

PROVIDER PERFORMANCE IN 2022 MATTERS

IDENTIFICATION OF GAPS IN CARE

- Proprietary analytics shows exactly where you stand in the eyes of Medicare
- Unique insight on performance shows what is missing by patient and how to address

ADDRESS GAPS-IN-CARE

- Many tasks require many resources
- “Virtual Support Network” extends capabilities
- PVBM takes on all risk, we do not get paid until you do

Precision Value Based Management (PVBM) is uniquely positioned to assist you with the highest compliance. PVBM owns the technology that grades, ranks, and scores your practice to CMS standards. The result is increased patient engagement, compliance and the revenue that comes with it.

HOW DOES CMS VIEW YOU

What mandated services and reimbursement are you missing and will you be penalized for not taking it?

INCREASE YOUR REVENUE

On average, PCPs are missing \$540K* annually in mandated services based on medical necessities.

ENGAGE PVBM'S VIRTUAL SUPPORT NETWORK

PVBM's "Virtual Support Network" is a natural extension of your practice's normal workflows.

IDENTIFY/REDUCE GAPS-IN-CARE

- Higher Patient Engagement
- Increase Billable Revenue
- Reduce Potential Penalties
- Position for Increased Rewards

COLLABORATIVE MODEL

- You define how we work with your team
- Flexibility to adapt to your organization

* Based on 300 Medicare patients with an average of \$150 in missed mandated services per beneficiary per month.

PRECISION
Value Based Management

How Precision Value Based Management Supports the Quadruple Aim

Through one-of-a-kind SaaS and integration with virtual patient care resources, the Precision Value Based Management (PVBM) platform directly improves each component of the Quadruple Aim: Increased Quality of Care, Improved Patient Engagement/Service, Enhanced Financial Stewardship, and Provider Wellbeing/Support.

- **Increased Quality of Care** by directly assessing and highlighting gaps-in-care at the individual patient level as required by CMS. Only PVBM has the intellectual property that grades to the CMS Standard of Care expectations in order to measure gaps-in-care and to assess clinicians' standards of care. These measures are national standards directly linked to patient diagnosis, nationally adopted and proven clinical workflows, and best-practice clinical intervention and treatment.
- **Improved Patient Engagement and Service** by leveraging PVBM's best-in-class technology to communicate directly with patients (as an extension of the physician practice). This proactively engages patients to address any identified gaps, and to ensure the overall care experience meets and exceeds patient expectations.
- **Enhanced Financial Stewardship** through full realization of revenue earned by closing care gaps, documenting appropriately for all care provided, and proactively capturing quality care bonuses while avoiding revenue penalties. This enhanced financial stewardship posture results in substantial economic benefits for provider groups that engage PVBM services.
- **Provider Wellbeing and Support** by offering PVBM's Virtual Support Network (including fully vetted and credentialed Nurse Practitioners, Physician Assistants and Medical Assistants) as a natural extension of your practice to provide the resources necessary to close all patient care gaps *without the practice having to hire additional staff members*. These services are provided at zero up front costs, and only reimbursed to PVBM when the provider group is paid for patient services rendered.

To learn more about how our technology works to improve healthcare, please visit our [Precision VBM University](https://precisionvbmu.com) website (precisionvbmu.com) where our Virtual Provider Network (VPN) goes to begin training on our platform.
