Alberta Chief Power Engineers Education Conference

2025 Conference Agenda

October 29, 2025
Facilitator: George Mitsopoulos

Time	Topic	Presenter
8:00-8:05	Safety Moment - Still Going Wrong - Process Safety Incidents	George Mitsopoulos
8:05-8:15	Welcome & Opening Remarks	George Mitsopoulos
8:15-9:00	Tube Metal Temperature	Kyle MacDonald
9:00-10:00	ABSA Update	Tom Leming
10:00-10:30	BREAK	
10:30-11:15	Automatic Self Cleaning Filtration Solutions	Jamie Burrows
11:15-11:45	Are you ready for a rental?	Shawn Brennan
11:45-13:00	LUNCH	
13:00-14:00	Keynote - ATB Financial Senior Economist	Sid Bhattacharya
14:00-14:45	LNG Canada Process and Business Overview	Murray Logan
14:45-15:00	BREAK	
15:00-15:30	Water Side Dynamics of a Power Generation OTSG	Kevin Dorma
15:30-16:00	Enhancing Operational Discipline to Support Process Safety	Nathan Phillips
16:00-16:30	Safe Handling & Shipping of Relief Valves	Cory Laurenson
16:30-16:45	Final comments and close	George Mitsopoulos

The Presenters

Kyle MacDonald, MBA

Vice President – Sales, Aircom Instrumentation Ltd.

Kyle MacDonald is a seasoned executive with a strong foundation in industrial instrumentation. With a 20-year career spanning field service, project management, and executive leadership, Kyle has built and led high-performing teams across technical sales, product development, and strategic growth initiatives. He holds a Master of Business Administration from Queen's University and currently serves as Vice President of Sales at Aircom Instrumentation. Kyle is passionate about helping engineers and technologists solve complex challenges through practical design thinking and customer-centric innovation.

Tom Leming

Safety Codes Officer, Education and Certification (Alberta Boiler Safety Association)

After a 6 year stint in the Oil and Gas industry Tom rejoined the Education & Certification department of ABSA, the pressure equipment safety authority in 2011. Tom holds a First Class Power Engineer's certificate of competency and during his previous time with ABSA served as the Senior Examiner for Alberta and the SOPEEC Coordinator for Canada. Tom's power engineering background originated in Manitoba where he spent 15 years working in Pulp and Paper. Tom has presented for ABSA at National Board seminars both in Calgary and in Edmonton as well as representing ABSA on a national stage. Currently Tom is the Lead Examiner for Alberta and the SOPEEC Coordinator for Canada.

Jamie Barrows

President, Process Water Solutions

Jamie Barrows is a seasoned expert in industrial fluid management, with over a decade of experience designing, implementing, and optimizing filtration, cooling, and water treatment systems for a wide range of industrial applications. Throughout his career at **Process Water Solutions**, Jamie has focused on helping businesses improve operational efficiency, reduce maintenance costs, and ensure compliance with stringent environmental and safety regulations.

Jamie's work has been instrumental in developing and integrating **automatic self-cleaning filtration solutions**, which are a cornerstone of modern, sustainable industrial operations. His expertise spans a variety of sectors, including oil and gas, mining, municipal water, and more.

Jamie holds a Bachelor of Science in Mechanical Engineering from the University of Alberta. He is passionate about helping companies harness innovative technology to solve complex fluid management challenges and is committed to sharing insights on how advanced filtration systems can lead to a cleaner and more efficient future.

Shawn Brennan

Chief Executive Officer, Silverback Steam Boilers & Heating Rentals

Shawn Brennan started in the Oil Field as a summer student at 15 years old and quickly decided to branch into an aviation career where he spent the next 10 years as a helicopter pilot. Shawn has been in the Boiler business for over 15 years and currently leads the Silverback Steam and Heating Rentals team. Silverback covers temporary heat solutions throughout North America and is redefining Steam Boiler and Heating Rentals across all industries.

Shawn has three simple rules – Plan to outperform, Overcome and challenge & never settle. Outside of Silverback Shawn enjoys the outdoors with his family including golfing, fishing, biking, and spending time at his cottage.

Sid Bhattacharya

Senior Economist, ATB Financial

Siddhartha Bhattacharya is a Senior Economist at ATB Financial. Siddhartha focuses on developing comprehensive forecasts and scenarios of Alberta's economy through the analysis of trends in the provincial, national and global economy. Before starting in his role at ATB, Siddhartha was an Economist at Alberta Treasury Board and Finance for over five years, where he led macroeconomic forecasting, modelling and impact analysis work as well as conducted research on current topics and trends for publication purposes.

Siddhartha is a seasoned professional with over a decade of experience in macroeconomic research and analysis. He graduated from the University of Calgary with a Master's degree in Economics and also holds a Master's degree in International Business from the University of Dundee, United Kingdom.

Murray Logan

Field Technician – Process, LNG Canada

Murray Logan was born and raised in Prince George, British Columbia, and now resides in Terrace. At 37 years old, he has built a solid career in power engineering. He earned his 4th class power engineering ticket in 2016 and has successfully completed all 3rd class testing. Currently, he is gaining the required steam time to obtain full 3rd class certification.

Murray's professional journey began with five years working for the City of Terrace in the local arena. He then joined Northern Health as a power engineer at Mills Memorial Hospital in Terrace. In 2023, he was hired by LNG Canada, where he works in the ISBL (Inside Battery Limits) area, which contains the facility's gas trains.

Kevin Dorma, PhD, PEng.

President, Kevin Dorma Consulting Ltd.

Kevin Dorma has been a Process Engineering Consultant in Alberta for 27 years and currently leads a tiny consulting company. He has been around utility drum boilers and OTSGs in petrochemical and SAGD facilities. Kevin has worked with a diverse set of processes, including natural gas liquids recovery and Cogeneration. He is currently involved with projects to convert waste plastic and municipal garbage to synthetic fuels. Non-professional interests include supporting Girl Guides by hauling camp equipment and helping with cookie sales.

Nathan Phillips

Nathan Phillips has spent his career working in various technical, operational, and sales roles within manufacturing, oil and gas, and mining. Nathan has worked alongside a number of the chief power engineers at these sites, and has experienced firsthand some of the challenges that exist with managing knowledge within their organizations.

Nathan has a degree in biochemistry, has completed his level 1 CFA, and calls Calgary home.

Cory Laurenson

Business Development Manager, Apex Valve Services

25 years of experience in the valve service industry specializing in failure mode identification and root cause analysis of API/Ansi/PRV's, preventative maintenance, technical support, training, and repairs/recertification of valves. As well as being a father, husband and avid outdoorsman, Cory has achieved a successful athletic career as a competitive sport shooter on a Provincial, National, and International level with multiple National level accolades and has represented Canada at the last two IPSC World Handgun Championships.

The Committee

Keith Greenaway - President

Mustang Energy Service and Consulting - mustangenergy.inc@gmail.com

George Mitsopoulos – Vice President

Pembina Pipeline Corporation – Gmitsopoulos@pembina.com

Kelly Perrott - Treasurer

Inter Pipeline – zoomer_17@hotmail.com

Timur Ibatullin – Director

IPE, Edmonton Branch

Les Anderson – Director

Building Operators Association – Canada - president@boacalgary.com

contact@heartlandexchanger.com
www.heartlandexchanger.com

**To increase your
thermal performance
time and time
again with
proper
solutions
and services**

www.heartlandexchanger.com

Your ultimate source for industrial steam, HVAC and water treatment products and solutions.

Since 1933, Preston Phipps has been providing products and services related to the optimization of steam distribution systems in addition to offering a complete line of valve, HVAC, air control, flow measurement and water treatment solutions.

Providing Delivery Solutions for Bulk Purolite™ Resins

As a Chief Power Engineer, you take safety seriously. You also know that proper operation and maintenance of your plant depends on timely product delivery.

Ecolab's dedicated truck fleet holds up to 800 ft³ of ion exchange resin for efficient, clean loading.

Our highly skilled customer service team and technical operators coordinate every detail of your shipment, making materials management easy, efficient, and safe. Plus, we deliver across Canada.

Benefits Include:

- Fast loading
- Reduced downtime
- Clean, direct transfer
- No packaging disposal / costs
- No space or storage issues
- Reduced labor costs

Available for demineralization resin, produced water softening resin, standard water softening resin, condensate polishing resin, organic trap resin and high-efficiency Shallow Shell™ Technology resin.

Turning Your Challenges into Success

Offering Resources, Services & Experience

For decades, we've delivered scaled, safe, and reliable solutions in construction, maintenance, testing, and tuning of thermal and fired pressure equipment.

- › Industrial services for plant construction, maintenance, and turnarounds
- › Integrated mechanical, piping, welding, electrical, instrumentation, and structural services
- › Scalable capacity for large-scale and boutique projects across western Canada
- › Excellent capabilities with fired pressure equipment

- › Specialized technical and engineering services across multiple disciplines
- › Small maintenance projects, new construction, sustaining capital projects, project management, and shop fabrication
- › Integrated service delivery model for full-scale solutions, supplying skilled craft labour across industrial markets

PROCESS COMBUSTION
SYSTEMS INC
CALGARY, AB

- › Combustion systems integrator with 40+ years of experience in industrial applications
- › Engineered solutions for new and existing combustion processes – designed, fabricated, tested, and pre-fired in a modern Calgary facility
- › Focus on custom thermal process heating/drying solutions
- › Experts in facility installation, maintenance, servicing, and efficiency audits of industrial combustion systems
- › Field service capabilities (burner testing, tuning, maintenance, and CSU)

Three Companies – One Streamlined Operation

We have equipment, labour, expertise, and experience in oil & gas, energy, mining, chemical, and other heavy industrial markets. Together, we:

- › Provide innovative labour strategies across western Canada, servicing sites of all types – conventional, in situ/SAGD, upgraders, refineries, and more.
- › Accommodate a wide range of work, from small, specialized pressure equipment oversight (e.g., OTSG inspections) to large, multi-disciplinary project execution roles.
- › Provide total solutions, not temporary fixes.

We have the resources, experience, expertise, and equipment to deliver what your site needs to succeed.

HighFire Energy Services is a premier provider of rental heating equipment, specializing in delivering efficient and reliable solutions for a variety of industrial applications. With a focus on the oil and gas sector, our extensive inventory includes steam boilers, thermal heaters, glycol heaters, steam generators, and heat exchangers, all designed to meet the demanding needs of our clients.

At HighFire Energy Services, we understand the critical importance of maintaining optimal temperature control in operations. Our state-of-the-art equipment is rigorously maintained and readily available to ensure seamless operations, regardless of the challenges faced. Our team of experts is dedicated to providing exceptional customer service and technical support, ensuring that our clients receive the right solutions tailored to their specific requirements.

Safety, reliability, and performance are at the core of our mission. We strive to exceed industry standards while delivering innovative heating solutions that enhance productivity and efficiency. Partner with HighFire Energy Services for all your heating rental needs and experience unparalleled service and expertise in the energy sector.

PROCESS WATER SOLUTIONS

Cooling – Filtration – Water Treatment

BALTIMORE AIRCOIL COMPANY

Cooling solutions including cooling towers, condensers, coolers. Wet surface air coolers, and thermal storage.

aslan
TECHNOLOGIES

Custom packaged water treatment systems for municipal, industrial, and water/wastewater.

Chemical free water treatment for biological and scale reduction

Automatic self-cleaning suspended solids filtration solutions.

High efficiency centrifugal solids separators and desanders.

Solutions for:

- River water filtration
- Utility water filtration
- Utility water chemical dosing
- Demineralized water treatment
- Produced water treatment
- Desalination
- Work camp WTP/WWTP

**"Hundreds of jobs depend on those boilers
going at full capacity. With Prime Boiler,
the whole site is ready for anything, anytime."**

Jake H.
Site Superintendent (3 Years)

Be the hero your company needs.

Every moment of a boiler's downtime cuts into your productivity, reputation, and bottom line. If you need a replacement or additional boiler and don't already have one available, the clock is ticking. **The best solution is being ready before it happens.**

We call this being primed with Prime – and it's how you can be the hero of your work site.

The Prime Boiler Advantage

Since 1991, Prime Boiler Services Ltd. (Prime Boiler) has provided industry-leading steam and heating solutions for companies across western Canada and select U.S. states. From deep knowledge about the construction and operation of boilers to constant education for new technology and materials, we set the benchmarks that other companies strive to meet.

Trusted by Canada's Biggest Industries

CUSTOM ENERGIZED AIR

COMPRESSED AIR STARTS HERE.

CEA is your 'one-stop shop' for air compression, distribution, and usage. We also service what we sell, in-house and on-site.

- Air Compressor Skid Packages
- Valve Automation
- Nitrogen Generation Systems
- PEAK Hydraulic Power Units
- Regenerative Dryer Assemblies
- Instrument Purge Gas Systems
- Troubleshooting & Support
- Rebuild & Repair

SOLVING PROBLEMS WITH INNOVATION

HEALTH & SAFETY
At all levels of our company, Safety is our top priority.

RELIABILITY
With a diverse portfolio of services, our clients can rest assured that we will find a solution.

SUSTAINABILITY
Committed to leveraging our assets to develop innovative, sustainable solutions.

OUR APPROACH
People and technology. Creating a safer, cleaner environment.

ASSETS
Our fleet is ever expanding, ensuring that we will have the right equipment for your project.

PROJECT EXECUTION
Our experienced team will ensure your project is delivered safely, on time.

WHY CHOOSE US?

With a service area of over 8000 kilometers and three branches in the Peace Region alone, our team is in the heart of industry.

CLEAN HARBORS LEADS IN SAFETY

ELIMINATE

Mitigate high-risk scopes with one of our automated solutions, our technology can eliminate the need for confined space entry and working at heights.

INCREASE EFFICIENCY

Our chemical processes sequester hydrocarbons, filter systems and remove unwanted debris, optimizing your systems.

REDUCE WASTE

Whether it's water, sludge or contaminated soil we can provide all inclusive decrease disposal costs and increase remediation.

MAKE IT SAFER

We hold ourselves to a higher standard and have developed our procedures with safety at the forefront. Our safety record speaks for itself.

"WITH OVER 40 YEARS OF EXPERIENCE, WE PRIDE OURSELVES ON DELIVERING TAILORED SOLUTIONS THAT DRIVE MEASURABLE RESULTS."
