

02.6 HHO electrolysis system

Electrolytic cell structure:

- 1—Anode and Cathode knob
- 2—Liquid level detector
- 3—Pressure switch
- 4—Adding liquid inlet manually
- 5—Safety valve
- 6—separation membrane
- 7—Cooling fan
- 8—Electrolytic cell
- 9—Water vapor separator

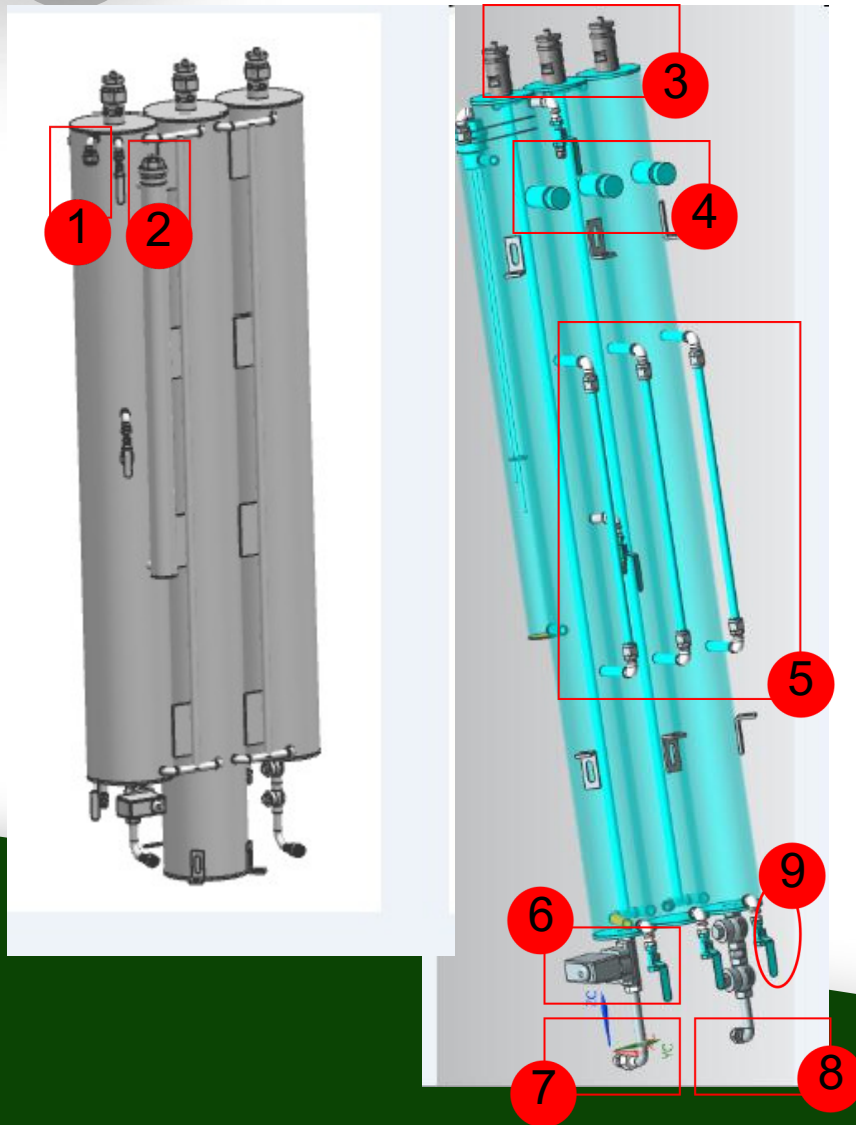

02.6 HHO electrolysis system

10—Drain out liquid
11—Connect to anti-backfire tank
12—auto feeding water solenoid valve

02.7

Anti-backfire system

1- Gas gate of anti-backfire tank 2- Water level needle of anti-backfire tank 3-Safety valve 4-Manual filler 5-Transparent liquid level tube

6-Anti-backfire water adding magnetic valve
7-Anti-backfire water filler
8-Anti-backfire gas filler
9-Drain ball valve
