

FUSION

INTEGRATION

Low Voltage Government Solutions

NAICS: 561621, 23821

DUNS: 117936903

Service

The Integration side of Fusion specializes in the design, installation, and servicing of integrated low-voltage systems. To put it more simply – we use tech to solve problems. You can present us something as modest as a description of your problem or you can come prepared with a specification document and set of blueprints, and we have the experience and resources to carry your need from cradle to grave.

Our firm has experience meeting the most stringent regulations and working with the most advanced product manufacturers in the world. We understand the importance of on-time proposals, thorough submittal packages, on-budget milestones, and we closeout projects with accuracy.

Experience

Dedication

With dedicated project managers, there is no firm that matches the personal service and critical experience of Fusion Integration. We've worked with the most demanding clients in the world from USACE to the largest federal & commercial builders to sprawling Government enterprises. And we cultivate a team-based approach we believe is essential for the immediate and long-term success of each of our clients.

If you have an immediate need to increase your organization's security or technology profile, or need a seasoned partner to guide the development of your long-term technology roadmap, please reach out by email or telephone anytime. See below for points of contact.
