Hospital & Physicians
Collaborative

PRECISION HUMENSA MIS (PH-TIMS) – COMPLIANCE = REWARDS!

Quantum Technology,
Management & Intelligence Solutions

MISSION STATEMENT

To work collaboratively to streamline and expedite care driven by validated and documented medical necessity in the most compliant, efficient, and appropriate care escalation pathways possible.

Through an exclusive partnership with [Precision Healthcare Technologies \(Virtual Tour Overview Link\)](#), we have access to proprietary technologies and processes that connects 17 sectors of healthcare and consumer health. Their documented medical necessity driven by complete patient health records means fewer delays in care delivery and/or claim denials.

On June 25, 2025, Precision entered a 50/50 JV with Milliman to, for the first time in history give consumers and patients access and control of their own health records. These tools combined with our PH-TIMS leadership team's expertise benefit all partners far beyond the realm of these collaborative projects. We also need YOU and your practice to win so the patients can!

The [Precision Stealth Workflow Intelligence](#) navigates compliance mandated treatment and streamlines management resources in care coordination. This means no dropped balls and maximizes efficiency. It also automatically counts and tracks the value of work and expense units based on complexity of the different sector's medically necessary orders. This is the basis for your management to offset earnings.

Our Precision Humensa Superpower

– Suite of 12 Services for Rural and Small Hospitals –

ALL of these will generate shareable management fees.

BACKGROUND

Since 2007 Precision has helped to architect and build value-based measurement and management platforms with CMS/Payers. These algorithms are not in any EHR or dataset, and the only master structure for all payers resides within Precision's platforms. We know your grade and will fix it!

ABOUT OUR PROGRAM & STRUCTURE

- ① PH-TIMS creates professional and collaborative opportunities for healthcare and hospital support over many sectors to offset their project and staff management efforts.
- ② Understanding that most of these contracted providers have other practices or jobs, we offset those collaborative management costs with our simple Healthcare Management Company – HCM. Therefore, there is no investment requirement.
- ③ These internal and external staff management and coordination costs are unavoidable and separate from the professional contract for services. Providers should not bear that loss alone.
- ④ Like an MSO - Management Service Organization, the providers may own up to 40% of their own separate sector management entity.
- ⑤ PH-TIMS as the Managing Partner owns 60% and bears all responsibility and liability for management strategies and decisions.
- ⑥ The rules and expense rates assigned by sector for management responsibilities will vary depending on the service. Example – More complicated or comprehensive services may or will require preauthorizing or possibly program enrollment where others will not.
- ⑦ Unlike an MSO there are no Stark or AKS issues because under your hospital contract you are not generating or referring the patient, are being paid a flat rate by contract for your professional services, do not share in hospital or professional fees, nor any other direct or indirect compensation based on visit or encounters, etc.
- ⑧ Your potential HCM distribution, intended to offset management expenses, is based on the hospital's fair market value for management services, and number of total professional hours you were compensated for, and will vary from month to month based on gross management revenue.
- ⑨ Like an attorney or CPA, the more hours worked means more "Work & Expense Units," and you will receive your proportionate share for the total work that you completed.
- ⑩ Precision will use their AI triage, care coordination, and navigation to ensure the very best compliance for both the project, and the participating provider's practices or employers. Most individual providers are missing between \$250K and \$350K in compliance mandated services where medical necessity was found and the provider failed to act. Precision gets this for your practice and avoids these pitfalls for our collaborative project.
