

2026 STRAIT-HEFTE

Tried & True

OCTOBER 16-17, 2026

PRODUCTION SALE

320 FM 3059 | STREETMAN, TEXAS

STRAIT
Ranches

HEFTE RANCH

Dear Friends and Fellow Cattle Producers,

Thank you for your continued interest in our cattle and for the support you have shown the Tried & True Sale over the years. We are excited to once again partner with Hefte Ranch to host the Ninth Annual Strait-Hefte Tried & True Production Sale in Streetman, Texas, on October 16th and 17th, 2026.

This year is especially meaningful to our family as we celebrate the 75th anniversary of using Santa Gertrudis at Strait Ranches. Since 1951, generations of our family have had the privilege of raising Santa Gertrudis cattle and building a program rooted in hard work, sound cattle, and continuous improvement. Reaching this milestone gives us an opportunity not only to reflect on where we started, but also to look ahead with tremendous optimism for where our program and the Santa Gertrudis breed are going. It is an honor and a privilege to continue Dad's vision and legacy he built.

While much has changed in the cattle industry over 75 years, the fundamentals behind good cattle have not. Fertility, functionality, efficiency, soundness, and phenotype remain at the heart of our breeding decisions. Today, careful data collection, artificial insemination, embryo transfer, and genomic technology give us additional tools to make each generation better than the last. For us, Tried & True means honoring what has proven to work while continually searching for ways to make the next generation better.

We are again excited to showcase the genetics of our customers alongside our own. Previous buyers have the opportunity to consign one female or one exclusive semen or embryo package. Seeing Strait-Hefte genetics succeed in other programs and return to this sale through outstanding customer consignments is something we are especially proud of.

We believe the 2026 Tried & True offering is one of the deepest and most consistent groups we have assembled. The females represent generations of proven genetics and productive cow families, while the bulls combine phenotype, performance, and genetic potential designed to make an impact in both registered and commercial herds. As always, all Strait Ranches branded bulls have been developed in grass traps here at the ranch in Streetman with longevity and real-world functionality in mind.

We are especially grateful for our entire Strait Ranches team, Francisco "Frank" Garcia, Mike Scoggin, Humberto Hernandez, and Laura Dominguez, whose dedication, knowledge, and commitment to Strait Ranches are invaluable.

We invite you to join us in Streetman on October 16th and 17th and encourage you to visit the ranch prior to the sale to view the cattle in person. Online bidding will also be available through DVAuction.com.

If we can answer any questions, please don't hesitate to call Yancey (972-841-0989), Frank (Se Habla Español – 979-533-3213), or Callie (210-837-1199).

As we mark 75 years of Strait Ranches Santa Gertrudis, we are reminded that our greatest blessings extend far beyond the cattle. We are thankful for health, family, rain, lasting friendships, generations of dedicated cattlemen, and the opportunity to carry forward a legacy that began in 1951.

Thank you for being part of our story. We look forward to seeing you in Streetman this October.

Many thanks,
The Y.N. Strait Family

Francisco
"Frank"
Garcia

Piper and Nellie

Dear Friends,

We finally received good rain! Praise God! Fat red cows on lush green grass is one of the prettiest sights for a rancher to see. Year after year in our sale letter, we wrote about the drought and harsh conditions in South Texas. This year, that weather pattern finally broke for us, and we have had great grass and have started to see a recharge in our local aquifers.

The one good thing about a prolonged drought is that it makes you really cut into your cow herd. That's exactly what we have done over the last seven years. In that culling process, we refined down on balanced cows that kept their condition and bred back year after year. As a result, we feel like our calf crops have become more consistent in performance and phenotype. You will see in this year's sale cattle very few performed as outliers; the whole group was very consistent at what we feel is a high level of performance.

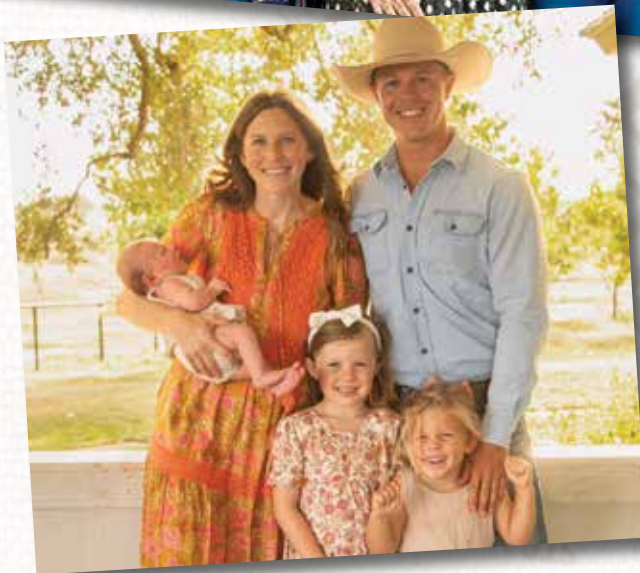

This year is also exciting for us because we get to release, for the first time, offspring out of new young sires. Some are genetic outcrosses from breed-up programs, some are offspring of proven herd sires in the breed. Either way, we hope you find what you are looking for and are excited for the opportunity to present to you these cattle.

God Bless,
Hefte Ranch

Real time bidding & proxy bidding available.

Docility Score Descriptions

Score	Description
1	Very Comfortable- Bull stands quietly when evaluated.
2	Comfortable- Bull slowly walks when evaluated.
3	Uncomfortable- Bull walks faster when evaluated.
4	Nervous- Bull desires to return to herd when evaluated.
5	Very Nervous- Bull is aggressive when evaluated.

**The above scores are presented as an additional tool to assist in the selection process, but all bulls may act differently in new/different situations/locations.

LOAD OUT

Load out to begin after completion of the sale. The purchased animal is the sole responsibility of the buyer, but the sellers agree to maintain and care for all animals through Monday, October 19, 2026 at no additional cost. The seller is not responsible for any injury or loss after the animal is sold. If other arrangements are needed then those must be agreed to before the sale.

TRANSPORTATION

We have arranged professional hauling services to be available sale day for buyers needing animal transportation. Central ranch drop off locations across the eastern United States and Texas can be coordinated. If you have any questions or need transportation assistance please contact Darrell Pitchford, 903.388.2288

HEALTH PAPERS

Health papers for interstate shipment within United States will be provided for all animals.

SIGHT UNSEEN PURCHASES

All purchases made on order or through the internet are 100% satisfaction guaranteed upon delivery.

We are again bringing a pair from the heart of our herd. H11 is a beautiful, well balanced cow with a perfect udder and teat structure. She has raised multiple high quality calves for Hefte Ranch maintaining a 376 day calving interval while producing five calves, including two bulls (L20 and N33) who have sold in Tried&True. We can easily see her in a high quality donor program. We value consistency and quality in cows and we are proud to offer her as an elite offering.

HEFTE RANCH P94 is a potential young herd sire. He has a lot to prove still, but he is off to a great start. His phenotype is sound, he's gentle, he has good muscling, and solid EPDs. His dam has a great calving interval, and is a consistent high quality producer. His sire, HEFTE RANCH L07 is a top young Herd Sire for Hefte Ranch. We think this bull is in a great position for the next level of development.

017/P is a daughter of our Power Surge 117/K2 bull who is a result of an embryo package we bought from the Creech Family in the Houston Super Sale several years ago. His dam 117-5 is one of Creech Farms' most powerful females. I would not be surprised if this female ended up in the donor pen at some point. 017/P has 7 EPDs ranking in the Top 40% or better and indicies of 40-40-40.

Strait Ranches to retain 1 flush guaranteeing a minimum of 6 embryos.

NS to GC King Sancho (20240855) from 4/1/16 to 8/1/26.

GCR 202 is a daughter of Surge 4/19. Her dam goes back to Red Doc Dinero, Hatchet 150 and Gray Oaks Polled Chief. 202 has had 3 March heifer calves with a calving interval of 375 days. She has 7 EPD traits in the top 20% and indexes of 10-10-15. She sells bred back to GC King Sancho.

Heifer calf born 3-14-26 is a daughter of GO Never Fear 17 ET. He is an ET son of Red Doc Sancho's Never Before 1136 and Red Doc Ruby 4105. He now resides at Red Doc Farms.

LOT 5 AND 5A

LOT 6 - HEFTE RANCH N08

Hefte Ranch purchased N08's sire in the 2024 T&T Sale. This is one of the first offspring out of SR VISION 30/K10 and the first female to be offered for sale. Her pedigree speaks for it's self - top and bottom. You have proven performance, longevity, and fertility across multiple generations. She represents Tried & True in every aspect. It is hard for Hefte Ranch to let go of a dark cherry red, broody female of this quality - don't miss this elite opportunity.

**Palpated 4 months bred on 08/19/26. We feel confident that this heifer is bred to AI Sire, RED DOC NEVER SANK 5012*

LOT 17 - SR MS ROSCO 253/M

We are excited to offer this daughter
of the CF Rosco 075 bull. We love Ros-
co's pedigree and offspring and were
honored when we had the opportu-
nity to lease him last spring. 253/M's
dam, 253/J2, is a full sib to Thomas
Burnett's super donor, 253/J. 253/J2
has a 370 day average calving inter-
val after 3 calves. 253/M has 7 EPDs
ranking in the Top 35% or better high-
lighted by Top 10% WW, YW, TM &
CW EPDs.

N92 is a HEFTE RANCH K20 daughter. We have been using K20 as a heifer bull in our program with outstanding success. N92's EPDs are incredible, her genetics are elite. She is the product of us turning up the heat on the next generation of Hefte Ranch animals. This heifer is simply irreplaceable in our minds. AI'ed to a low BW Red Angus bull.

*Palpated 4 months on 08/19/26. We feel confident this heifer is bred to AI Red Angus Sire, DUFF RED BLOOD 18114.

What a beautiful dark cherry red heifer out of HEFTE RANCH K34! This heifer has great EPDs and a phenotype that I wish we could stamp out time after time. Her top side is new breed-up genetics and her bottom side is well proven in the pasture. The best part - she is back to qualified as purebred so all the work is done. Take her back to your elite program and let the outcross genetics work for you.

AI 05/03/26 to RED DOC NEVER SANK 5012 with Heifer sexed semen. NS to MR WF 2033 MR WONDERFUL (20222994) from 05/15/26 to 08/19/26.

HEFTE RANCH N80 is out of what of the most fertile cow lines we have ever seen. Her grand dam, Harris Farms 37/8 would breed if a bull even got close to her. She was a moderate cow that consistently threw low birth-weight calves, we lost her to old age last year, but not before she produced 14 calves with a 367 day CI. N80's dam, L37 started her career the same way taking to the first straw of semen we AI'd her with. And now N80 appears to have conceived with her first AI. This heifer has very unique pieces, use them to your advantage and make something special.

*Palpated 4 months bred on 08/19/26. We feel confident that this heifer is bred to AI Sire, RED DOC NEVER SANK 5012 with heifer sexed semen

N56 comes out of the Z01 cow line on her dam's side. Her dam, J56 has a 359 day CI with 4 calves produced, her granddam (G21) maintains a 348 day CI after 6 calves and great granddam Z01 has a 362 day CI with 13 natural calves produced! There is a LOT of fertility and longevity in these females. Value comes in a lot of different ways, but if she's not raising a calf every year you can't capture it. This cow family has the most economic value of any in the Hefte Ranch program.

We have used the Conquistador of Briggs 1524K11 bull owned by Zajic and Mattingly Farms heavily in our AI program. We are offering some of his top daughters in this sale. This heifer is out of SR 132/6 who is an own daughter of LJV Mason 0/72 and has a 366 average calving after 8 natural calves. As a yearling 132/M3 scanned a 5.073 IMF (113 Ratio). 132/M3 has 9 EPDs ranking in the Top 45% or better.

This fancy Conquistador daughter is a maternal sib to the SR Advantage 5235/J herd sire owned by Double G, S3 and us. We originally purchased Conquistador semen as we thought it would perfectly compliment the EPD profile of KR Catalyst daughters and it has worked as planned. Her dam, SR 88/7, has a 363 day average calving interval after 8 calves. 5235/N's EPD profile is incredible with all 12 EPDs ranking in the Top 50% or better.

FC 8/5 (20257037) is a daughter of SR Crossfire 621/J13, who was co-high selling bull in the 2023 Tried and True Sale. Her dam is Harris Farms 724C2 and she has been a great producer and donor for us. She sells 75 days bred to FC Raider 75/4 ET (20245608). He is a son of 777 411 Vegas and our top donor FC Dusti 37/7. 8/5 is coming out of our show string and has had a successful show career. She has 10 top 25% or better EPD traits. Indexes 10-5-15.

AI 5/12/26 to Wendt's Steamboat 9852 (20230228). NS to BSR Trust Fund (20242246), a Valedictorian son. DNA pending.

O/X Lexi 955 is an extremely well-balanced female that travels with ease and stands on a solid, functional structure. Her pedigree combines proven genetics, going back to Hefte Ranch H130, a KR 191/13 son, on the top side and O/X 891 on the bottom. Her maternal pedigree is backed by strong Strait Ranch influence, including SR 30/F6, SR Arkoma 30/0, and KR Catalyst 531/15. 955 sells halter-broke and ready to go to work in your herd. Backed by proven Hefte Ranch and Strait Ranch genetics, she brings together phenotype, pedigree, and functionality in a balanced package with the potential to generate value for years to come.

LZDR Scarlet Belle N38 "Belle" is a standout daughter of MR WF 2033 (Kevin), one of the high selling bulls at the 2023 Tried & True Production Sale, and Hefte Ranch L51 who boasts a top 35% EPD profile in 9 categories. This heifer is gentle while combining an attractive phenotype with top tier set of EPDs. Belle is a feminine, structurally sound female with the depth, body and eye appeal to compete in the show ring. Belle is halter broke and would make an outstanding junior show prospect. Whether you are looking for your next show heifer or a front pasture replacement female, this is the kind to build a program around.

It's an honor to be able to put a female in Strait Ranches sale but this is one that I had as a keeper and on the no sale list. Here's one that combines the kind of pedigree, look, and genetic backing we strive for at Pitchford Cattle. PC Miss Nevaeh 862/N is a May 2025 daughter of SR My Friend YN 7/20 and out of Miss Grandview 862. Her pedigree is stacked with proven genetics, tracing back to both Strait Ranches and King Ranch. Nevaeh is a balanced, complete female with the kind of maternal look and structural quality we believe will only get better with time. With proven genetics on both sides of her pedigree and the added consistency of a natural mating, we think this female has plenty of potential both in the show ring and, more importantly, when it comes time to put her into production. Buy with confidence—this is the kind we're proud to put the PC prefix on.

TB Crossfire 555N is sired by SR Crossfire 621/J13, a son of Marksman 33/19 and a trait leader for Marbling. Her dam, QVH Ms Capone 555H, is one of our top donors and is also the dam of TB Hard Candy 555N2 ET, our consignment to the 2026 Purple Reign Sale. Coming straight from the heart of our replacement program, 555N ranks in the top 30% or better for 10 EPD traits and posts impressive 10-10-10 index rankings. She sells open.

It is extremely rare to get a female that possesses this elite of a genotype while maintaining a striking eye-catching phenotype! 6 traits in the top 5% of the breed, including top 1% in WW, YW, CW and Marbling along with indexes of 1/1/1. She has 9 traits in the top 20% of the breed. If you are looking for a donor to take your operation to the next level, don't miss this opportunity.

Wendt Ranches Partners is retaining 2 aspirations resulting in 6 transferable embryos each unless she sales for \$25K or more.

Dawson Moran and CF Cattle Company are excited to offer Miss CF 632 in the 2026 Tried & True Sale. This young, open heifer is stacked with the best of both CF and Strait Ranches genetics. She is a structurally sound, deep, long-bodied, feminine female that is already started on the halter. Her sire is Mr. CF Rosco 075 who was sired by Strait Ranches SR 83/7. Miss CF 632 will make a great show prospect, but more importantly will be a key breeding, foundation piece to any herd.

We can't say enough about the importance of consistency in a pedigree and selecting females that not only show, but go on to be productive brood cows. This stout-made future donor prospect brings added muscle, mass, body, eye appeal and extension. A true money-making female backed by a pedigree that speaks for itself. Sired by LJV Mason 072, one of the foundation sires at Strait Ranches and out of a dam SR 36/6 that is a maternal sister to SR Hazel 23/7, this makes this Mason daughter 3/4 sibling in blood with Hazel-a powerful genetic combination that has influenced herds across the country. A female with the look, build and genetic power to make an impact long after the show ring. The kind of female we believe can become a cornerstone donor and a true asset to any program. Circle L reserves the right to 2 flushes guaranteeing a minimum of 6 embryos per flush at sellers' cost and buyers' convenience.

This young heifer is a super clean made polled powerhouse. She comes from proven genetics both in the pasture or walking on a halter. The extension in the neck, along with the extra muscle in the hind in complement this heifer very well. Whether you are looking for your next front pasture female or show ring superstar, you will not be disappointed with P00.

NTR Paisley's Grace 36P1 is a polled, halter-broke female backed by some of the breed's most proven genetics. She combines tremendous body, capacity, femininity, structural correctness, and an outstanding set of feet and legs. Out of NTR Paisley 36/2, an International Champion and Reserve National Champion Female, and sired by SR Genuine 23/H, whose offspring have proven to be competitive at every stage of the game. This mating is already making its mark, with full siblings earning multiple wins. Built with the quality to compete today and the genetics to become an elite donor cow tomorrow, we believe Grace has all the pieces to be something special. Last year's heifer from this sale went on to have great success for the Ware family, and we feel this female has the same kind of potential. Don't miss this opportunity!

We offered this heifer's full sib in last year's sale, and this heifer proves the consistency in pedigree. A super fancy, well rounded, thick prospect with a little extra leather. This is the type of female we strive to produce. We definitely should be keeping females like this but want to bring the best we have to offer. The dam and sire continue to prove themselves in our herd. We have been extremely happy with our herd sire Hefte Ranch K28 bringing great calves and consistency each year.

LOT 105

LOT 112 - HEFTE RANCH N02

HEFTE RANCH N02 is a combination of two of Hefte Ranch's top bull producing cows, and our top young herd sire, HEFTE RANCH K18. His dam, HEFTE RANCH E16 is a donor in our program and has consistently produced more top end bulls than any female we have ever raised. Her offspring include HEFTE RANCH K20, a leading bull in our program and HEFTE RANCH M27, who was sold to Briggs Ranches in last year's Tried & True Sale. N02 is a bull that will capture your attention. He is sound made, powerful, and gentle. He has a very balanced set of EPDs from growth to milk and carcass. What more you could want in a herd sire?

LOT 113 - HEFTE RANCH N22

HEFTE RANCH N22 is one of the most elite EPD bulls we have in this sale. His dam, HEFTE RANCH H63 dominates with all growth traits ranking top 1% of the breed for weaning, yearling and maternal. She is also top 1% for REA and 2% for marbling. N22 himself has performed to our expectations. When you see him in person you will appreciate his style, shape, and incredible muscling. He is also smooth polled and dark cherry red.

LOT 113

LOT 118 - SR FLASHFIRE 5210/M

5210/M is a SR Crossfire 621/J13 son out of the Cherokee 9ET1 donor cow. This bull stacks true impact performance sires like SR Marksman 33/19 and Harris 257. He had impressive performance ratios of 110 WW, 105 YW & 109 IMF. 5210/M has 10 EPDS in the Top 40% and indices of 2-3-4.

LOT 119 - SR SKYLINE 207/M3

207/M3 is a really cool combination of genetics combining top performing Red Doc and King Ranch bloodlines. His dam, the KR 207/17 donor, has a 360 day average calving interval after 7 calves. 207/M3 had a 118 IMF ratio when scanned as a yearling. 207/M3 has 10 EPDs ranking in the top 50% or better.

LOT 119

LOT 120 - HEFTE RANCH N18

You can always count on Hefte Ranch to have a stout horned bull in the offering. Maybe its just us, but there is something special about that traditional Gert look! HEFTE RANCH N18 is deep-bodied, dark red bull out of SR VISION 30/K10. He is the only Vision son we are letting go of this year. He is thick made and very gentle. N18 combines two cow lines that are the very best of Hefte and Strait genetics; HEFTE RANCH Z01 and SR ARKOMA 30/0. If you want the type of deep Tried & True quality that created this sale, here it is.

LOT 121 - HEFTE RANCH N20

HEFTE RANCH N20 is an own son of HEFTE RANCH Z01 and sired by HEFTE RANCH K20. His dam, Z01 is a matriarch legend at Hefte Ranch. If SGBI institutes a LEGACY cow program, she would be our prototype. She had her first calf at 23 months of age and has produced a natural calf every year since then. She has a 362 day CI with 13 natural calves, and also 9 ET calves! HEFTE RANCH N20 has an awesome rugged muscular look, there is no question he is ALL bull. He is so gentle we couldn't get him to stop and look alert in the picture pen, he just put his head to the ground trying to sniff out the heifers that had been in the pen before him. He has great milk and maternal EPD's as well as very balanced growth and carcass EPD'S. Z01 has left a legacy at Hefte Ranch, but there won't be many more chances to take home an own son.

HEFTE RANCH N70 is our sleeper bull of the sale. He is the youngest bull we have but it didn't hold him back. He has incredible cow families on top and bottom. He has the same look and style as the KR 191/13 bull but the performance ability of the HEFTE RANCH F14 bull. This bull genuinely brings together some of our best. He is very gentle, big boned and has that dark red color we all love.

O/X 965 brings together genetics that have already proven their value in the O/X Ranch program. Sired by HEFTE RANCH H130, O/X 965 is another example of why H130 has proven to be such a valuable addition to the O/X Ranch program since his purchase through the 2021 Tried & True Sale. On the maternal side, his dam, PASSION FARMS 3003, traces back pedigree to RED DOC SCARLET 9013 and NEVER BEFORE lineage adding proven genetic lines to his pedigree. O/X 965 is a powerful, masculine bull with plenty of depth, substance, and the herd-bull presence we look for. He combines an impressive phenotype with a pedigree built on genetics we know and trust with 5 EPDs in the top 35%. O/X 965 is backed by proven cow families and generations of purposeful breeding.

You are looking at a true tried-and-true product. O/X 945 is a testament to the Strait Ranches breeding program, combining the proven genetics of SR WS WICKHAM 249/L and DP MR CHOSEN 038/J2. His dam, SR WS WICKHAM 249/L, was a highly sought after female and one of the high-selling females in the 2024 Tried & True Sale. 945 is proving exactly why we invested in this genetic line. He brings a powerful pedigree backed by a balanced set of numbers, posting Indexes rankings of 30, 20, and 40. With proven genetics on both sides of his pedigree, O/X 945 has the foundation and genetic potential to step into a program and go to work as a herd sire.

30/M12 is an own son of the original Copperhead 214. I worked for Lamar Kelly (Southern Breeze) when he purchased 1/2 interest in Copperhead from Tinney Farms and have always liked the bull. His dam, 30/H1, is a full sibling the SR Paramount bull that Reese Ranch owns. 30/M12 ratioed above average for WW, YW, REA & MB. His dam, 30/H1, has a 362 day average calving interval after four calves. 30/M12 has an impressive 10 EPDs ranking in the Top 40% or better.

HEFTE RANCH N30 is as muscular of a bull as we have ever raised. This K18 son is as wide as he is tall. His dam is a big, pretty KR 191/13 daughter with a 353 day CI. N30 has a very solid EPD profile to go with his impressive pedigree and phenotype. Not sure you can find a purebred thicker made than N30, he will definitely add some volume to your calf crop.

Heffe Ranch will retain 25% interest for in herd semen use only.

O/X 959 embodies proven genetics that have made an impact throughout the breed. Backed by HEFTE RANCH H130 and SR MS GENESIS 249/J, this young bull brings together a pedigree built on genetics we know, trust, and believe in. His pedigree offers the kind of predictability that gives you confidence when making breeding decisions. O/X 959 is a well-balanced, functional bull with the genetic foundation to complement a variety of females.

We set out to make some half bloods for genetic outcrosses and calving ease purposes. We didn't expect that the mating would turn out this cool. HEFTE RANCH N77 has show ring style and head turning performance. We have used N77 to cover some of our own heifers at Hefte Ranch this year. He is a level 1 halfblood out of a proven RA Brown Sire. His dam is a first calf heifer that goes back to strong Hefte and Briggs genetics. N77 had a actual 64 lb birthweight on a digital scale and a 714 adj 205 day weight. He ratioed 122 for REA, 105 for IMF, and 104 for YW. Not sure what we are thinking letting this bull go!

Hefte Ranch set a goal to create purebred Santa Gertrudis heifer bulls that would take the stress out of calving season. This is our first offering of this project. HEFTE RANCH N68 is the offspring of a first calf heifer and had an actual birthweight of 68 pounds on a digital scale. He is a moderate made bull which is expected with heifer bulls, this should also allow you to use him for a longer period of time. We believe you can use this bull with confidence, we would not blink an eye to use him in the Hefte Ranch program.

If you are looking for a heifer bull, look no further. O/X 950's low birth weight makes him an attractive option for use on heifers, while his moderate frame, added depth, and natural eye appeal complete the package. He is a stout-made, balanced bull with the kind of shape and presence that catches your eye while remaining practical in his design. His dam, SR 27/4, has earned her place at the top of the O/X Ranch cow herd, leading the way in progeny sold and continuing to prove her value through her offspring. SR 27/4, has produced 11 calves and is still producing quality calves with a calving interval of 366 days going on 13 years old. O/X 950 combines calving-ease potential, phenotype, and a proven maternal foundation into a bull designed to go to work.

O/X 966 is backed by generations of proven Hefte Ranch genetics. Sired by Hefte Ranch H130 and going back to Hefte Ranch L38 on the maternal side, 966 offers a pedigree stacked with genetics that are proven. This young bull pairs that strong genetic foundation with a balanced set of numbers, ranking in the top 30% of the breed for five EPD traits. With proven genetics behind him and performance on paper, O/X 966 offers the predictability and potential we look for in a young herd-sire prospect.

This El Hombre son is out of a Strait-Hefte partnership cow, 5369G4, who is listed on the proven dam trait leader list for marbling. 5369G4 has a 363 day average calving after 6 calves. 5369/N was above average for both weaning and yearling and has exceptional REA and IMF ratios of 114 and 128 respectively. 5369/N has 8 EPDs ranking in the Top 40% or better.

TERMS & CONDITIONS

BIDDING

Each animal will be sold to the highest bidder without reserve. The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.

TERMS

Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the seller to see that animals are fed and cared for until loaded for shipment or until Monday, October 19, 2026, whichever occurs sooner.

CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the purchaser for each registered bull or registered female once proper settlement has been made.

HEALTH

Health papers for interstate shipment within United States will be provided for all animals.

ANNOUNCEMENTS

Any changes from the information of any kind in this catalog will be provided in a sale day supplement sheet or announced from the auction block and such information shall take precedence over cataloged information.

BREEDING GUARANTEE

All animals are guaranteed to be breeders with the exception of: a) calves under 12 months of age; b) animals shown by purchaser after sale in which the guarantee (if any) shall be between the seller and the buyer; c) injury or disease occurring after the sale; d) gross negligence or willful misconduct on the part of the purchaser; e) death by any reason.

Any bull which either a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month trial (provided for in the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder. All partial interest bulls are guaranteed to produce freezable quality semen.

Safe in calf females have been examined by competent personnel and are so guaranteed. Exposed females have been exposed but are not guaranteed to be safe in calf. Open females have not been

served and are so guaranteed.

PREGNANCY DETERMINATION

The females in this sale noted safe in calf have been determined pregnant by physical palpation. Our best estimate of service sire will be given in the case of the females with both an A.I. sire and a natural breeding sire.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

The following adjustments do not preclude the right of the Purchaser and Seller to mutually agree upon other terms and conditions for settlement of any dispute. All claims for adjustment or refund must be made in writing either within six (6) months from the date of sale or no later than when the animal reaches 24 months of age, whichever occurs later, with the exception of claims involving parentage or defects. All returns or refunds will be paid in the form of a replacement animal of similar quality or in credit for use on any products marketed by the seller. a) This credit will be limited to the purchase price less the salvage value of the animal.

1) In the event an animal is claimed to be a non-breeder, the animal may be returned to the ranch of the Seller, at Purchaser's expense, if in good physical condition, and the return is in compliance with the health requirements of the Seller's state. The Seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove that the animal is a breeder. If at the end of six (6) months, the Seller is unable to prove the animal is a breeder, the seller shall, at the option of the Purchaser, replace the animal with another of similar value or grant the Purchaser a credit on any products marketed by Seller. Either of these options shall be deemed full satisfaction and settlement. If the Seller proves the animal to be a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expenses incurred for transportation. 2) If a registered female sold as "safe-in-calf" proves not to be in calf (by the projected due date listed in the catalog or sale day supplement), the Purchaser may receive service from the bull previously used, if available or if the bull is not available the Seller shall be obligated to credit or refund the Purchaser \$400. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe-in-calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to reimburse the Pur-

chaser up to \$600 (adjustments shall not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf). This does NOT apply to any female exposed to more than one bull via artificial insemination and/or natural service. Any expenses incurred for transportation shall be the responsibility of the Purchaser. 3) If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the ranch of the Seller prior to calving for a credit of the full purchase price or for another animal of similar value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

If a bull is sold and at a later date proves not to be eligible for registration under association rules, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.

If an animal is sold and through DNA is proven to have incorrect parentage as represented by the certificate of registration, and for which the parentage can be determined, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.

CONSIGNMENTS

Strait Ranches and Hefte Ranch are not responsible for the health, soundness, and breeding of consigned animals. Consignors bear all responsibility for animal consigned.

RIGHTS AND OBLIGATIONS

The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding on both. Other than the guarantees and warranties stated above, no other warranties or guarantees are expressed or implied. Each sale or resale of an animal constitutes a separate transaction.

LIABILITY

All persons who attend this sale do so at their own risk. The owners or any other person connected with the sale assumes no liability, legal or otherwise.
