A SHIFT4 COMPANY

A SHIFT4 COMPANY

Increase Efficiency and Boost Your Bottom Line

Tableside Ordering

Servers can take orders at the table and send them straight to the kitchen without needing to touch a terminal.

Secure Payments

Ensure payment data is protected by utilizing EMV chip technology in combination with P2PE technology.

Pay-at-the-Table

Your server can dip or swipe the card, get the customer's signature, settle the check and print a receipt without ever leaving the table.
