Today

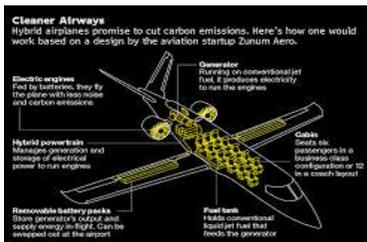

JetPerfect Foundation™

JPLIT™

The **JetPerfect Laboratory of Innovation and Technology** will initially be a collaboration of existing laboratories dedicating a portion, if not all, of their activity to aeronautical engineering research and advances.

Initial collaborative research activity will be conducted at laboratories of the University of Colorado, California Institute of Technology, Stanford University, MIT, Embry Riddle University, the University of Maryland, Purdue University, and the University of California, Berkeley. Simultaneously, efforts are being conducted, as well, to establish a stand alone laboratory by the same name.

JetPerfect Aviation News

The JetPerfect Foundation monthly digital Aviation Journal will contain articles by industry experts outlining their current and proposed research in the area of alternative and environmentally friendly sources of energy for aviation and aerospace; thereby, furthering explicitly the exempt purposes of the JetPerfect Foundation.

HISTORY

The JetPerfect Foundation was established as a non-profit corporation on June 3rd, 2021 in the State of California. Effective May 24, 2022, the JetPerfect Foundation has been determined to be a 501c3 public benefit organization duly approved by the IRS; allowing contributors to our efforts to receive a tax-deduction for monies and/or assets given to the JetPerfect Foundation to manifest its laudable goals.

Our volunteers, Board Members, Officers, and Advisors all span a wide range of interests and backgrounds. Entrepreneurs, students, financiers, aviators, and industry experts all play a vital role in forwarding the JetPerfect Foundation's efforts to research and develop alternative and environmentally friendly sources of energy for aviation, aeronautics, and aerospace.

JetPerfect Annual Conference

The JetPerfect Foundation plans an Annual Conference on Aviation, Aeronautics, and Aerospace History, Innovation, and Advanced Propulsion Technology to be held at the Computer Science Museum in Mountain View, California. The JetPerfect Annual Conference is planned to be held August 1st of every year.

At this annual conference, thought leaders from around the world will be invited to speak on the advancements they have made and/or foresee in the area of innovative technology; as applied to alternative energy for aviation, aeronautics, and aerospace in general.
