# Parallel Universe

## Traveller #9128.709

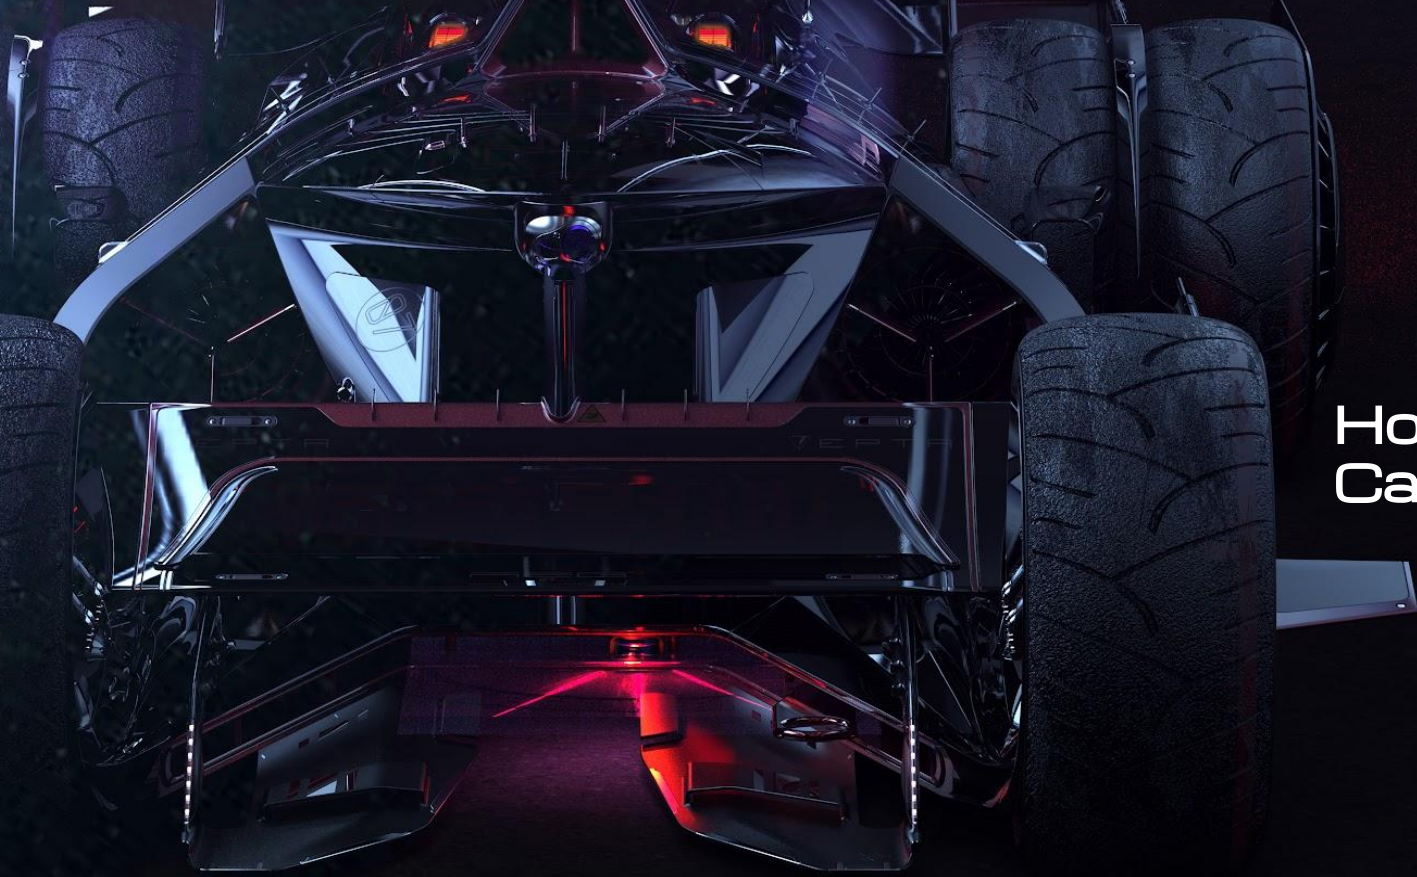

## Nikola Tesla

A parallel universe traveller has visited our universe and share the technology that were used in their world. In their reality, all the files of Nikola Tesla's invention has been recovered and his technology has been widely used in daily life. They have no issues with energy crisis or Climate change. Traveller #9128.709 was jealous of our reality as we have to face so many challenges, while they have Ai solving all the problems.

## The infinite free energy

Since the free energy has been introduced to our universe, our children will not need to go to war to fight for energy, the problem is how we transition the world's population in adapting to this free energy and create better life.

How Fast  
Can you drive?

This Search&Rescue flying drone will be deployed when there is any racing accident. This drone can carry one passenger in the cockpit and using its crab claws to grab the wrecked race car and then send back to the team garage.

# Minting Stages

Beware our mint price is slightly higher than others

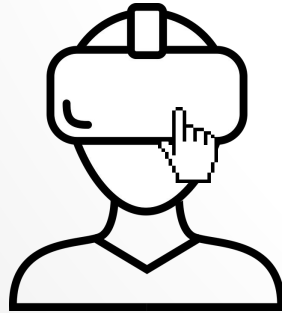

## Our Strategy in the bear marche

We will not be relying on 'hype' strategy. We will focus on our core buyers and collector, we want to show them the fun of motorsport racing. And then discuss where the technology is taking us to the future. Business opportunity might arise when FAST brain come together.

## Game Character (Avatar)

The daily transactions of our avatar will help us understand what kind of character will be the most favourable to the audiences. And our developer team will create deeper story around the characters, Such as, flashback scenes, crash scenes, holiday scenes.

# Take a walk in our Metaverse

# The Race.Suit

Can you handle the G Force?

The driver wearing racing suit that will sealed to the seat with magnetic suction pod. No convention seat belt needed. Driver can push the EJECT button to be propelled into the air and then parachute down.

thousands of variations were crafted in the design process

PRESTIGE
