

Our Company

V1 Solutions, LLC is an emerging Service Disabled, Veteran Owned Small Business that has a rich history of providing highly technical intelligence solutions to the United States Government. Our team has extensive experience delivering broad spectrum Intelligence, Surveillance, and Reconnaissance (ISR) support, as well as SIGINT collection, metadata analysis, and targeting to both Special Operations Forces and Other Government Agencies. We specialize in the development and delivery of custom training solutions to fit your specific requirements. We possess the flexibility to train in any environment, be it a traditional classroom, collaborative e-Learning environment, or in the field. After a thorough analysis of your capabilities and consultation, our specialists will develop and deliver a custom solution to maximize mission readiness. As a quality-driven, mission-focused enterprise, we only utilize the most up-to-date tactics, techniques, and procedures to maximize value to our customers.

Mission Statement

We strive to set the industry standard against which all others are measured. Our distinctive and value-added services are founded on our principles of customer loyalty and service, professionalism, and integrity. We are committed to exercising the highest moral and ethical standards in our business practices.

Core Competencies

Our employees are subject matter experts (SME) and provide superior services in the following areas:

<i>SIGINT Collection</i>	<i>FMV Sensor Operations</i>	<i>Intelligence Analysis</i>	<i>Linguistics Support</i>
<i>Systems Integration</i>	<i>Electronic Info Security</i>	<i>Open Source Intelligence</i>	<i>Secure Communications</i>
<i>Signature Reduction</i>	<i>Exercise Support</i>	<i>Red Teaming</i>	<i>JTAC/ITC Integration</i>

SIGINT Collection/Intelligence Analysis/Linguistics Support

Our team has over 35 years of experience providing both strategic and tactical SIGINT collection, analysis, and targeting support to various US Government programs. Strategically, we have provided real-time collection, translation, and direction finding of foreign communications in support of US-led efforts in the Global War on Terrorism. Tactically, we have conducted 3,000+ hours of SIGINT geolocation support to the F3EAD process on both manned and unmanned ISR airframes. Our collection of SME's stands ready to assist in any capacity to support your organization's intelligence needs.

FMV Sensor Operations

Our key leadership has wide-ranging experience supplying Full-Motion Video (FMV) support to both Conventional and Special Operations Forces units in multiple theaters around the globe. With many of our instructors having JTAC or ITC qualifications, our ISR SME's can provide your personnel with the most up-to-date TTP's from the field. Learn how to properly integrate FMV into your collection plan and identify the appropriate methodologies for processing, exploitation, and dissemination (PED).

Electronic Information Security/Secure Communications/Signature Reduction

Our SME's have developed and delivered USG-certified courseware in support of official Communications Programs of Record. Our technicians will train your personnel standard digital forensics countermeasures, encryption software, and data hiding techniques. We will highlight the vulnerabilities associated with unencrypted 802.11 Wi-Fi, cellular phones networks, and how to mitigate those risks. Additionally, our staff offers training in digital signature reduction, so a team of personnel can communicate securely while minimizing their overt signature. This training is perfect for personnel traveling to semi-permissive or non-permissive environments.

Exercise Support/Red Teaming

We possess experience supporting both small- and large-scale exercises. We have provided role-player and material support, logistics support, and a robust Red Teaming capability to maximize training and deployment readiness. Our Red Team personnel have utilized both physical and electronic surveillance TTP's to provide the most comprehensive exercise environment available. Upon completion, our SME's will provide a full debrief of the results.

Open Source Intelligence

Our cadre of instructors have been trained in the latest OSINT TTP's. We've utilized reports derived from OSINT collection in support of our exercises to highlight the importance of controlling the information that is put into the public view. Our instructors are able, using industry standard intelligence gathering systems, to provide both offensive and defensive use cases for OSINT collection.

Our Customers

Why V1 Solutions?

Best Value – We pride ourselves in providing the highest quality services at a highly competitive cost.

Global Mobility – Our employees stand ready to support wherever duty calls; stateside or OCONUS.

Relevant Experience – Our network consists of professionals who employ our nation's current TTPs.

Mission-Driven – We work alongside the warfighters to maximize probability of mission success.
