The Start and End of Gaff Point Trail are along Hirtles Beach

Escape to Nova Scotia's nature and explore <u>Gaff Point Trail</u> and Secret Beach near Riverport. This 6.6-kilometre loop hike with only 70 m elevation gain takes advantage of stunning coastal views by including various types of terrain such as well-worn dirt paths, smooth stones, wooden planks and flat top rocks to trek over along your way!

Whether you're an experienced hiker or just getting into the sport, this trail has something for all skill levels! The trail is moderately challenging but an exceptionally rewarding experience. With breathtaking scenery along the way, it's no wonder that so many visitors make this journey every year! Get ready as your journey begins along **<u>Hirtle's Beach</u>** before venturing further inland through lush forest terrain - perfect for walking, hiking and trail running alike.

Along with beachfront views at the start of your adventure comes a warning: make sure that your feet are properly prepared. Sturdy shoes are a must as the first and final kilometres of this hike require walking across beach rocks - not suitable for weak ankles or those wearing flip-flops! But don't despair; if it's low tide when starting/ending, you may be able to spend some time soaking in the beauty of an untouched sandy Beach instead.
