

OVERVIEW

SOS SYSTEMS ON SHIP PVT.LTD Is committed to Design & Manufacture quality control panels integrated with electrical, electronics & automation components and engineering excellence to carter complete industrial solution.

Systems on ship has an experienced design team with latest design software & tools, In-house testing facilities for checking quality & functionality of Control Panels. Our Control Panel design are working in almost all industrial like Printing & Packaging, Plastic, Pharmaceuticals, Chemical, Food, Pump, Process, Machine tool. Textile. Engineering etc.

Types Of Panel :

- ★ Design & Built as per customer requirement
- ★ Automation control panel with system integration of PLC, HMI, VFD, AC Servo
- ★ Feeder panel
- ★ Bus Duct Panel
- ★ Starter panels DOL/STAR-DELTA/ATS
- ★ Generator Synchronizing panel
- ★ Design with proper cooling arrangement
- ★ High quality switch gear & automation components
- ★ MS / SS /ABS plastic enclosure with different industrial IP rating Ip44 , Ip55, IP65

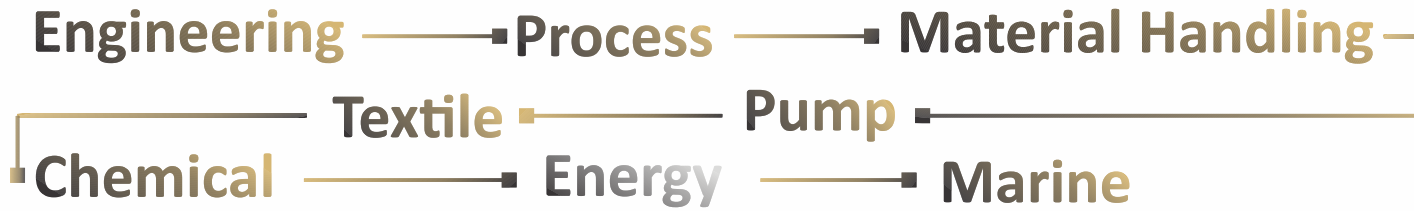

EMPOWERING WITH ADVANCE FRAME WORK:

Products with Consistent quality are ensured by state-of-the-art machines Including CNC shearing and CNC Press brakes. We are committed to design, Manufacturing Control Panel to the utmost Satisfaction of our customer.
