Getting Started

Support and Contact

Tactical Arenas, powered by CRAIC Engine, is India's only Military Simulation Sports. Military Simulation refers to non-lethal armed confrontation scenarios conducted for civilians. This activity strives to realistically simulate the experience of armed combat. To make this sport more realistic, CRAIC Team designs, builds missions, ambient arenas and uses realistic Ir-Weapons.

We have designed Tactical Arenas for adrenaline junkies who enjoy playing realistic missions. For ages 18 and up, there is an option of Pain Penalty know as B.R.E.T. IT delivers a shock when you get shot. The Ammunition accountability plays a key role and your tactics and strategy determine victory. We have realistic indoor arenas, outdoor battlefields and mobile arenas. The realism and action simulates and heightens your senses, rushing your adrenaline and giving you an unmatched experience.

What is TACTICAL ARENAS

TACTICAL ARENAS Gaming Features

- Realistic Equipment.
- Real props like tactical shield or deployable shield.
- Real pain penalty option available with B.R.E.T 2.0 and 3.0

- No projectiles and environment friendly
- Clean and safety-proven equipment
- Extremely durable equipment body
- Best electrical components
- Long battery life with BIS certified Batteries
- Health and Ammunition accountability
- Police verification confirmation letter by CRAIC Team

The System

Tactical Arenas system is made possible through IR guns imported from select countries across the world, ambient arenas similar to war zone and B.R.E.T 2.0 developed by CRAIC Team. The IR Guns system has several key components and multiple options, the arena is a recreated Hollywood set with mechanical props and through the CRAIC Engine software several options of gameplay are available. The system is completely wireless and features state-of-the-art laser technology.

System at A Glance

- IrAssault – AK12 with a range of 250 meters
- IrSMG – MP9 with a range of 250 meters
- XO-Vest – Exo-skeleton style vest that accepts most attachment and is light weight. The vest is extremely breathable for easy movement. Uses several zones to record hits and has visual feedback.
- IrHeadband – Basic headband that connects the XO-Vest for added sensor and covers more area.
- CRAIC Engine – Advanced software engine selectable modules to simulate your missions
- Engine controls DMX, Audio, Fog and more

Franchise Options

We have the below packages available:

- 1. Equipment only:** In this, you have the option to buy only our equipment based on your requirement. Under this category, only AK12, AK15, MP9 and Hornet, M514 are available along with the vest and headband
- 2. Tactical Arenas set-up:** In this you get the complete arena set up including the arena design, build, equipment, BRET and ambience control settings The minimum space requirement for each player is 135 sqft for indoor. You will also receive Marketing material and support along with Operations Manual and Training. Minimum space requirement is 2500 sqft. Rates are dependent on the space being considered and the features being opted for. The set-up for 2500sqft arena starts from 30L onwards.
