WOOD-FIRED SCIENCE

— HOW IT WORKS —

1 DIGITAL CONTROLLER

Manages the internal temperature by controlling the fuel and oxygen supply to the firebox.

2 AUGER MOTOR

Turns the auger which feeds pellets into the firebox.

3 COMBUSTION FAN

The micro-adjusted variable-speed fan and auger motor allow you to keep your grill and food at the temperature you set.

4 HEAT ROD

Ignites the pellets and the combustion fan keeps them burning.

5 FIREBOX

The Venturi-style firebox creates the ultimate wood-burning fire, circulating pure hardwood smoke and flavor throughout the grill.

NEW & IMPROVED PRIME APP IS HERE

On the frontier of smart grilling since 2014, GMG is excited to release the new PRIME APP!
