

RESIDENTIAL SOLAR PV SYSTEM

Pre-Site Visit Questionnaire

We understand that each house operates differently in terms of hours, appliances, number of people, etc. We do not believe installing a standard "solar kit" will suit everybody. We strongly believe in designing a system which will suit your house, roof, and operations.

Please use this form and complete as much as possible in order for us to understand what you require, and we will design a couple of preliminary quotations based on the information you supply.

How It Works From Here

- Step 1:** You return this completed Pre-Site Visit Questionnaire
- Step 2:** We design a couple of system options and submit them back to you
- Step 3:** Advise if any of the proposed options will be suited for you
- Step 4:** We schedule a consultation session with you to discuss the proposals in detail and do a physical site check
- Step 5:** We finalise the deal and submit a final quotation for deposit payment
- Step 6:** We order all the components and advise on an installation date
