CONSULTANCY

Strategy Advice

Our advice supports firms in unravelling the complexities of strategy creation. Strategy truly originates in the minds of a company's founders. To effectively translate a founder's strategic vision from their thoughts to a tangible written document requires a structured approach.

Advisory Fee £230.59

Retainer Fee £ 2,606.00

Operation Deep Dive

Op-Deep Dive is a comprehensive framework designed to integrate and explore the critical elements of a firm: its capability, resources, and competencies. This powerful tool is engineered to enable firms of all sizes small, medium, and large to unlock their full potential and gain a profound understanding of their operational strengths.

Advisory Fee £230.59

Retainer Fee £ 2,606.00

Strategy Shock & Awe

Focuses on evaluating a firm's understanding of its industry dynamics and the forces driving change, as well as assessing its competitive powers as its resources and capabilities to differentiate the best strategy for operational effectiveness. Understanding the industry dynamics and the forces change is crucial for developing a sustainable competitive advantage. This involves analysing the external environment in which a firm operates.

Advisory Fee £328.55

Retainer Fee £ 2,606.00

Management

Concepts of management are theories and guidelines a superior can use to manage different organisations successfully run their operations. These theories offer different approaches of managing modern organisations.

Different management theories evolved a long time ago and still scholars are searching for new theories for management of different work settings.

The core theories in management heading which **One Strategy Vision** will focus on

- Classical Theories
- Human Relations & Human Science Theories
- Modern Theories

Military Strategy

Using military strategy provides critical insights to successful planning, execution of a firm's operations. Military strategy is influenced by many factors such as geopolitical, economic, and technological considerations. There are key concepts and practices used by the military that should be used in business; these are objective, offensive, defensive, and economy of force, and different manoeuvres, the use of surprise and operational talent.
