Monitor

Water-Saving  
Shower

How to  
Replace  
Furniture

### North by Southwest

- Ultimate Alaska Highway Trip
- New Mexico's Billy the Kid Trail

On the market since 1996, **Plastex Plastic Repair Kits** contain a powder and liquid that, when mixed, become plastic that dries and is ready to be painted in an hour. Plastex kits are easy to use, have no mixing ratio and last indefinitely if stored out of direct sunlight and high heat. Every kit contains a reusable molding bar that makes it simple to reproduce broken or missing tabs and parts. The instructional video (included on the kit's CD) shows various uses for the product.
