

# Finn the Horse

*Written by Melissa Shelton*

Sometimes our needs are simple. For the horses it may be the Knox Gelatin for our special homemade “Jello Shots” that help improve hoof quality. Especially for Finn. He is pictured below and has some of the worst hoof quality we’ve ever worked with. But we are making strides!! With Gelatin and now a new ration balancer trial we are seeing slow improvements!

Finn is a draft cross was all we were told when we adopted him. And he's a paint. He's a gorgeous big boy!
