 1500 Ohms
- True-rms current measurement including leakage current
- Accurate readings regardless of power quality in less than 10 seconds
- Continuity beep if the resistance is lower than 40.00 Ohms
- Simple and easy to use, no test leads or auxiliary electrodes necessary
- Data logging capability – 116 records
- Individual data point recording
- User selectable high & low ohm audible alarms
- Auto power off (can be disabled)
- Low battery indicator
- Large LCD display

FEATURE	DGC-1000A
Ground resistance	1500 O
Ground resistivity	-
AC Current	10.00 A
AC Voltage	-
Model Name	Description
DGC-1000A	<ul style="list-style-type: none"> <li>• Accurate ground resistance measurement from 0.025 to 1500 Ohms</li> <li>• TRMS current measurement including leakage current</li> <li>• Accurate readings regardless of power quality in less than 10 seconds</li> <li>• Continuity beep if the resistance is lower than 40.00 Ohms</li> </ul>
