

FUSION

DESIGN & INTEGRATION

Low Voltage D/B & D/B/B Solutions

NAICS: 561621, 238210

DUNS: 117936903

Service

Fusion specializes in low voltage system design/build and design/bid/build projects and most of the time we can carry your entire low voltage scope dramatically streamlining your management burden. You can present us something as modest as a description of your problem or you can come prepared with a full specification and drawing set, and we have the experience and resources to carry your need from cradle to grave.

Our firm has experience meeting the most stringent regulations and working with the most advanced product manufacturers in the world. We understand the importance of on-time proposals, thorough submittal packages, hitting every construction milestone on schedule, and we closeout projects with precision.

Experience

Dedication

With dedicated project managers, there is no firm that matches the personal service and critical experience of Fusion Integration. We've worked with the most demanding clients in the world from USACE to the largest federal & commercial builders to sprawling Government enterprises. And we cultivate a team-based approach we believe is essential for the immediate and long-term success of each of our clients.

If you have an immediate need for a turnkey low voltage systems contractor, need to modernize your organization's technology profile, or need a seasoned partner to guide the development of your long-term technology roadmap, please reach out by email or telephone anytime.
