# Phyn Plus

Smart water assistant + shutoff

# Your water like you've never seen it.

## Fingerprinting your fixtures

When you flush a toilet, take a bath or water your lawn, the pressure in your pipes change. Phyn measures this change to fingerprint the unique profile of each fixture in your home. So when you run a faucet, Phyn knows it's a faucet. And if that faucet leaks, Phyn lets you know.

## Meet Phyn Plus.

A single connected device that is installed on your home's main water line that can find a leak anywhere in your plumbing system and shut off the water automatically. Phyn Plus monitors your water use to help you conserve and save.

## We Speak Water

"Phyn gives me the peace of mind that if a leak happens or something breaks down, I'll know about it before it becomes a disaster."

**Julie W. — Seattle WA**

"Phyn alerted us to several leaks within minutes including a relatively large leak when an old sprinkler valve was malfunctioning. We've had a fantastic experience with Phyn so far."

**Payam M. — Vaughan, ON**

"Phyn was able to detect numerous failures that we would have never known about, had their system not alerted us. Great for the pocket book and the environment."

**Ben F. — Orlando, FL**

"Phyn has given me the control I need to feel secure about my home..."

**Chase M. — Katy, TX**
