

Steps to Fold Paper Boats

Step 1: Fold the piece of paper in half length-wise.

Step 2: Fold the paper in half again.

Step 3: Unfold the piece of paper from the 2nd fold.

Step 4: Fold the corners of the paper to the center crease.

Step 5: Fold the bottom rectangles up on each side.

Step 6: Grab the center of the front and back and pull apart to make a square. This can be tricky – look at the picture.

Step 7: Now fold each of the bottom triangles up to the top to form three triangles that neatly line up (sorry...that's the best verbal description that I could come up with).

Step 8: And just like Step 6, grab the centers of the front and back pieces and pull apart to make a square.

Step 9: Pull the top two corners apart – these become the bow and stern or front and back of your paper boat.
