

PRODUCTS CATALOG

We develop, manufacture and commercialize plastic base products and a variety of rigid containers using **RPET (Recycled Plastic), polypropylene and polystyrene** to supply food packaging markets for fruits, dairy, meat, pastry, among others.

We are committed to providing **integral solutions** with the highest quality and service standards for our national and international clients.

Our products reduce our carbon footprint as much as possible through **sustainable production practices** by using technology that allows us to produce PET containers of up to 100% recycled resin, we reaffirm our **commitment to caring for the environment.**

Production Capacity

We have a production capacity for over a

6,500 TN

of thermoformed containers and

12,000 TN

plastic base products per year.

Our Facilities in Latin America

Some of our most important clients:

 Panama

 Ecuador

 Peru

*Images are for illustrative purposes.

Served Markets in Latin America

 Panama

 Ecuador

 Peru

 Bolivia

We serve many important markets from Latin America providing a variety of our **best quality products**.

Technology and Machines

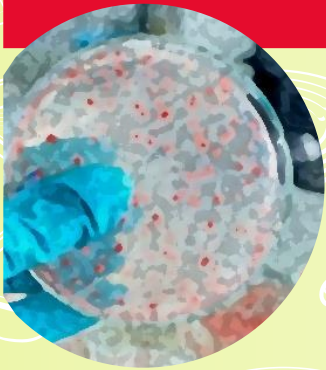

Quality Control

Our lab at **SMI** is **fully equipped** to ensure the quality of our products

Chemical Test

To ensure the quality of our containers, we perform outsourced trial for the chemical analysis of our products, including Analysis IV, moisture content and acetaldehyde levels.

Dimensional Control

Ensure physical characteristics of our products.

Performance Test

Our containers are put through rigorous performance tests to ensure the contents of the container are well protected.

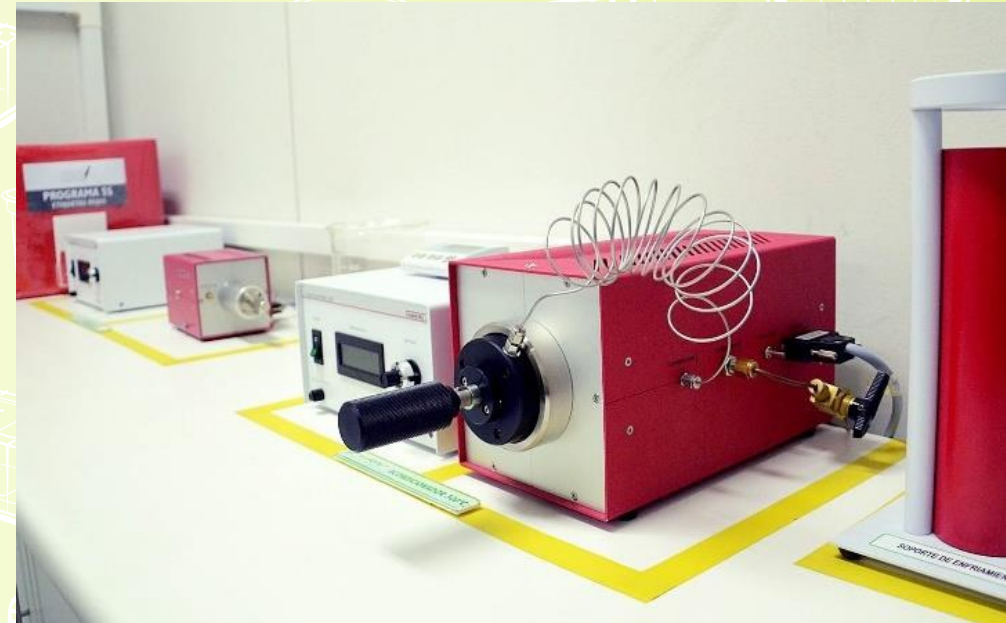

Destructive Test

To ensure packaging performance and withstand damage from impact.

Certifications Lab Technology

Recycle Technology

Our products can **contain from 0 to 100% of recycled material**, depending on the **needs of our clients**.

Our containers follow the established guidelines by the **U.S Food & Drug Administration**.

Being 100% innocuous, capable of protect and conserve the integrity of the contained products.
