

## Rodney Kelshaw

Managing Partner & Senior Scientist

### PROFILE

- Over 22 years of experience in the environmental field, working in both the public and private sectors.
- Worked on an array of project types across the country, with a focus in the northeast.
- Provides services including wildlife surveys and habitat analysis, wetland and watercourse delineation, and construction oversight with a focus on erosion and sediment control and permit compliance.
- Works with landowners and developers as a liaison to municipalities, and regulatory agencies to identify, minimize, avoid and solve known and unforeseen challenges throughout the development and permitting process.
- Assists municipalities and land trusts with natural resource identification and project planning.
- Provides expert consultation and management services on a variety of development projects: including single lot residential development; renewable and traditional energy generation and transmission projects; transportation/infrastructure; commercial developments; and conservation property assessments.
- Experienced in project development, and permitting at the local, state and federal levels.
