Staffed case with Kerri Ketterer (a CPS lead worker) and Megan Annes (CPS investigator). They said that there was probably not enough evidence to substantiate for domestic violence (a pattern is needed to substantiate and there are no police reports). They both strongly agreed to substantiate EM for all of the children under the age of 18. They both agreed that there is not enough evidence to substantiate SA with Mimi, but they said it will be good for her to continue therapy and if anything is disclosed, we can open a new investigation.

Support person offered	
Victim interviewed	

Miriam Richards (CPS investigator) and I met the mother, Mimi, Eliza, and Detective Walker at the CJC. Miriam, the detective and I spoke with the mother before the interviews. Judee Gillees from the CJC was present. The mother gave us copies of her journal entry regarding the semen.

I interviewed Mimi while Miriam interviewed Eliza. I operated the audio and video equipment. The detective has the video tapes. The audio tapes are being transcribed at the CJC. A copy of the transcriptions will be placed in this case file. Mimi declined a support person. Mimi and I were the only people in the room. Mimi agreed to tell the truth. Mimi did not disclosed anything regarding sexual abuse. Mimi spoke about her father being mad and smearing cake on her mother. At the end of the interview, detective Walker and I agreed that I would ask Mimi if she knew what semen was. I asked her what semen was and she said she didn't know. Mimi did not disclose anything about peyote and hallucinating.

Miriam interviewed Eliza. Eliza declined a support person. Miriam and Eliza were the only people in the room. Eliza agreed to tell the truth. Eliza said her father had invited a client named Angela to come live in their home. She said Angela was called "CJ". Eliza said CJ would become suicidal. Eliza said they would have to sit and watch her go through these episodes. Eliza said it was "awful". Eliza said that her father goes to Indian ceremonies and uses peyote. Eliza said she was at a Bless the Land ceremony her father required her to attend. She said her father made her take peyote. Eliza said she did not want to take it, so her father told her it was an herb. Eliza said she was bawling after she took it and reported that it was a horrible experience. She said it made her eyes blood shot and her pupils became dilated. She said it gave her a bad headache and she slept until noon the next day. Eliza said it made her perspective shot and she would run into things. She said this happened in July of 1998 in Spring City.

Eliza said that her dad will get road rage and would drive really fast, steering the car with only his leg. She said her father would swear at people and flip them off. She said one time her father hit the dashboard in the Toyota, causing the dashboard to shatter.

Eliza said that her father has also hit her mom, leaving bruises on her mom's face. Eliza said she was upstairs and her parents were in the kitchen and her dad smeared butter and chocolate cake on her mom and was yelling. Eliza said Mimi watched that happen. Eliza said she has seen her dad hitting and grabbing her mom a couple of times.

The detective, Miriam, and I spoke with the mother after the interviews. The detective spoke with the mother about his concern with this report being delayed. He said there is no evidence now and that criminally speaking, he cannot do anything. The mother said she has not contacted the GAL's office yet. The detective told the mother that if Mimi is acting weird when she returns from visits, to immediately get her blood tested. The mother said she doesn't think the father is giving the kids peyote now. The mother said her main concern is the mental manipulation. The detective told her that hypnosis is not against the law. The mother said she is not sure what to do. We spoke about in-home services. The mother said she would like to have in-home services.

Detective Walker requested that I do not contact the father or mail him the NAA letter, as law enforcement is going to further investigate the peyote allegations. The mother was instructed by detective Walker to call the police immediately, should the children see any drugs in the home. The mother said she does not believe the father is making the children use peyote anymore.

Child victim first seen.				
Support person offered				
Unscheduled home visit				
Victim interviewed				

Unannounced visit to the Hamblin residence. Kristy Maughan (CPS investigator) was with me. Kristy and I spoke with the mother. The home was very clean. I did not see anything that would be hazardous to children. The mother said that for the last 5 years, the father has been "off base" due to possible mental illness. She said the father has done hypnosis on Rachel, telling her that she has been ritualistically abused. She said the father is unstable and delusional. She said 5 years ago he began studying satanic abuse. She said the father diagnoses 90% of his patients as being victims of ritual abuse.

The mother said the father told the children that the grandparents ritualistically abuse them. The mother said the father had one client that moved in with the family. The mother said the father would be up until 3:00 a.m. working with the client. The mother said the father does therapy on the kids and uses hypnosis. The mother said the father is violent and has destroyed property in front of the kids.

The mother said one year ago they met people doing Native American ceremonies. The mother said the father said the ceremonies were like group therapy. The mother said she went to a ceremony with the oldest daughter (Rachel). She said Rachel was given peyote(?) and it paralyzed Rachel for 5 hours. The mother said James Moody was the medicine man. The mother said James is not Native American and is not authorized by the Native American church. The mother said James made up his own church and holds ceremonies biweekly. She said this is how James earns a living. The mother said James is not licensed to give peyote to white people. She said many Native Americans are angry with James because he is giving the drug to white people.

The mother said there was another medicine man that was "blessing" the land by their home in Spring City (the family has homes in Spring City and Provo). The mother said the medicine man pulled out "strong" peyote and told the father to give the peyote to everyone. The mother said she tried to stop the father from giving the peyote to the girls. The mother said the father put peyote into Mimi's mouth. The mother said Mimi reported hallucinating. The mother said the father gave large spoonfuls of the drug to Rachel and Eliza. She said they were sick and were in bed for the next 24 hours. The mother said the father told the girls he was giving them an herb.

The mother said Eliza refused to go to the ceremonies, but Rachel usually went because she is "under the father's thumb". The mother said the father was arrested on January 24, 1999 in Spring City for having illegal feathers and deer parts. She said Katie was with him when he was arrested. The mother said after the arrest, she got rid of all the peyote in the house. The mother said he still has deer parts in his house in Provo. She said the father talks about it with the kids. She said the father dries the deer blood and eats the eyes.

The mother spoke about the father being violent. I asked how he was violent with the children. She said he uses indoctrination and mind control. She said the first hearing for the divorce was last Wednesday. I asked the mother if she had contacted the GAL office. She said no. The mother said she has a hard time believing that the father would sexually abuse the children. The mother said she would like the kids to have supervised visits with the father. I told her that the GAL's office needed to be involved with that. I told her that DCFS could not court order supervised visits.

Kristy interviewed Rachel, the 18 year old daughter. Rachel disclosed that about two years ago her father had begun going to Native American ceremonies and using peyote. She said she had a really bad feeling about it, and didn't want to participate in it, but her dad talked her into it and told her it would be good for her. She said she's always been her dad's favorite and tried to please him. He told her at the ceremony that the more peyote she took, the deeper her insight and the better her experience would be. She said she took a lot of peyote: 5-6 buttons, 3 cups of peyote tea, and a glass of sludge, which is peyote mixed with water. She said she was paralyzed and couldn't move her body for 5 hours. The people there with her said it was anger, and that as soon as she released the anger she'd be able to move again. This was during a woman's ceremony, but her dad would walk around and come in with his friend, John Moody, and they would pass out more peyote. She said everyone in the group encouraged her to take more and more peyote. If you couldn't follow what they were doing, they'd say, "well, you better take more peyote."

She said her dad made her go to 4 ceremonies. Every time she hallucinated and got sick. She was scared and didn't want to go, but she went because she believed her dad and he kept saying it would get better and better. She said her dad has done therapy with her since she was 6 or 7 years old. His philosophies have changed over the years. He used to tell her she was a person made of 3 hearts: a happy, angry and depressed heart. He would put out three chairs and make her sit on each one and say what each part of her was feeling. She said this never helped her, it just made her more confused.

She said he also used hypnosis on her a lot, and the therapy sessions increased over the years. He told her she was made up of millions of parts with their own sets of problems. She said it was so confusing and made her feel worse because if there were millions of parts, there was no way of solving anything. She said her dad worked with a lady who had a multiple personality disorder and claimed to have been ritually abused. Her dad told them that her core was a little boy named C.J. and that they all had to be aware of her different personalities and which part was

out at the time, or they were hurt her, and she was very fragile.

She said her dad started being with C.J. all the time, and with the family less and less. Her dad made her sit in on his sessions with C.J. 3-4 times a week. They would last all night long, and she would watch her dad lay on the floor with the woman and hold her while she fell asleep in his arms, with her head on his shoulder. She also watched him cast out evil spirits, and he wrote down satanic oaths that were all about torture. He said he wanted her to be there during therapy so that "C.J." would feel safe and have a friend there. She said that the bishop also sat in on the sessions about 70-80% of the time. She said she never had a chance to see her dad except during these sessions, so she would sit in on it to see her dad. She would get really tired, and go to bed about half way through the session.

She said C.J. was always with her dad and then she moved in with them for about 9 months. Her dad started missing church and important events to be with C.J. Every time they had something important, C.J. would act out and have a breakdown. Her dad started doing therapy on them saying he'd been ritually abused and that his parents had ritually abused him, and his wife's mom had ritually abused their mom and that they had been ritually abused also. He also started diagnosing 80% of his patients as being ritually abused. She said her dad is always casting out evil spirits, especially with Mimi, the youngest. He is always giving blessings to heal parts of them.

She said it is very confusing to her little sister, Mimi. Sometimes she says she's a little boy, sometimes she says she has little babies crying inside of her. She said he can bless her quickly, and in front of people. He just picks her up, puts her on his lap, and whispers in her ear. She also said that her dad was very angry when C.J. had to leave, and although he promised his bishop he wouldn't see C.J. anymore, he did it secretly. She said her dad is a charmer, and very manipulative. He can be very funny and controlling. She said Mimi started talking about sexual stuff that had happened when she was staying with her dad. She mentioned semen, penis, and him touching her. She said her dad can be very violent. She said, when he gets mad, you just run. She said little things would tick him off, and he would throw chairs through the window, slam his fist on the dashboard and crack it. He threatened her mom that he was going to hurt her and said, "I'm gonna break your neck!" in front of all the kids.

About six months ago, in front of Mimi, he got mad at her mom and grabbed a cake and smashed it into her mom's face and all down the front of her. Then he grabbed butter and other food and threw it on her and bruised her mom's nose. She said he spanked them really hard with his hand, and he would throw things around the room and break things. She said he was always poaching, and killing deer so he could use their body parts in his rituals. He built an altar in one of their out buildings with power objects all around it. She said he was named "co-chief" which was his dream. He was made it with Joe Bennion.

Rachel said that after she's with her dad she gets really depressed and confused. She feels sick around him and she's really worried about her sisters, especially about having Mimi with him alone. She said none of her sisters or she want to be with her dad, but they don't want Mimi to be with him alone. She thinks her dad's mom is schizophrenic and would like her dad to be tested and given medication. She doesn't think he would take it because he's so proud, but she wants to try. Rachel also said she would like having an in-home worker to work with her family and help them get a protective order and other services. The mother said the father sends his clients to the peyote ceremonies.

I interviewed Katie. She declined a support person. Katie and I were the only people in the room. Katie demonstrated she knew the difference between truth and lie. She agreed to tell the truth. We spoke about safety. Katie said that when her parents were together, she would stay alone with the dad on weekends. Katie said this was in Provo. She said during the week she lived in Spring City and attended school there. I asked her how she got along with her dad. She said her dad is either silent or tries to give her weird blessings. I asked her what she meant by that and she said it was a "weird Indian thing".

Katie said she would try to make conversation with her dad. She said she once told her dad that a girl at school was being mean. She said her dad gave her a blessing for that. She said her dad will give the kids blessings for colds, or anything else. She said her dad uses feathers when he does this. Katie said her father told her that he wanted the girls to marry Indian guys from the ceremonies. Katie said she trusted her dad when he said this because her is her dad.

Katie said she never felt safe around her dad and was always worried about herself when she was with him.

Katie said she always tries to please her dad. She said her dad always tries to overly flatter her. She said her father learned this from James Moody.

Katie spoke about her dad being angry. She said her dad mostly gets mad at her mom if "any little thing goes wrong". Katie said incident took place when she was upstairs. She said her mom, dad and Mimi were in the kitchen.

She said her dad smeared butter on her mom's face and threw cake at her. Katie said Mimi saw it happen. Katie said she saw her mother afterward. Katie said, "He's so mean to my mom." Katie said that when her dad smeared and threw the cake, he was really mad and hit his hand on the table, causing the table to dent. Katie said she heard her dad yelling when this happened.

Katie said that her father is constantly giving Mimi blessings. She said if they are in public, then her father will whisper the blessings to Mimi.

Katie said that she was fighting with her mom and her dad was really angry and ran up the stairs. Katie said by this time she was alone in her bedroom. She said her father came in and threw her bed across the room. Katie said this scared her. Katie said that another time she was sitting in a closet for privacy. She said she wrapped a doll's necklace around the door handles. She said her father broke the necklace when he was trying to get into the closet.

Katie said that Rachel and Mimi witnessed their father throw an organ bench through a window, breaking the window. Katie said that she has blocked out a lot of things her dad has done.

Katie said her parents separated this year. Katie said before the separation, her father was always with his clients instead of his family. Katie said that her father gave peyote to her sisters. Katie said her father is always saying good things about peyote. Katie said her mom used peyote, because she thought it would bring her closer to her husband. She said her mom did this during the time she was trying to work things out with the father, to prevent divorce.

Katie said when her parents separated, her father started acting really weird. I asked what she meant by that and she said she would say, "Dad." She said he would respond to his name being called ten minutes later. Katie said she is upset because her father forgot her last birthday.

I asked Katie what she would like to see happen with her family. She said she wants her father to stop going to the ceremonies and to start paying more attention to the kids. Katie said she wants her dad to stop hypnotizing them. She said her dad attended one seminar on hypnosis, and then he began hypnotizing people. Katie said her father has hypnotized her many times. She said her dad will tell her to close her eyes and roll her eyes back and go to a place with Jesus or on the trampoline. She said her father would then tell her to "feel your children parts running out to hug Jesus". I asked Katie when the last time was that she was hypnotized by her father. She said the last day she was at his house and he was going to have an Indian ceremony and he was chanting and yelling. Katie said her bedroom is right next to the office in the house where this took place.

Katie said later that night she went to sleep over at a friend's house. She said she went back to her father's house to get her stuff. She said the entire house smelled like smoke and tobacco. She said this was at the house in Provo. She said her mom was in Spring City during this time. Katie said when she went back to the house, James Moody was on a bench outside of the office, while her dad was in a session with a client. Katie said she said hi to James and to another man named Joe Bennion (or Tim something). She said they were talking and laughing very loudly. Katie said she could not get past them. Katie said her father then came out and James said, "Isn't she beautiful?". She said James was trying to be very flattering. She said the guys were talking and laughing about running away with her tonight. Katie said her dad did not care they were saying this and laughed along with them.

Katie said that her father always talks about his clients and that sometimes he would tell the kids the names of the clients, such as Holly. Katie said her father is always talking about the last days. She said her father tells weird stories about Indians joining with the white people, but the Indians will be the leaders, because they are better. Katie said her father told her that he will be with the Indians.

Katie said that her father has talked to her about splitting people's personalities. Katie said that the father had one of his clients, C.J., move into their home. Katie said her father would sleep on the floor next to C.J. Katie said that C.J. is really a woman, but her main personality is that of a boy. Katie said she has witnessed her father changing C.J.'s personalities around. She said her father got out a personality named Tara. Katie said her father told her and her sisters that they needed to be comfortable with him switching personalities. Katie said her father stopped going to church due to constant suicidal episodes with C.J.

Katie said that C.J. left their home and that her father stopped seeing her.

Katie said her father tells her that her mother is over reacting about everything. Katie said that her mom wants the kids to have their own opinions about things. She said her mom doesn't focus on the good or bad things about her dad. Katie said her mother doesn't want her to judge her father.

Katie said she doesn't want Mimi to be alone with her father. I asked her why and she said, "Every time Mimi comes back from visiting out father, she is angry and confused. She also thinks it's fun to have blessings." Katie said, "My

father is always treating us like clients."

Katie said she was in the car with her father when he was arrested. She said her father had put deer parts (the heart and everything) into his car. Katie said her father said it helps him "see" if people are bad or good. Katie said her father was very angry when he was arrested and said he was going to get a divorce. Katie said before the arrest, the police were a couple of blocks away, watching the house to see if her father would put anything illegal in his car. Katie said her father blames her mother for the arrest and for starting everything. Katie said her father told her that both of her grandmother's and her mom are ritual abusers. Katie said her father told her that she had been ritualistically abused.

Katie said she was very embarrassed when her father was arrested. She said she knew one of the officers from the D.A.R.E. program. She said the police checked her bags as well. Katie said the father was placed in jail, but James bailed him out. She said the car belonged to one of her father's millionaire clients. She said the car was impounded.

Katie said she is unsure how often her father participates in the Indian ceremonies. She said her father tells her that he's going camping, but he's really going to the ceremonies.

Katie said she believes her father is very vain because he thinks he has a nice voice and that every woman loves him.

Called the mother. She would like the CJC scheduled tomorrow morning. I questioned the mother about the information in the referral. She said that Mimi likes to snuggle and that's why she slept in the same bed with the father. The mother said she woke up one morning and was reading with Mimi. She said Mimi was relaxed and talking. The mother said she coughed. She said Mimi told her, "I know why you coughed. You have semen in your throat and that's why you're choking." The mother said she asked Mimi what semen was and Mimi told her that semen comes out of your pillow. (This information was not in the referral).

The mother said the father is paranoid about the kids being sexually abused. The mother said when they moved in with her parents, Mimi asked the grandparents, "What is sex?" The mother said all of the kids have been subject to the father's anger. The mother said there have been domestic violence incidents that the children witnessed. I asked the mother if any of them had been reported and she said no.

We agreed to schedule the CJC for tomorrow at 10:00.

The mother called me after hours. She said the father is coming to get the girls in 10 minutes and she would like me to stop the visitation. She said the girls would not be gone over night. I told her that I do not have any evidence at this time to stop visitations, and that Mimi would not be alone with the father because the older children would be there. I spoke with the mother about getting a guardian ad litem for the children. I gave her the number to the GAL's office. I gave her the number for the after hours phone person and told the mother if she needed immediate assistance from a worker, that it would have to be the on-call worker. I told the mother I would call her in the morning.

Called Bud. He said that as far as the police are concerned, they cannot do anything regarding the alleged EM because it happened so long ago. He said the only way they could do anything would be if it was reported immediately and traces of the drugs could still be found in the girls. He would like the CJC scheduled on Wednesday or Thursday this week. He is concerned that this information was not reported sooner and speculates that this may be a custody battle.

Case ID: 871996

Ref (MO) called to report concerns of possible emotional abuse involving her children, Rachel (age 18), Eliza (age 16), and Miriam Hamblin (age 5). Ref reports David Hamblin (FA) took she and the children to a "Bless the Land" ceremony last July in Sanpete County. During the ceremony, FA had given the children peyote. Ref said a medicine man was there who told FA to give the peyote to everyone at the ceremony. Ref said FA gave the peyote to the children against her will. Ref said the children reported they were having visual hallucinations and were sick 24 hours after taking the drug. Ref said FA told the children it was not peyote and it was fine to take.

Ref said FA has filed for a divorce because ref does not agree with FA's way of life. Ref would like to have supervised visits when the children visit FA. Ref said FA has a mental illness is delusional. Ref said the children are in counseling with Patty Hollenbeck-Dial.

Marge received a call from Patty during the same time ref called intake. Patty reported that FA has a mental illness and is delusional. He may be bi-polar with psychosis or schizophrenic. Patty said FA is exhibiting symptoms of having multiple personalities. FA believes he is above the law and that he has received a "special calling." He believes he is the middle man between the prophet and the Native Americans. FA believes the world will be coming to an end in the year 2004. FA also believes he will be the spokesperson for the Native Americans. Patty feels FA has gone over the deep end. FA is not a Native American.

When FA had Miriam take the peyote, she said, "I saw bright lights to Heaven and back." Also, when Miriam returns from Fa's home after a visit, Miriam talks gibberish. Patty also reported that FA sleeps in the same bed with Miriam. Miriam reports that FA has touched her private parts. It is unknown when this occurred. Miriam has told Patty that she has male parts. Ref thinks FA is telling her these things and teaching her other bizarre things. Patty reported that as soon as she has MO sign a release of information, she will send an outline of her concerns with FA.

Another concern Patty reports is FA is a psychologist. She stated to Marge, "if you knew what FA was telling his clients, it would blow your mind." FA has also threatened to kill MO.

MO did not report to intake worker about the alleged SA, therefore, the CPS worker needs to discuss this with MO before interviewing Miriam. Rachel will not be listed as a victim on this referral since she is 18 years old. The police would need to interview her because she is 18 years old.

NO DCFS history found on the family.

If any of the allegations are substantiated against FA, the Division of Occupational and Professional Licensing will need to be notified because he is a licensed psychologist. The number is 530-6630.

Emotional Maltreatment - General	Katie Hamblin	David Hamblin	
Emotional Maltreatment - General	Sara Bradford	David Hamblin	
Sexual Abuse	Miriam Hamblin	David Hamblin	

**Referral Narratives**

04Jun1999

Ref (MO) called to report concerns of possible emotional abuse involving her children, Rachel (age 18), Eliza (age 16), and Miriam Hamblin (age 5). Ref reports David Hamblin (FA) took she and the children to a "Bless the Land" ceremony last July in Sanpete County. During the ceremony, FA had given the children peyote. Ref said a medicine man was there who told FA to give the peyote to everyone at the ceremony. Ref said FA gave the peyote to the children against her will. Ref said the children reported they were having visual hallucinations and were sick 24 hours after taking the drug. Ref said FA told the children it was not peyote and it was fine to take.

Ref said FA has filed for a divorce because ref does not agree with FA's way of life. Ref would like to have supervised visits when the children visit FA. Ref said FA has a mental illness is delusional. Ref said the children are in counseling with Patty Hollenbeck-Dial.

Marge received a call from Patty during the same time ref called intake. Patty reported that FA has a mental illness and is delusional. He may be bi-polar with psychosis or schizophrenic. Patty said FA is exhibiting symptoms of having multiple personalities. FA believes he is above the law and that he has received a "special calling." He believes he is the middle man between the prophet and the Native Americans. FA believes the world will be coming to an end in the year 2004. FA also believes he will be the spokesperson for the Native Americans. Patty feels FA has gone over the deep end. FA is not a Native American.

When FA had Miriam take the peyote, she said, "I saw bright lights to Heaven and back." Also, when Miriam returns from Fa's home after a visit, Miriam talks gibberish. Patty also reported that FA sleeps in the same bed with Miriam. Miriam reports that FA has touched her private parts. It is unknown when this occurred. Miriam has told Patty that she has male parts. Ref thinks FA is telling her these things and teaching her other bizarre things. Patty reported that as soon as she has MO sign a release of information, she will send an outline of her concerns with FA.

Another concern Patty reports is FA is a psychologist. She stated to Marge, "if you knew what FA was telling his clients, it would blow your mind." FA has also threatened to kill MO.

MO did not report to intake worker about the alleged SA, therefore, the CPS worker needs to discuss this with MO before interviewing Miriam. Rachel will not be listed as a victim on this referral since she is 18 years old. The police would need to interview her because she is 18 years old.

NO DCFS history found on the family.

If any of the allegations are substantiated against FA, the Division of Occupational and Professional Licensing will need to be notified because he is a licensed psychologist. The number is 530-6630.
