

The purpose of this document is to help individuals make an informed decision for themselves or their children as to whether or not they consent to any or all vaccine procedures. This document is intended to share the scientific evidence that we are not getting in our doctor's office. We often hear that vaccines are safe and effective. Is that true? Source studies and vaccine inserts are included in this document. If you find this useful, please share it with your friends, your family and even your doctors. Whether you decide to vaccinate should always be up to you. But you deserve to know the risks before taking that decision to make absolutely sure that it fits your family's needs. Every pharmaceutical medication comes with a risk. Please know the risks before you inject.

**We are not anti-vaccine. We are "pro-science, pro-common sense, and pro-public health."**

# Informed Consent

## Quick Facts You Should Know

- **INFORMED CONSENT = Patient Agreement to take part in a medical procedure**

- **The Nuremberg Code of 1947**

- Came into being as a result of the heinous human experimentation performed by the Nazi doctors in the many concentration camps throughout the German Third Reich. The judgement by the war crimes tribunal, as a result of the Doctors Trial at nuremberg, established 10 principles to guide physicians in all human experimentation.
- The Nuremberg Code cites that **“the voluntary consent of the human subject is absolutely essential.”**
- **This is being violated by denying parents informed consent regarding risks before subjecting their children to vaccination.**
- <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2840885/>

- **Information Between Doctor and Patient should include:**

- The condition/disorder/disease that the patient is having/suffering from
- Necessity for further testing
- Natural course of the condition and possible complications
- Consequences of non-treatment
- Treatment options available
- Potential risks and benefits of treatment options
- Duration and approximate cost of treatment
- Expected outcome
- Follow-up required

Patient should be given opportunity to ask questions and clarify all doubts. There must not be any kind of coercion. Consent must be voluntary and patient should have the freedom to revoke the consent. Consent given under fear of injury/intimidation, misconception or misrepresentation of facts can be held invalid.”

- <https://physiciansforinformedconsent.org/>

- **Before partaking in any medical procedure, doctors should show you**

- Benefits of procedure
- Possible complications of procedure
- Other options for patient
  - **There must always be another option!**

- **Vaccine Information Statements VIS have been required to be given to vaccine recipients for many years - but **ARE NOT** routinely given.**

- Information sheets detailing benefits and risks for each vaccine
- <https://www.cdc.gov/vaccines/hcp/vis/vis-dates.html>

- **All vaccines are different**

- **Live virus vaccine**

- These vaccines can infect others through “shedding” (pg. 22)
- Killed virus vaccine
- Killed bacteria
- Pieces of bacteria
- **Different immune responses:**
  - Antibody response
  - Cell mediated response

- **Some vaccines need antibodies to stimulate an immune response**

- Use Adjuvants
- **Adjuvants are usually toxic hazards that cause inflammation** (pg. 11)
- Different ingredients
- Different side effects
- Different benefits

## **Amount of vaccine information that a typical Harvard graduated medical doctor gets in medical school**

- What they do
- They save lives
- The CDC schedule
- How to inject
- How to coerce vaccine-hesitant parents

- **What doctors DO NOT learn in medical school:**

- What is in vaccines
- Adverse reactions vaccines can cause
- **They DO NOT learn about the Vaccine Adverse Events Reaction System VAERS**
  - Less than 1% of vaccine injuries are reported to VAERS
  - **4.2 Billion has been paid out to vaccine injuries (that's less than 1%)**

**Ethical angle:** “Patient's has all the freedom to decide what should or should not happen to his/her body and to gather information before undergoing a test/procedure/surgery. No one else has the right to coerce the patient to act in a particular way. Even a doctor can only act as a facilitator in patient's decision making.”

**Legal angle:** “No one has the right to even touch, let alone treat another person. Any such act, done without permission, is classified as “battery” - physical assault and is punishable. Hence, obtaining consent is a must for anything other than a routine physical examination.”

- **“Vaccine Hesitancy”**

- “Delay in acceptance or refusal of vaccines despite availability of vaccination services”
- **Doctors are trained to coerce parents into getting vaccines**
  - Doctors will **“fire”** the patients if they refuse
- **The AAP American Association of Pediatrics has an entire page dedicated to coercing parents into vaccinating**
  - <https://www.aap.org/en-us/advocacy-and-policy/aap-health-initiatives/immunizations/Pages/vaccine-hesitant-parents.aspx>

- **AAP applies same study to entirely different vaccine schedule:**

- **States:** On-time vaccine receipt in first year does not adversely affect neuropsychological outcomes
  - **Problems with this study**
    - Children studied was only between 1993-1997
      - Total of 13 doses of vaccines
    - Today, children receive a total of 26 doses by 18 months
      - **They applied the same study**
      - **No further studies after 1997, even though more vaccinations have been added**
    - <https://pediatrics.aappublications.org/content/pediatrics/early/2010/05/24/peds.2009-2489.full.pdf>

- **CDC recommends 8-in-1 vaccine combination be given to infants 2, 4, and 6 months old, but this combination has NEVER been studied for safety.**

- **Doctors punished dramatically if they don't push 63% of their patients to vaccinate**

- Pediatricians don't get their annual bonuses if they don't reach 63%
  - Must mean FULLY Vaccinated (not partially).
- Blue Cross Blue Shield
  - **Known as “Combo 10” Annual Bonuses**
  - \$400 per individual child who is completely up to date on vaccine schedule

## Variolation

- **What vaccines are aimed to accomplish**

- Develops antibodies to create a response to a virus or bacteria
  - If you develop antibodies, the vaccine is known as successful
- Familiarizes the immune system with a known virus or bacteria
- Immune system will then respond if it comes into contact with that virus or bacteria

- **Immunization**

- Your body has a natural response to immunization from exposure to live viruses.
- Your body will recognize a disease from coming into contact with it

- **Vaccines make your immune system weak**

- Harms and compromises the immune system
- See Influenza Vaccine and Chronic Illness (pg. 28 & pg. 54)
- **You naturally breath in viruses through the air**
  - NEVER by being injected directly into the bloodstream
- **130 Studies linking autoimmune disorders and neurological disorders to vaccines**

  - Vaccines have not been tested to see if they change or mutate DNA or if they cause cancer
  - **2005 it was admitted that foreign DNA particles are in vaccines**
  - **The FDA does not know what happens when we mix DNA**
    - DNA takeover
    - Cell Death
    - Cancer
    - Inflammation
  - <https://www.prweb.com/releases/2012/4/prweb9359508.htm>
- **Vaccines normally do not use a saline solution Placebo in studies**
  - **Placebo:** Innocuous or inert medication given as a pacifier or to the control group of experiments on efficacy of a drug or vaccine
    - Normally a sugar pill for medications
  - **Vaccines don't go through a double blind placebo testing**
    - Instead of using Saline Solution, *which would be used in any other kind of study*, vaccines use other vaccines that have been FDA approved
    - Gardasil used Aluminum as placebo (*see gardasil pg. 33*)
  - Many vaccinations are rushed through studies

- Hepatitis B & Gardasil

- **Injection can be a medical problem**

- Will always create inflammatory response and the body's need to reject that material
  - Causes backfire in immune system
    - Creates autoimmune disorders

- **Tylenol (Acetaminophen)**

- Links to autism, stillbirths, SIDS and asthma
  - Children lose their internal heat with tylenol
- One of the worst drugs to give a child
- **Often recommended by a doctor after an adverse reaction from a vaccine**
- Best way to compromise a child's ability to detox
- A "Normal" vaccine reaction: Screaming for 24 hours or more
  - Tylenol processed in the liver **depletes body of glutathione**

## Vaccine Adverse Events Reporting System

### Should you or your child have an adverse reaction to a vaccine

- **IMPORTANT!!!!**

- Please report clinically important adverse events that occur after vaccination of adults and children to the Vaccine Adverse Events Reporting System (VAERS), even if you are not sure whether the vaccine caused the adverse event.

- **To report an adverse reaction:**

- [https://vaers.hhs.gov/reportevent.html?fbclid=IwAR0I2ad-Shdk5BFdy6GPIOYgY\\_-HfqMRNb6HxHOyxMrwHntQ\\_Olv42Jh6Y0](https://vaers.hhs.gov/reportevent.html?fbclid=IwAR0I2ad-Shdk5BFdy6GPIOYgY_-HfqMRNb6HxHOyxMrwHntQ_Olv42Jh6Y0)

- **Vaccine Adverse Events Reporting System (VAERS)**

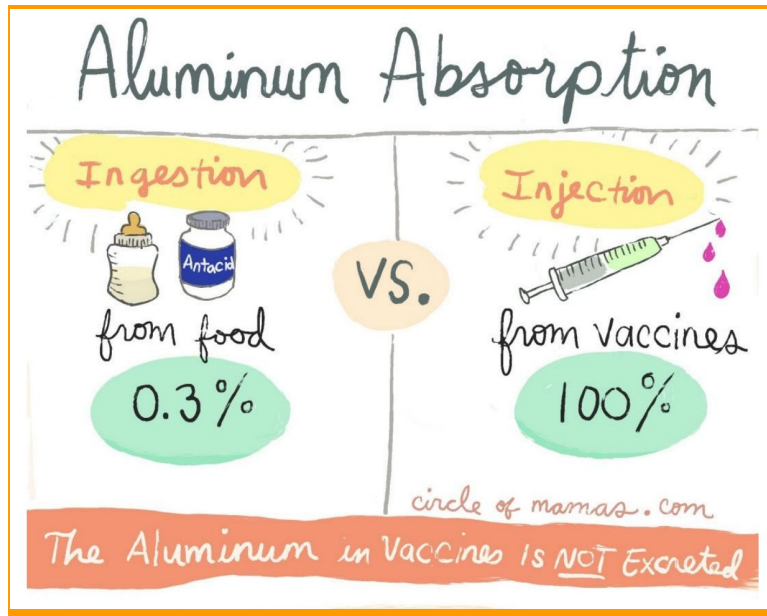

- Less than 1% of Vaccines injuries are reported to VAERS
  - **“Pediatricians don’t even know about VAERS.”** - Dr. Toni Bark
  - “Doctors are not taught what an adverse reaction even looks like.” Dr. Larry Palevsky
    - [http://whale.to/a/just\\_a\\_coincidence\\_lie.html](http://whale.to/a/just_a_coincidence_lie.html)
- \$4.2 Billion of taxpayer money has been paid to vaccine injured children and adults
  - \$0.75 taxed on every vaccine
  - \$2.25 for vaccines such as MMR (3 vaccines in one)

- **Healthcare workers are required by law to report to VAERS (even though most don’t even know about VAERS)**

- **Any adverse event listed are in the VAERS**

- [Table of Reportable Events Following Vaccination](#)

# Injection vs Ingestion

- **INGESTION**

- Goes out of GI tract
- If you eat tuna, the mercury will go through the GI tract and leave the body. The body only absorbs a very small percentage.

- **Oral absorption of aluminum is low**

- Vaccines are approximately 250 times greater absorption than oral absorption
  - <http://europepmc.org/abstract/med/8261684>

- **INJECTION**

- Goes directly into the bloodstream
- Body absorbs 100% of every ingredient in vaccine

- **Source**

- **Aluminum in vaccines**

- Not the same as the Aluminum you ingest
- In Vaccines
  - It's a structure that is easily passed to the brain
  - **Strongly binds to viruses and bacteria**
  - Found to stay inside cells for years
  - Loss of developmental function
  - Nano particles form from aluminum
    - Causes neurodegenerative diseases
- **High amounts of Aluminum were found in brains of autistic children**
  - <http://marketwired.com/press-release/discovery-shockingly-high-levels-aluminum-brains-individuals-with-autism-suggests-link-2241940.htm>
- "There is a compelling argument that the occurrence of regressive autism is attributable to genetic and chromosomal abnormalities, arising from the overuse of vaccines, which subsequently affects the stability and function of autonomic nervous system and physiological systems."
  - <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3364648/>

### ALUMINIUM IN VACCINES MAGIC NUMBERS

- 1.) The FDA suggests the maximum amount of aluminum an infant can handle over the first year of life is 4225 (mcg) / year = 11.58 (mcg) / day. This amount allows for the combined aluminum in the vaccine schedule.
- 2.) Aluminum in the recommended vaccines is limited to no more than 850-1250 mcg per vaccine, which just so happens to start at the highest level of aluminum in these vaccines, another coincidence!
- 3.) So how much aluminum is in these vaccines, per shot, routinely given to children?
 

Hepatitis B – 250 mcg
Hib (PedVaxHib brand only) – 225 mcg
Hepatitis A – 250 mcg
Pentacel (DTaP, Hib and Polio combo vaccine) – 330 mcg
Pneumococcus – 125 mcg
Pediarix (DTaP, Hep B and Polio combo vaccine) – 850 mcg
HPV – ranges from 225 to 500 mcg
DTaP – depending on the manufacturer, ranges from 170 to 625 mcg
- 4.) No aluminum human infant injection studies have been done to prove the amount of aluminum in these vaccines is safe. Arbitrary numbers are put forward to convince the public the studies were done but were not.
- 5.) "Aluminum" is a "NEUROTOXIN" that impairs neurological and brain development.  
This is not safe to inject at any level.

- **Vaccines contain Animal Viruses that could cause potential danger to our DNA**

- See Rotavirus vaccine (pg. 31)
- See Varicella vaccine (pg 37)

- **Xenotropic Murine Leukemia Related Virus (XMRV)**

- Stray viruses and viral contaminants that come off of the animal cells that the vaccines are grown in.

  - We don't know what the outcome is going to be
  - We can't track a retrovirus that has been woven into the intracellular DNA
    - See Dr. Judy Mikovitz (pg. 56)
- XMRV is also associated with prostate, breast, ovarian cancers, leukemia, and multiple myeloma.
- Many women with XMRV bore children with autism.

- **Viruses must be grown in living cells**
  - Fetal cells are considered ideal because they divide rapidly, adapt to new environments easily and are less susceptible to rejection than adult cells when transplanted.
- **Abortions are planned**
  - Like bovine cow serum, fetuses are alive when aborted
    - Known as a “water bag” abortion
    - Aborted fetuses are 3 months and older
    - Not given anesthetics

## Aborted Fetal Cell Lines

The **WI-38** cell line was developed by Dr. Leonard Hayflick in 1962, by taking lung tissue from an aborted baby. The WI comes from Wistar Institute and the 38 is the number of aborted babies used until they found the “perfect” cell line for their purposes.

The **MRC-5** cell line was developed for the Medical Research Council in England by J.P. Jacobs in 1966 from lung tissue of an aborted baby. These are vaccines that contain human DNA and aborted fetal tissue from these cell lines: Adenovirus, DTaP, hepatitis A, hepatitis B, MMR, MMRV, rabies, varicella (Chickenpox) and zoster (Shingles).

The **HEK-293** is used for research (*and vaccines*). This cell line originated from a legally aborted fetus in the Netherlands in 1973. The tissue came from the baby’s kidneys, hence Human Embryonic Kidney (HEK). The lab culturing the cells was Alex van der Eb’s laboratory. Frank Graham was the scientist running the experiments refining the cell culture process. The 293 was incorporated in the name because it was produced from his 293<sup>rd</sup> experiment. [https://en.wikipedia.org/wiki/HEK\\_293\\_cells](https://en.wikipedia.org/wiki/HEK_293_cells)  
Current vaccines that contain DNA from this cell line are for Cystic Fibrosis, Ebola, Heart (Abciximab-Repro), Hemophilia, Infection prevention (G-CSF). It is also used in other products. According to Creative Biolabs, at least five therapeutic agents produced in HEK293 cells have been approved by the FDA or the European Medicines Agency (EMA) for therapeutic use.

The **PER.C6** cell line is a line that is not only being used in vaccine production, but in many other medicines and more in production. [http://www.gmp-creativebiolabs.com/per-c6-cell-lines\\_74.htm](http://www.gmp-creativebiolabs.com/per-c6-cell-lines_74.htm) It was developed in 1995. These are quotes from GMP-Creative Biolabs web site...

“The PER.C6 cell line is derived from human embryonic retinal cells, originally from the retinal tissue of an 18 week old fetus aborted in 1985 and further developed and prepared as cell line by transfection with defined E1 region of the adenovirus type 5 followed by selection for transfectants with an immortal phenotype. At the beginning, this cell line was mainly applied for the production of human adenovirus

111

The **walvax-2** cell line is the most recent development of human fetal cell lines from an aborted baby. In a 2015 article titled Characteristics and viral propagation properties of a new human diploid cell line, walvax-2, and its suitability as a candidate cell substrate for vaccine production. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4526020/#cit0007> It is thought that the walvax-2 cell line will eventually take the place of the MRC-5 and the WI-38 lines as they lose the ability to self-replicate.

**There were 9 aborted fetuses “vying” for the one that produced the best cell line to make vaccines from. The cells eventually used, came from lung tissue of a 3-month-old female aborted baby in China. The method they used to deliver the fetus was the “water bag” method which was done so as to deliver the baby intact, so as to provide the freshest and most viable tissue samples possible. “The tissues from the freshly aborted fetuses were immediately sent to the laboratory for the preparation of the cells.”**

According to ethicalresearch.net, there was “**Questionable complicity between the doctors who performed the abortion and vaccine researchers who benefited from obtaining freshly aborted fetal lung fibroblast tissue.** Ethicists have universally insisted that, in the development of viral vaccines from aborted fetal tissue, there should be no collusion between the woman who has decided to abort her baby (and, by extension, the doctors doing the abortion) and the researchers. The mother must have made her decision to abort before she is asked whether she wants to donate fetal tissue for research purposes. It appears this was done in the Walvax-2 research.”

# The Smallpox Vaccine: The Beginning of the Vaccine Movement

- **Smallpox was a big problem in the 1700's**
  - What was the condition of the environment?
    - No water sanitation, no refrigeration, no plumbing
    - This tells us what their immune system looked like back then
  - How was the disease treated?
- **Smallpox was the reason vaccines were created**
  - Indians took the scabs from smallpox victims and injected them into others to create immunity
    - All it ever did was create smallpox epidemics
  - They did not know how to *attenuate* the virus (make it weaker)
  - Milkmaids were immune to smallpox due to cowpox
- **Cowpox and Smallpox**
  - **Vaccine is derived from the word “vaca,” or “cow”**
  - Cowpox is structurally similar to smallpox
    - Deceived the immune system by giving patients cowpox instead of smallpox
      - Took pustule from cows with cowpox, opened up the arms of “patients” (victims), and stuffed this biological material into their system
        - Created blood diseases
        - Some people had to have their limbs amputated
- **Dr. Edward Jenner, 1749**
  - Practiced injecting his own son with cowpox
    - Gave multiple doses of crude extract of cowpox
    - Lead to catastrophic immune failure
    - His son died at age 21 from tuberculosis

## Mandatory Smallpox Vaccines

- **Vaccines became mandatory in England in 1853**

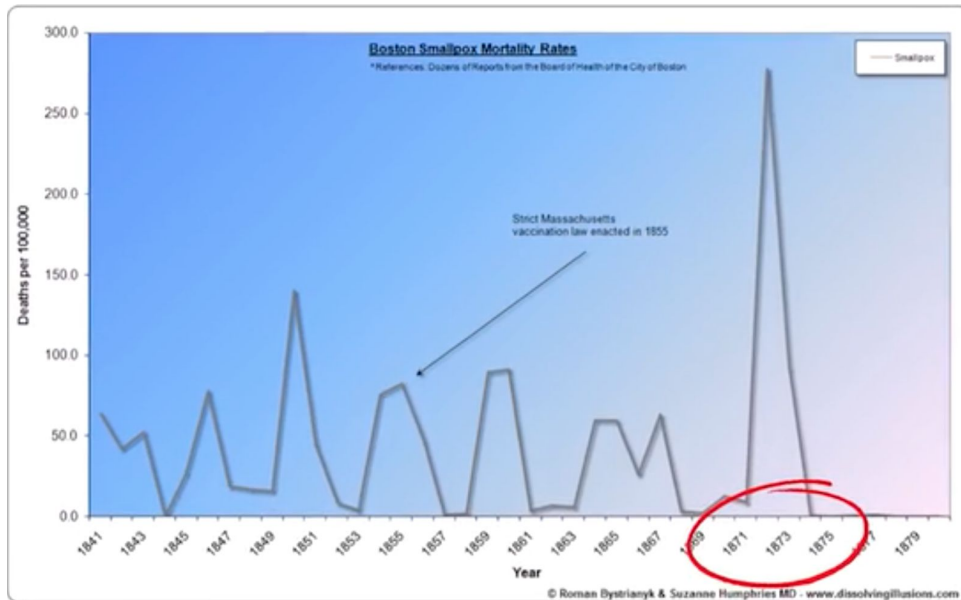

- Massive epidemics began to occur
- **1857 to 1859:** over 14,000 smallpox deaths
- **1863 to 1865:** over 20,000 smallpox deaths
- **1870 to 1872:** over 45,000 smallpox deaths

- **United States Mandated Smallpox Vaccines**

- **Massachusetts enforced vaccine laws in 1855**

- **MASSIVE OUTBREAKS OF SMALLPOX**

    - 1860
    - 1864

    - 1867
    - Culminating with infamous smallpox epidemic in 1872 to 1873

- **Similar events happened in the late 1800's as vaccination mandates increased (so did the deaths from smallpox)**

- Germany
- Scotland
- Ireland
- Italy
- Holland

# The Influenza Vaccine

- **Two different Vaccines**

- Injectable
- Inhaled
  - Only 3% effective

- **Journal of Virology study**

- Shows that injected with the Trivalent flu vaccine, it stirs the immune system up to create a massive amount of antibodies for particular strains of flu.
- The antibody arm of immunity and cell mediated arm of immunity usually work in synergy (together)
  - After vaccine - the antibody arm gets really ramped up - then feeds back into the cellular arm and memory arm
    - Antibodies actually paralyze immune system for creating memory immunity
- **Conclusion:** Antibody (humoral) immunity stops the body from producing cell mediated immunity and memory immunity = meaning that we create no immunity for future diseases.

- **\*\*\*WE HAVE NO IDEA HOW MANY FLU STRAINS THERE ARE\*\*\***

- **“Swine Flu Epidemic” -Dr. Toni Bark**

  - \*Schizophrenia, Autism, & psychiatric disorders have all been found to have as its precursors; *a history of inflammation in utero*
  - **CONCLUSIONS:**
    - Flu shot given during pregnancy causes increase in CRP (C Reactive protein) which is a measure of inflammation
    - Inflammation in womb is associated with increased risk of autism
    - Flu shot given during pregnancy *increases* autism risk

- **Thimerosal**

- MEGA DOSES of thimerosal in Flu vaccine
- Is hazardous waste
- Early fetus in utero gets over a million times what EPA says is safe
- Flu Vaccine Thimerosal Amount
  - 25mcg/.5mL = 25mcg/.0005L
  - 250,000mcg/5L = 50,000 mcg/L
  - 1mcg/L = 1PPB (parts per billion)
  - **Flu shot has 50,000 PPB of Thimerosal**

## Rotavirus Vaccine

- **Live virus vaccine given to infants to prevent diarrhea**
- **Rotavirus is a benign disease**
  - You can get IV fluids if needed
  - Common symptoms are vomiting or diarrhea
- **No data to support the use of rotavirus vaccine**
- **You have to give rotavirus vaccine before 9 months**
  - It will make us sick
  - Instead we give it to a 2 month old with an immature immune system
- **Rotavirus is contaminated with animal viruses**
  - FDA acknowledged porcine (pig) circovirus in Rotarex
    - Both PCV1 and PCV2
    - **Can't recall the vaccine because viruses are in the actual vaccine production process**
    - <https://www.cidrap.umn.edu/news-perspective/2010/05/second-rotavirus-vaccine-found-contain-porcine-circovirus>

    - Vaccine created more problems

# Vitamin K Vaccine

- **Infants' digestive system is not fully developed at birth**

- In order to absorb vitamin K, we need to have a functioning biliary & pancreas system
- Too much vitamin k can tax the liver and cause brain damage
- Baby's kidneys are not fully functioning for injection

- **As baby ages & digestive tract mucosal lining, gut flora and enzyme functions develop, baby can process more vitamin K**

- **Cord blood contains stem cells**

- Protects the baby against bleeding and perform all sorts of needed repairs inside an infant's body
  - **Cord cutting needs to be DELAYED and blood needs to stay thin in order for stem cells to perform their function**

- **Two main brands of Vit K vaccines given in US hospitals**

- **Brand #1 contains *Benzyl Alcohol* as its main preservative**
  - Newborns are injected with 9mg of benzyl alcohol
    - Alcohol causes feelings of drunkenness, sleepiness, lack of desire to eat, respiratory depression and decreased o2 sats, and decreased heart rate.
    - Babies get too drugged up to properly feed, mothers feel defeated
    - Alcohol attacks the liver
      - May be linked to jaundice
- **Brand #2 contains 10mg of *Polysorbate 80***
  - Causes premature ovarian failure and infertility
  - Opens up the blood brain barrier
  - In Jan 2016 - the American College of Pediatrics spoke up about their concern about Gardasil because it contains 50 mcg of polysorbate 80
    - **Vitamin K has 200 times more polysorbate 80 than the Gardasil**

# Gardasil and HPV

## The Most Dangerous Vaccine

- **26% of women have HPV**

- 90% of HPV strains will go away on their own

- **15 types of HPV cause cancer**

- Only HPV types 16 & 18 are targeted in Gardasil and Cervarix

- Creates a vacuum
  - Meaning other strains are taking their place and their strength is greater
- “The vaccine may have reduced the particular HPV strains, but new virulent strains are being created by the vaccine.”
  - <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4262157/>

- **Cervarix and Gardasil both contain Aluminum**

- **Cervarix**

  - HPV 16&18 are responsible for 70% of cervical cancer

- **Gardasil**

- **Quadrivalent vaccine**
- “Guards” against HPV types 6, 11, 16 & 18
  - HPV type 6 & 11 are responsible for 90% of genital warts
- Recommended for both boys and girls
  - First shot at age 11 or 12
  - Mandated for entire population
- **10% of Gardasil patients end up in the ER within 42 days after vaccination**
- **Has most adverse effects out of all vaccines**

  - Vaccine was
    - Fast tracked
    - Genetically engineered
      - Used virus-like protein particles
        - 1st time this has ever been done

- **Used Aluminum placebo**

- No pre-existing conditions
- Had one dose of gardasil - no issues
- Had 2nd dose of gardasil 2 months later
  - Didn't feel well that same night
  - Died in his sleep due to induced silent heart attack

- **1 in 10 people injected with Gardasil develop**

- Neurological diseases
- Chronic lymes disease
- Reactivated infections
- Serious narcolepsy

- **Cancer and Gardasil**

- Gardasil appears to actually increase cancer risks by 44.6% in people who are already carriers of the same HPV strains which are strains 16 & 18 used in the vaccine.

- Meaning it can actually activate infection & directly cause pre-cancerous lesions to appear
- Vaccine may actually accelerate the appearance of cancer

- **Journal of Pediatrics Study**

- Indicated rates of HPV have dropped since the vaccine was introduced in 2006, but the decrease came only in the 4 strains included in the vaccine.
- Any HPV type prevalence was similar in the pre-vaccine era (54.4%) and the vaccine era (58.1%)
- Study found although the 4 types of HPV in the vaccines have decreased the prevalence of HPV infection, it has actually increased HPV by 3.7%
- Vaccine is causing other strains to take the place of those eliminated through vaccine

# Hepatitis B Vaccine, 1991

- **Very low risk of contracting Hepatitis B**
  - Policy has no science behind it
  - Epidemiology
    - “Vaccinate for the most severe condition”
- **Vaccinations given at**
  - 0 months, 2 months & 4 months
- **Hepatitis B Vaccine contains Aluminum**
  - Far exceeding doses considered safe
    - 250 mcg of Aluminum
    - Newborn baby weight (AT MOST) = 5 kilograms
    - 5 kilo x 5mg = 25micrograms of aluminum = supposedly safe
    - **We are Injecting newborns with 10 times the amount that is “supposedly safe.”**
- **Hepatitis B Vaccine does not give lasting immunity**
  - Viral vaccines stimulate VH1 arm of immunity

# Varicella Vaccine (Chicken Pox)

- **Deaths from chickenpox**

- 100 deaths yearly
  - Mostly from immunocompromised

- **Herpes Zoster**

- More common than chicken pox
- Debilitation in the elderly
- Can be caused by chicken pox reactivation

- **No one is getting boosted from naturally occurring chicken pox anymore**

- Varicella vaccine produces a serious condition later in life with Shingles (herpes zoster)
- <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3096786/>

### SOME Ingredients in Varicella Vaccine

Chicken Fibroblast Cells	Chicken retinal and kidney cells
Monkey Kidney Cells	Cocker Spaniel Kidney Cells
Aborted Fetal Lung Fibroblast Cells	Mouse Brain Tissue
Fetal Bovine Serum	Gelatin

#### Some people should not get this vaccine

Tell your vaccine provider if the person getting the vaccine:

- **Has any severe, life-threatening allergies.** A person who has ever had a life-threatening allergic reaction after a dose of chickenpox vaccine or has a severe allergy to any part of this vaccine, may be advised not to be vaccinated. Ask your health care provider if you want information about vaccine components.
- **Is pregnant or thinks she might be pregnant.** Pregnant women should wait to get chickenpox vaccine until after they are no longer pregnant. Women should avoid getting pregnant for at least 1 month after getting chickenpox vaccine.
- **Has a weakened immune system** due to disease (such as cancer or HIV/AIDS) or medical treatments (such as radiation, immunotherapy, steroids, or chemotherapy).
- **Has a parent, brother, or sister with a history of immune system problems.**
- **Is taking salicylates (such as aspirin).** People should avoid using salicylates for 6 weeks after getting varicella vaccine.
- **Has recently had a blood transfusion or received other blood products.** You might be advised to postpone chickenpox vaccination for 3 months or more.
- **Has tuberculosis.**
- **Has gotten any other vaccines in the past 4 weeks.** Live vaccines given too close together might not work as well.
- **Is not feeling well.** A mild illness, such as a cold, is usually not a reason to postpone a vaccination. Someone who is moderately or severely ill should probably wait. Your doctor can advise you.

# The MMR Vaccine

## Measles, Mumps, Rubella

- **MMR is a live virus vaccine**
  - It can shed viruses for up to 37 days after vaccination
  - Injecting live viruses = virus infects other people who come into contact
  - Measles is on the rise due to the atypical measles virus in the vaccine
- **Measle & Pertussis Outbreaks**
  - 95% of cases are in vaccinated populations
  - Despite the existence of an effective measles vaccine, resurgence in measles cases in the US and across Europe has occurred, including individuals vaccinated with two doses of MMR vaccine
  - Antibodies do not equal immunity
  - <https://www.ncbi.nlm.nih.gov/m/pubmed/26602762/>

  - <https://ahrp.org/former-merck-scientists-sue-merck-alleging-mmr-vaccine-efficacy-fraud/>
- **MMR does not cause lasting immunity**
  - Viral vaccines stimulates the VH1 arm of immunity
    - 20 to 30 years of immunity at most
    - 2% to 10% don't even respond to vaccine
- **Measles deaths was already mostly eliminated before a vaccine**
  - Refrigeration & clean water helped eliminate measles deaths

- **Measles is NOT a deadly disease**

- Poverty, malnutrition, starvation, dirty water
  - In these cases, ANY disease can be deadly

- **Measles gives us life-long immunity to certain diseases**

- Reduction in certain cancers and atopic disorders, heart disease
- It is essential for our immune system to develop and grow by meeting natural infectious challenges
  - If we take that away
    - Immune system blows back; autoimmune disorders emerge
    - TH2 Dominant disorders
      - Because it has been challenged by environment

- **Mayo Clinic Uses Measles Virus to fight cancer**

- <https://newsnetwork.mayoclinic.org/discussion/mayo-clinic-radio-measles-virus-vs-cancer-2/>

## DTaP, TDaP & DPT

### Diphtheria, Tetanus, and Pertussis (Whooping Cough)

- **3 Diseases in 1 vaccine**

- Remember: No person experiences TWO diseases at the same time..EVER.

- **DPT**

- Contained *whole cell* pertussis
- High Incidence of Seizures
  - 5 out of 1500
  - They were expecting to see 5 out of 15,000
  - 11 babies that died within a week after receiving DPT shots in 1978
  - Had a patent to make a safer vaccine since 1937
    - Didn't make a new vaccine even though it was causing death because it costed ½ a penny more

- **DTaP**

- Diphtheria, Tetanus, *acellular* pertussis
- Highly ineffective (does not give good protection)
  - Children receive 5 doses
    - Lose 50% to 80% of their protection
    - <https://www.foxnews.com/health/whooping-cough-booster-may-wear-off-in-teens-study-finds>

- **TDaP**

- Ages 7 and up
- Contains Aluminum
- Highly ineffective (does not give good protection)
- CDC recommends booster every pregnancy
  - No safety studies for injecting aluminum into pregnant mothers
  - Guaranteed poisoning to unborn child for a 1 in a million chance your child will die of pertussis (5 to 10 deaths out of 4 million births)
- **US government has known since 1991 that the TDaP vaccine causes microcephaly**

## ● Tetanus

- ***Tetanus is an anaerobic bacteria*** meaning it can't survive in oxygenated environments
  - If the wound bled, NO tetanus.
- **Just because you get cut on metal (rusty or not), it doesn't automatically mean tetanus bacteria is present.**
  - Tetanus is normally found in manure/dirt and not on a clean plumbing fixture.
- **Even if there was a deep puncture wound that did not bleed, caused by an object that had tetanus bacteria on it, you literally can NOT "vaccinate" against a bacterial infection AFTER the exposure.**
  - The vaccine is not an instant tetanus killer; it would take weeks for your body to produce enough antibodies (provided the vaccine is even successful at all).
- **If there were serious concerns about tetanus exposure (as previously explained) then the ONLY thing that could help (outside of allowing the wound to bleed, if possible, and cleaning the wound with soap, water, or hydrogen peroxide) would be the TiG shot (tetanus immunoglobulin),**
  - TiG shot is an *anti-toxin* and not a vaccine.
- **There is no "tetanus vaccine" available in the United States**, only the DTaP which is a 3-in-1 cocktail vaccine consisting of Diphtheria, Tetanus & Pertussis (whooping cough) or Td (tetanus and diphtheria).
  - **To summarize:**
    - A tetanus shot would not help a current case of tetanus as a vaccine takes several weeks to create antibodies. If a current case of tetanus is truly a concern, the TiG shot is what should be given.
    - **According to the VAERS database**, reactions to vaccines for tetanus and diphtheria are not rare. As of August 2012, there were over 22,000 adverse reactions reported and 67 deaths.
    - Lastly, the CDC states that efficacy of the tetanus toxoid has never been studied in a vaccine trial.

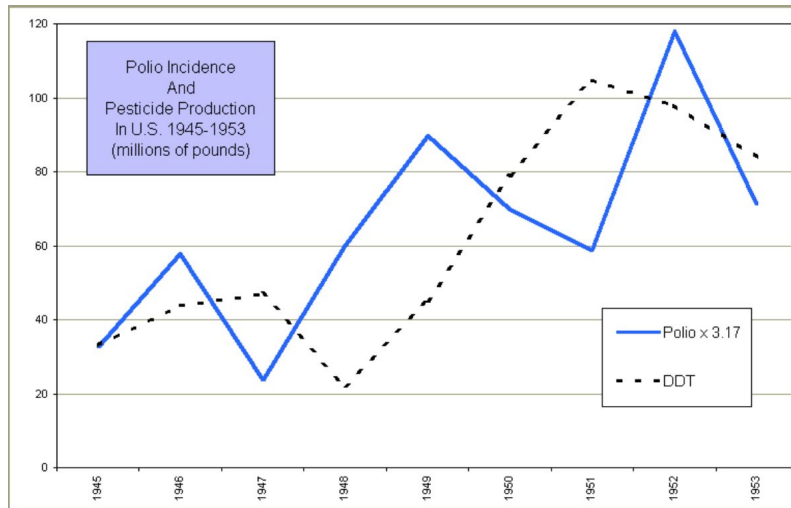

## ● Pertussis (Whooping Cough)

- *Deaths from whooping cough = 5 to 10 deaths a year in US*
- 1 in a Million chance of dying from whooping cough
  - Mostly as a newborn (3 months or under because their windpipe is so small)
- **80% or more of people who contract whooping cough were vaccinated for it.**
  - <https://www.everydayhealth.com/cold-and-flu/some-whooping-cough-strains-now-outsmarting-vaccine.aspx>
- **Study:**
  - Despite high levels of vaccination coverage, circulation of pertussis cannot be controlled at all.
  - Results questions the efficacy of the present immunization programs
  - <https://www.ncbi.nlm.nih.gov/m/pubmed/24216286/>

- There are at least 3 dozen studies that confirm the pertussis vaccine actually caused evolutionary adaptation of pertussis micro organisms.
  - [Get Neil Z Miller's book here](#)
- People who get pertussis vaccine become silent carriers of pertussis
  - May be the reason why we are seeing a rise in pertussis outbreaks

## The Polio Vaccine

- The rise and fall of poliomyelitis perfectly correlates with the use of DDT**
  - <https://www.westonaprice.org/health-topics/environmental-toxins/pesticides-and-polio-a-critique-of-scientific-literature/?fbclid=IwAR2rpKXbzI00AlzgMQTvmFpArzoJ2a4HlBvhHOC7QPXkJuY6m6I6ZZ3rKGU>
  - Some pro-vaxxers will try to argue that “correlation doesn’t equal causation.” And that is true. But correlation still requires investigation.
- 95% of people who contract wild polio don’t even know they have it - Dr. Toni Bark**
  - Symptoms are so mild
  - Less than 1% actually have long-lasting paralysis

Ed Markam, Count to Coast interview; www.doctorsmarymonkey.com

**From 1955 to 1963, almost every dose of polio vaccine (injection and sugar cube) produced in the world was given to approx. 200 million Americans and was contaminated with the cancer-causing virus from the monkey kidneys used to develop the vaccine.**

**It is estimated that 1 out of every 200 people will have cancer caused by SV-40.**

**There are now 15 cases of cancer for every one case of polio it prevented!**

- **Polio vaccine is actually known world-wide to cause paralysis**

- Polio is a live virus vaccine
  - Vaccine “shedding” occurs
- [https://www.theguardian.com/global-development/2019/nov/28/polio-outbreaks-in-four-african-countries-caused-by-mutation-of-strain-in-vaccine?CMP=share\\_btn\\_fb&fbclid=IwAR3or6mNR0Y1H3-NM1wVdJrD8S-XKjphNjiUKNzOamznCEImqJ1OmOHARy\\_w](https://www.theguardian.com/global-development/2019/nov/28/polio-outbreaks-in-four-african-countries-caused-by-mutation-of-strain-in-vaccine?CMP=share_btn_fb&fbclid=IwAR3or6mNR0Y1H3-NM1wVdJrD8S-XKjphNjiUKNzOamznCEImqJ1OmOHARy_w)

- **Dr. Suzanne Humphries, MD**

- After 1955, a Cover-up was created to hide that the polio vaccine was actually spreading polio.
- Live polio virus strain had infected the Salk vaccines and created an epidemic of polio-type diseases labeled aseptic meningitis or Acute Flaccid Paralysis (AFP).
- After polio vaccines had begun, polio was assigned different names to hide the vaccines ineffectiveness.
- <https://www.youtube.com/watch?v=Twch-T-n8Ns> (HIGHLY RECOMMEND!)

### **HIDING POLIO: THE DIAGNOSIS LIE**

**"Polio has not been eradicated by vaccination, it is lurking behind a redefinition and new diagnostic names like viral or aseptic meningitis.....According to one of the 1997 issues of the MMWR, there are some 30,000 to 50,000 cases of viral meningitis per year in the United States alone. That's where all those 30,000 - 50,000 cases of polio disappeared after the introduction of mass vaccination."**

## Vaccine Injury Compensation Act of 1986

- **Pharmaceutical companies had so many lawsuits against them for vaccine injury and death**
  - **Blackmailed the government**
    - Said they were no longer going to produce vaccines unless the government would protect them from liability.
    - Reagan signed VICA into office in 1986
  - **You cannot sue a manufacturer even if your child gets injured or dies.**
- **1986 - After VICA was signed into office**
  - **Vaccine schedule went from 10 vaccinations to 69 vaccinations**
  - **CDC Vaccine Schedule from 1983 - 2017**
    - <https://www.nvic.org/cmstemplates/nvic/pdf/downloads/1983-2017-vaccine-schedules.pdf>
- **Vaccine manufacturers are the only business that is allowed to practice and sell services without liability insurance.**
- **Vaccine manufacturers have NO REASON to have quality control**
  - **They have NO liability**

# Whistleblowers and Pharma Corruption

- **Dr. David Lewis, Microbiologist**

- EPA & CDC Whistleblower
- “Government agencies are manipulating data to protect the sales of vaccines. They cover up any adverse effects, shun anyone from the community that questions.”
  - <https://parentsagainstmandatoryvaccinesdotnet.wordpress.com/2014/07/12/epa-cdc-whistleblower-exposes-their-corruption-of-science/>

**“The Director is the Almighty Dollar”**

- **Dr. Julie Gerberdine**

- Director of the CDC (2001 - 2008)
  - Took lucrative position as head of the vaccine division at MERCK in 2009
    - Given stock options in the millions for this position

- **Conflicts of Interest**

- **CDC looks after vaccine safety**
- **CDC also promotes vaccines**
  - Cannot be trusted with vaccine safety
  - Conflict of interest arises because they push as many vaccines as they possibly can
- **CDC is a marketing brand for Pharmaceutical companies**
  - Sells 4.6 BILLION worth of vaccines a year
  - Holds over 50 patents to vaccines
    - Flu
    - Rotavirus
    - Hep A
    - HIV
    - Anthrax
    - Pneumococcal
    - MenB
- **ACIP Committee**
  - Decides which vaccines can be added to the schedule
  - CDC grants a waiver for conflict of interest for anyone on ACIP Committee
    - Meaning they are not regulated
- **Captive Agency phenomenon**
  - Sock puppets for industry they're supposed to be regulating
- <https://go.thetruthaboutvaccines.com/>

- **UNITED STATES ENVIRONMENTAL PROTECTION AGENCY (EPA)**

- Considers aluminum and mercury toxins
- Has limits on toxins

- Limits are exceeded with first vaccine on day 1 of life

- **Dr. Gary Goldman, Ph.D for the CDC, Whistleblower**

- Came up with evidence that the chickenpox vaccine was producing a more serious condition that would happen later on in life.
  - *People who got the injection as children were more susceptible to shingles later in life*
- CDC blocked him from publishing his information
- Court battle happened
  - <https://physiciansforinformedconsent.org/leadership/gary-goldman-phd/>
  - <http://vaccinetruth.org/dr-gary-goldman.html>

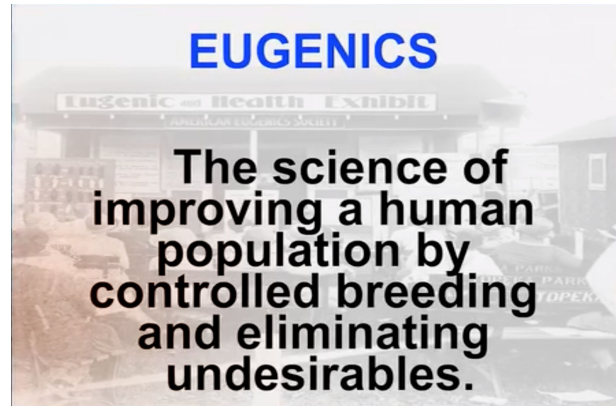

- **Dr. William Thompson, PhD - CDC Whistleblower**

- **Ordered by superior (Frank Destefano) to throw away proof that African American Male babies were at 300 times the risk for AUTISM with MMR vaccination and isolation autism (huge increase in all that got the vaccine)**
  - Data fraud in first degree
- **Tried to warn Dr. Julie Gerberdine (head of CDC at the time)**
  - She never responded.
  - He was put on administrative leave of absence
  - He received a letter of discipline in his file for insubordination for *not going to his supervisor*
    - His supervisor, Frank Destefano, was the one who directed him to throw the evidence away
  - He was replaced
  - He was not allowed to speak at the Institute of Medicine meeting
    - Destefano presented fraudulent evidence

# Experiments on Black populations and Third World Countries & Eugenics policies

“The system of Government and Pharmaceutical interest has exploited humans for medical experiments in order to maintain profit, power & control over the population.”

- **Minister Tony Muhamad - Vaccine Activist**
  - “Black children have been harmed, tortured by a medical system that knew children would have their lives destroyed.”
- **Flint Michigan**
  - Purposefully put lead in the water
  - Black population, including children were poisoned

# Lawsuits

## US vs Merck

- Virologists at Merck filed a false claims act with government
- Merck had ordered them to spike blood samples with antibodies from animals so it would pass the FDA's scrutiny and be accepted as an "effective" mumps vaccine
- <https://ahrp.org/former-merck-scientists-sue-merck-alleging-mmr-vaccine-efficacy-fraud/>

## Jacobson vs Massachusetts of 1905

- Supreme court ruled that "states have the constitutional authority to use police powers to mandate small pox vaccines"
- Jacobson (a pastor) had objected
  - Believed there was genetic predispositions
  - His son and he both had adverse effects
  - Was fined \$5 to avoid the vaccine
- <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1449224/>

## Buck vs Bell 1927

- Made it acceptable for US to pass eugenics laws
  - Gave green lights to other states to forcibly sterilize anyone they claimed was "genetically defective"
  - Over 60,000 americans between 1927 to the 1940's were sterilized

- **Polypharmacy**
  - Vaccines like other medications create a huge demand for medications and medical care at a very high cost.
  - Those aged 65 - 69 take 15 prescriptions a year

## Quick Facts

📌 In 1960 1.6% of children had chronic illness - today over 50% of children have chronic health issues.

<https://abcnews.go.com/Health/Healthday/story?id=4507708&page=1>

📌 As of January 2016, 1 in 20 children under age 5 has a seizure disorder

📌 From 1989 an increase in Autism, ADD, ADHD, Tourettes, Depression, SIDS, narcolepsy, food allergies and asthma skyrocketed

<https://www.cdc.gov/childrensmentalhealth/data.html>

📌 Prevalence of obesity for children ages 6 to 11 years – quadrupled.

📌 90% of the US expenditure on health care is for chronic and mental health conditions.

📌 Over 1/4 of applicants fail the physical health tests yearly, and cannot serve in the US military (17-24 yr olds - isn't this demographic supposed to be our healthiest?)

📌 More than 859,000 Americans die of heart disease or stroke every year.

📌 More than 1.6 million people are diagnosed with cancer, and almost 600,000 die from it, making it the second leading cause of death.

📌 10% of Americans have diabetes, and another 90+ million have Pre-diabetes and the estimated cost of diagnosed diabetes was \$327 billion in medical costs and lost productivity in 2017.

📌 **The US has one of the highest mortality rates of infants in the developed world.**

### Just a VERY few mental health stats -

📌 Suicide is among the leading causes of death in 15-24 year old Canadians.

📌 The overall suicide rate in the U.S. has increased by 31% since 2001.

📌 Suicide is the 2nd leading cause of death among people aged 10-34 , and 75% of people who die by suicide are male.

- **John Hopkins Study:**

- listed Iatrogenesis as the 3rd leading cause of death

## Dr. Judy Mikovitz

"Dr. Judy Mikovitz was a lead scientist working on behalf of the US government with viruses and infectious disease. She discovered that animal cells routinely placed in vaccines were implicated in rapid cancer growth and spread (and other disease genesis as well). As she reported her findings, the US government fired her and tried to bury her research. She kept her material, published several books and routinely tries to warn the public that what they're being told about vaccines, viruses and other related issues is coming from a corrupt government system, which doesn't have the public's best interest at heart.

Judy Mikovits is among her generation's most accomplished scientists. She joined NIH in 1980 as a Postdoctoral Scholar in Molecular Virology at the National Cancer Institute. Dr. Mikovits began a 20-year collaboration with Frank Ruscetti, a pioneer in the field of human retro virology. She helped Dr Ruscetti isolate the HIV virus + link it to [#AIDS](#) in 1983. Her NIH boss Anthony Fauci delayed publication of that critical paper for 6 months to let his protégé Robert Gallo replicate, publish and claim credit. The delay in mass HIV testing let AIDS further spread around the globe + helped Fauci win promotion to director NIAID.

In 2006, Dr Mikovits became director of Whittemore Peterson Institute for Neuro-Immune Disease + collaborated with Dr Ruscetti searching for the cause of Chronic Fatigue Syndrome which suddenly became epidemic in the 1980s. The male dominated medical community dismissed CFS as psychosomatic "yuppie flu" caused when fragile females cracked in corporate jobs.

Dr. Mikovits discovered that 67% of affected women carried a virus—called Xenotropic Murine Leukemia related Virus—that appeared in healthy women only 4% of the time. XMRV is also associated with prostate, breast, ovarian cancers, leukemia, and multiple myeloma. Many women with XMRV bore children with autism.

In 2009, Drs. Mikovits and Ruscetti published their explosive findings in the journal Science. But the question remained: How was XMRV getting into people?

Other researchers linked the first CFS outbreak to a polio vaccine given to doctors and nurses that resulted in the "1934 Los Angeles County Hospital Epidemic." That vaccine was cultivated on pulverized mouse brains. Retroviruses from dead animals can survive in cell lines and permanently contaminate vaccines.

Dr Mikovits' studies suggested that the XMRV Virus was present in the MMR, Polio + Encephalitis vaccines given to American children + soldiers.

Dr Fauci ordered Mikovits to keep her mouth shut. When she refused, he illegally confiscated her work books and hard drives, drove her from government work + blackballed her from receiving NIH grants ending her science career. XMRV remains in American vaccines." .
