# Hydrogen Water is a **POWERFUL** tool for optimum health!

## Hydrogen Molecule/ Ion Foot Bath & Detox Machine

*A truly unique and high quality product!*

- Detoxification of the body
- Use as detox SPA in your Bath
- Clean and detoxify fruits and vegetables!
- It's NOT just a foot bath!
- It helps promote a healthy lifestyle!

Truly one of the most unique products we offer! Our Hydrogen Molecule and Ionic foot bath provides many homeopathic therapies...

### **Description**

The Ionic Foot Bath Detox System helps to remove toxins from the body, improving overall health and wellness. It enhances the body's own natural detoxification abilities, allowing it to remove toxic elements more efficiently. Assisting the body's natural detoxification process results in:

- A more robust immune system
- A reduction in chronic pain and inflammation
- Potential weight loss
- Fewer headaches and migraines
- An overall feeling of relaxation and improved mood

The main objective of an ionic foot detox is to help make the body's pH more alkaline, which is vital to a person's health. Because diseases thrive in acidic environments, the less acidic your body is, the less susceptible you are to disease and illness.

The Center for Disease Control reports that up to 85% of all illnesses are caused by toxins and pollutants in our bodies. They enter the body through our lungs, skin, and travel through the blood and lymphatic systems to cells throughout the body. The human body functions optimally when the ions are balanced at 80% negative and 20% positive.

### **Uses**

**Hydrogen molecular bath and foot spa** – This is the primary function of the Ionic Foot Bath, and it works as an antioxidant. It prevents cells from being damaged through oxidation. It is a protective mechanism and improves overall health, body function, skin appearance, and improves the quality of fruits and vegetables to be consumed.

**Ionic foot spa** – It boosts the immune system by altering the body's pH levels. It improves circulation and heart health, reduces the occurrence of headaches and migraines, while simultaneously reducing blood pressure, stress levels and the physical recovery process. Chronic diseases, pain and inflammation can be diminished, greatly improving quality of life.

**Massage mode** – It combines therapeutic massage with more traditional Chinese medicine practices. Select from 8 body part options, 6 varying intensities, as well as the massage modalities of acupuncture, scraping (gua sha) or cupping.

**Food detoxification** – Prevents premature oxidation of fruits and vegetables which is responsible for the deterioration of food quality. Washing fruits and vegetables in alkaline water neutralizes,

# Multiple Functions Of Hydrogen Molecule

**Wash food:** Can clean out more bacteria and make food safer and healthier

**Body spa:** Can beautify the skin, make the skin more tender and smooth, and reduce the proliferation of fine lines

**Foot spa:** Can eliminate harmful free radicals in the body. Improve your body metabolism and sleep quality

## How it works

An ionic detox works using a process of exchange between the positive and negative ions in your body, and their opposite numbers in the water. This lowers the body's acidity, reducing the risk of disease. The detoxification process continues to alkalize the body up to 48 hours after the treatment. The water used changes color naturally because of the chemical reaction between the electricity and the salt water, not because of toxins.

The hydrogen mode injects high concentrations of hydrogen molecules into the bath which bond with free radicals, working as an antioxidant. They can then be removed from the body in liquid form, via urination and sweat. This antioxidant function helps provide overall health protection. This same process works when washing fruits and vegetables as the pesticides are neutralized, the oxidation process is slowed, and the nutritional quality and flavor of the food consumed is preserved.

There are 3 settings to accommodate the different ion concentrations and hydrogen molecular concentrations in men, women and children. The child setting is only designed to accommodate children 8 years or older.

## Product Includes:

- Ionic foot bath console, including  
Negative hydrogen ion generator
- Ion array (black)
- Hydrogen molecular array (blue)
- Massage patches and connector cable
- Wrist Strap
- Power cord
- Instruction manual

\*Tub not included.
