

DESIGN ENGINEER

We are looking for skilled and professional Design Engineers to join our team. As a Design Engineer with our team, your primary responsibility will be designing and developing efficient and reliable furniture and equipment products that support our primary markets.

Qualifications:

- 2-year technical degree in relevant field (bachelor's degree in engineering preferred)
- 2+ years' work experience supporting design and manufacturing
- Must be a self-starter and able to thrive in a customer driven environment where responsiveness and deadlines are essential
- Ability to collaborate and work well with a team
- Proficient in CAD software (Solidworks preferred)
- Must possess good written and oral presentation skills and the ability to communicate ideas effectively to coworkers
- Strong analytical, problem-solving, and project management skills
- Experience in Microsoft Software Applications (Word, Excel, Power Point) and additional software knowledge depending on specialty
- Willingness to travel as necessary

Key Responsibilities:

- Design and integrate product development strategies across all company divisions, including spaces, sports, furniture, creative and littles
- Design products according to spec requirements, assuring compliance with system needs. Complete and finalize design documentation packages, including BOMs, work instructions and packaging specs
- Participate in design reviews, offering technical insights to identify and resolve related design and process related challenges
- Collaborate with cross-functional teams to comprehend system and product requirements/constraints associated with design, process and quality systems
- Work closely with suppliers and vendors to procure and assess components, ensuring adherence to design specifications and quality standards
- Work closely with customers to analyze requirements, ensuring optimal product configuration to meet their needs
- Other duties as assigned
