Medchemexpress, HY-106387 1mg
Dexanabinol CAS:112924-45-5
Dexanabinol (HU-211) is an artificially synthesized cannabinoid derivative and lacks cannabimimetic effects. Dexanabinol exhibits not only the antioxidant and neuroprotective activities in brain but also anti-inflammatory activity by inhibiting NF- κ B and decreasing cytokines such as TNF α and interleukin-6, which could ensure the integrity of BBB and reduce cell apoptosis and death. Dexanabinol is widely used in head injury or stroke treatment and has been shown to be safe in animals and humans [1]. Purity:>98% Medchemexpress has over 10000 novel life-science reagents, reference compounds, APIs and natural compounds for laboratory and scientific use. Other quantity can also be offered.
