One Strategy Vision combines a powerful look into both business and military strategy manoeuvres pinning the six listed concepts to unravel our understanding of strategy in a complex business environment.

Why combine military strategy into business strategy?

Strategy history originated from military background; there are similarities with business strategy which applied differently in both settings. Military strategy is focused on tactics, force, and advantage over its enemy.

A definition by **Carl Von Clausewitz** "strategy is the use of engagement for the purpose of war".

Our definition "strategy is the execution and development of resources, capabilities that support the achievement of organisational intentions that achieve superior operational expansion."

Making sense is to consider combat as having a strategic, operational, and tactical level; all the forces of all kinds behave tactically, as they contribute to net strategic effect.
