

# WHO IS PRECISION AND WHY WORK WITH US?

PRECISION  
Value Based Management

**PRECISION's One-of-a-Kind Proprietary Technology** identifies care and compliance gaps, then provides the care coordination and compliance steps required based on the CMS Standard of Care. PRECISION then goes one step further by interweaving all other measuring metrics such as MACRA/MIPS/STAR/HEDIS/QCM. PRECISION's platform is also able to pivot by payer to any of these desired measures. No integration is needed, nor will the provider ever even login or see our system as we operate in the background away from the staff and office workflow. By leading with our technology, we are able to save millions of dollars in labor by simply electronically triaging those higher risk patients needing to see their provider, while continuing to manage the healthier ones remotely. This allows us to focus our labor dollars on specific high touch encounters.

**PRECISION's Virtual Support Network (VSN)** is a national network of healthcare professionals consisting of physicians, PAs, NPs, MAs and health coaches that allow providers to extend their office staff and bandwidth without upfront cost to the practice. At a time when it is difficult to find or retain staff, much less find the resources to pay them, PRECISION literally has tens of thousands of these VSN professionals. Once they complete the medically necessary tasks remotely on behalf of the provider, the results and notes are simply dragged and dropped or uploaded into the EHR. All work is then submitted as a superbill directly into the provider's gateway clearinghouse on their behalf, along with all notes and documentation required to support the claim.

# TEN REASONS HEALTHCARE EXECUTIVES ENGAGE PRECISION

1. **PRECISION** starts by showing exactly how CMS currently grades each provider and identifies what mandated services and revenue are missing for Fee-for-Service beneficiaries.
2. **PRECISION** maximizes compliance and revenue in the Medicare Fee-for-Service world by providing medically necessary services in the background away from the practice workflow.
3. **PRECISION** results are uploaded or dragged and dropped into the provider's EHR with no integration needed.
4. **PRECISION** also specializes in Medicare Advantage (MA), Accountable Care Organizations (ACOs), and Medicare Shared Savings Programs (MSSPs). PRECISION'S Risk Sharing Specialists (PRSS) division, is directed by our C-level executive, a former market president for one of the largest and top MA plans nationally with over 15 years of direct experience turning around failing MAs and ACOs. PRECISION's PRSS division has taken this knowledge and expertise a significant step further with sophisticated algorithms that our technology automates allowing for a much greater impact. This is how PRECISION assures even greater success.
5. **PRECISION** also targets and provides metrics and engagement on commercial, self-insured, or cash pay patients/beneficiaries as well.
6. **PRECISION** has four technology/patient engagement offerings to choose from. Many clients use all four offerings depending on their specific payer mix.
7. **PRECISION** has a one-of-a-kind Series LLC through PRECISION Risk Share Cooperative that allows PRECISION to break out providers based on risk preferences, provider performance, and patient complexity recognizing the risk these patients present to the success of these programs.
8. **PRECISION** works with underwriters and sponsors such as Assar, Wellvana, Humana MA, Centene MA, BCBS, BCN+Risk, Priority Health MA, Sedara, and growing. PRECISION through these offerings are able to place providers under the groups/umbrellas so that providers either isolate their risk or allow them to maximize shared gains by not having them dragged down by poor performers.
9. **PRECISION** provides four individual revenue silos to providers: a) Fee-for-Service, b) Capitation, c) Shared Risk, and d) Provider Compliance Rewards which are group discounts and incentives that are applied back to the bottom line of the Series LLC entities.
10. **PRECISION** traditional services have no upfront cost, and nothing is owed until after insurance pays.

## Please click the following links for more information;

- [Precision Value Based Management](#) will provide you with a library of service summaries in short and concise program descriptions.
- [Precision Value Based University](#) will provide you a glimpse into our technology training platform where all of our Virtual Support Network providers begin our certification process.
- [Precision Healthcare Technology](#) offers a broad overview of our current and developing proprietary assets including blockchain and our own cryptocurrency token, HLX (Health Life Exchange) tokens. We believe that HLX will become the preeminent cryptocurrency in healthcare.
