

# CARBON<sup>375</sup>

## WHEAT BENEFITS

Cleaner, larger leaves  
Moisture retention  
Faster metabolism

## HOW IT WORKS

CARBON375 is a carbon based delivery system with a negative charged carbon particle that offers higher conductivity to the plant with superior drift performance. Negative charged nano carbon provides excellent suspension of tank products with 30% more delivery into the leaf.

CARBON375 replaces MSO and other crop oils.

## CAN BE ADDED TO

Nitrogen 6-8 oz per acre  
Herbicides 6-8 oz. per acre  
Fungicides 2-3 oz per acre  
Insecticides 2-3 oz per acre  
Nutritional 6-8 oz per acre

- Add to herbicide pass for better weed control and faster recovery
- Add to fungicides and nutritional sprays for enhanced control and nutritional delivery
- CARBON375 carbon is pre-synthesized for immediate uptake and root development due to increased microbial activity
