Guidelines for Fire Training

THE STUDENT:

- Level I shall be at least eighteen years of age or student 17 years old that is in the final/twelfth grade in a secondary school program.
- Level I students can be 16 years old in the eleventh or final/twelfth grade in a secondary school public safety program. In the eleventh-grade participation is limited to classroom and practical skills associated with firefighter I course objectives; students in the eleventh grade are prohibited from participation in any training activity involving Immediately Dangerous to Life and Health (IDLH) environments including any live fire training
- VFF & Level II shall be at least eighteen years of age or student 17 years old that is in the final/twelfth grade in a secondary school program.
- VFF students must not have facial hair that interferes with the performance of an SCBA.
- For students enrolled in a fire course above the VFF (36hr) level must be clean shaven (no beards) and have no facial hair that interferes with the performance of an SCBA (See Ohio Administrative Code Chapter 4121:1-21).
- Shall wear NFPA approved turnout gear (Ohio Administrative Code Chapter 2121:1-21).
- Shall use self-contained breathing apparatus as prescribed in the (Ohio Administrative Code 4121:1-21)
- Must have the physical fitness and medical requirements form completed by a physician and attached with a copy of a current physical record of within 1 year of the start of class date
- A copy of any prerequisites such as copy of VFF certification to take a transition course
- If not affiliated with a fire department, shall provide proof of health and accident insurance coverage, prior to the first date of class
- Must provide a copy of a high school transcript with GPA of 1.5, or equivalent work keys assessment test result
- Background release if affiliated by a fire department, if no fire department affiliation applicant must provide a BCI background check (see local sheriff's office for more info)
- Must provide a copy of any prerequisites such as a copy of FFI to take an FFII course.
- Must provide a copy of the certificate for NIMS 100, 200 and 700 which can be found at www.training.fema.gov

**I hereby acknowledge that I have read,
understand, and will comply with, all the above
listed training guidelines.**

Authorization for Payment

Student Name: _____

Authorization Information:

The above-named student is hereby authorized by the representing Fire Department/EMS Agency/Organization listed below to voluntarily enroll into a course offered by the Res1cue Fire & EMS Training, LLC.

By my signature below attest the student has met the eligibility requirements as established for the course and by signature of authority below indicate an agreement to terms of payment in full for the course are to be made in full prior to the completion of course and or prior to the student taking a certification examination.

Res1cue Fire & EMS Training, LLC. will invoice the Fire Department or EMS Organization a price for course as listed and accordance with the current Policy and Procedure manual. Payment can be submitted by check or money order or as cash to Res1cue Fire & EMS Training, LLC. 3625 Darlington Drive Zanesville, Ohio 43701

The Fire Department or EMS Organization signature of authority below also indicate an agreement to terms of Res1cue Fire & EMS Training, LLC. Policy and Procedure manual stating the following conditions:

Self-Pay Students

- Self-pay or non-department affiliated students must have a down payment of at least
- half of the course cost prior to the beginning of a course in order to enroll. The second half of payment will be due by the mid-point of the course. Failure to do so will result in the student being excused from the program.

Student Withdrawals

- Students who wish to withdrawal from a class may do so by submitting a letter to the Program Director.

Refunding of Tuition Payments

- All refunds will be minus \$250.00 processing fee and any cost for textbook, paperwork, class shirt, ect. Students that are beyond the first quarter of the class or have been dismissed shall forfeit any refund.
- If the student is receiving funding from a State Grant or other form of grant reimbursement and does not complete, is removed, or fails a course, the student-sponsoring fire department/ems agency/organization will be responsible for the tuition payment in full as based on this policy even if the student fails to meet course completion criteria.

**I hereby acknowledge that I have read,
understand, and will comply with, all the above listed
authorization for payment guidelines.**

Physical Fitness and Medical Requirements for Fire Training

Student Name: _____ DOB ____ / ____ / ____

Entrance Requirements relating to NFPA 1582 Medical Exam:

Chapter 4765-24 of the Ohio Administrative Code requires Firefighter I and II training courses to comply with NFPA 1001, Standard for Fire Fighter Professional Qualifications. NFPA 1001, Chapter 1 references NFPA 1582, Standard on Comprehensive Occupational Medical Program for Fire Departments, Chapter 5 which addresses the Essential Job Tasks of candidates (not the Medical Requirements). The Essential Job Tasks discuss the level of exertion, stress, and potential exposures to hazardous substances while performing firefighting tasks, rescue operations, and other emergency response actions, including working in extremely hot or cold environments for prolonged time periods while wearing personal protective ensembles including self-contained breathing apparatus (SCBA).

NFPA 1582 Chapter 5 states that “the physician shall consider the physical, physiological, intellectual, and psychological demands of the occupation when evaluating the candidate’s ability to perform the essential job tasks” and that “medical requirements shall be correlated with the essential job tasks.”

Medical Requirements:

Based on the language in NFPA 1001 and NFPA 1582, the Division of EMS and the Ohio Attorney General’s Office have determined that a local physician, using as a reference the Essential Job Tasks outlined in chapter 5 and the Medical Requirements outlined in chapter 6 of the NFPA 1582 standard, should be properly informed as to the physical demands of the firefighting profession. Therefore, it is within the purview of a physician, working in conjunction with the local chartered fire training program to determine the physical and medical fitness of a student to participate in a firefighter I or II training course.

The Essential Job Tasks outlined in chapter 5 and the Medical Requirements outlined in chapter 6 of the NFPA 1582 are located on the back of this form.

Essential Functions of Firefighting

The Essential Functions of Firefighting listed below are meant to serve as a reference resource for physicians when determining the fitness of a candidate for firefighting duties. The Essential Functions of Firefighting is meant to define and to give a broader understanding of the physical requirements demanded of firefighters.

The Essential Functions of Firefighting are merely meant to be used as an aid for physicians when determining the physical status of a candidate. Performing fire-fighting tasks (e.g., hose line operations, extensive crawling, lifting and carrying heavy objects, ventilating roofs or walls using power or hand tools, forcible entry), rescue operations, and other emergency response actions under stressful conditions while wearing personal protective ensembles and self-contained breathing apparatus (SCBA), including working in extremely hot or cold environments for prolonged time periods.

See reverse Side

Essential Functions of Firefighting

- Wearing a SCBA, which includes a demand valve–type positive-pressure face piece or HEPA filter masks which requires the ability to tolerate increased respiratory workloads.
- Exposure to toxic fumes, irritants, particulates, biological (infectious) and non-biological hazards and/or heated gases, despite the use of personal protective ensembles and SCBA.
- Climbing six or more flights of stairs while wearing fire protective ensemble weighing at least 50 lb (22.6kg) or more and carrying equipment/tools weighing an additional 20 to 40 lb (9 to 18 kg).
- Wearing fire protective ensemble that is encapsulating and insulated, which will result in significant fluid loss that frequently progresses to clinical dehydration and can elevate core temperature to levels exceeding 102.2°F (39°C).
- Searching, finding, and rescue-dragging or carrying victims ranging from newborns up to adults weighing over 200 lb. (90 kg) to safety despite hazardous conditions and low visibility.
- Advancing water-filled hose lines up to 2-1/2 in. (65 mm) in diameter from fire apparatus to occupancy [approximately 150 ft. (50 m)], which can involve negotiating multiple flights of stairs, ladders, and other obstacles.
- Climbing ladders, operating from heights, walking or crawling in the dark along narrow and uneven surfaces and operating in proximity to electrical power lines and/or other hazards.
- Unpredictable emergency requirements for prolonged periods of extreme physical exertion without benefit of warm-up, scheduled rest periods, meals, access to medication(s), or hydration.
- Operating fire apparatus or other vehicles in an emergency mode with emergency lights and sirens.
- Critical, time-sensitive, complex problem solving during physical exertion in stressful, hazardous environments, including hot, dark, tightly enclosed spaces, which is further aggravated by fatigue, flashing lights, sirens, and other distractions.
- Ability to communicate (give and comprehend verbal orders) while wearing personal protective ensembles and SCBA under conditions of high background noise, poor visibility, and drenching from hose lines and/or fixed protection systems (sprinklers). Functioning as an integral component of a team, where sudden incapacitation of a member can result in mission failure or in risk of injury or death to civilians or other team members.

I hereby acknowledge that I have read, understand, and will comply with all the above listed requirements.
