

Safety Statement

LD Technical Services BV is involved with the protection of her employees, properties of herself and properties of third parties and the prevention of material damage.

During the execution of this involvement we will maintain a safe and healthy working environment as applicable in our branch of industry and in accordance with the legal requirements.

We will strive to prevent every foreseeable danger that could lead to personal injury, occupational disease, fire, and damage to properties of our own employees and those of Third Parties. At the same time we strive to set up the best household environment as possible within LD Technical Services and to manage it accordingly.

Losses by accidents can be controlled by a good management, combined with active involvement of all the employees and the care of safety of Third Parties. Management of accidents, losses and damages to the environment are the direct responsibility of all the managerial staff and the employees together. Everyone of the management is bound to the safety requirements which are demanded by LD Technical Services at the execution of their work and at the maintenance.

All the employees will practice their activities in the right way in accordance with the established procedures and the belonging production philosophy.

The management is directed to strive the continuous improvement when it comes to Safety, Health and Environment.
