### HOW TO MAKE THE WORLD MAP 'LIVE' (Excel / Power BI)

Excel option A (recommended): Insert → 3D Map → Open 3D Maps → Use Latitude/Longitude from Employee\_Data.

Excel option B: Country\_Growth → Insert → Maps → Filled Map (requires supported Microsoft 365).

To refresh: If your data comes from CSV/SharePoint/API via Power Query → Data → Refresh All.

True LIVE: Publish to Power BI → Map visual + Scheduled refresh (best for LinkedIn screenshots).
