# of Intakes Processed	276	287		
# of Families that Rec'd a Referral	60	48		
# of Intakes Referred to a Program or Service	60	48		

<p># of Families from Row 26 that Enrolled in a Local Program</p>	<p>25</p>	<p>25</p>		
<p>Reasons Reported for Not Enrolling</p>	<p>Number of families enrolled in programs may not reflect accurately due to local programs still reaching out to families and not yet providing an outcome.</p>			
<p>Barriers Encountered</p>	<p>Due to our program currently going through the state accreditation process, they have shared best practice is no longer appropriate to have verbal consent for the release of information. If a family outside the hospital is interested in resources, I now set up a time to meet with the family to get a signed release. When there is a patient at the hospital that is covid positive, I have been making a phone call to their room. The hospital staff is asked to have the patient sign a release of information form to give back to us. Each can take a few days so it can slows down the referral process a bit.</p>			
<p>Success Stories</p>	<p>During my monthly follow up calls, I spoke with a mom who was really struggling with having her children at home and trying to be at the hospital with her premature baby in the NICU. She was really needing social supports and also community resources. To help with this, she was given information on community resources she could utilize. A What's Where in Parenting Directory with community resources was given to this mom as well for future needs. As she had immediate needs, she was referred the same day to a home visiting agency (normally referrals are sent out on Thursdays after our partner meeting) so they could offer support right away.</p>
