01. About Signature Group

Connecting All the Dots

Signature Group was formed by bringing together four established, specialist businesses under a single, unified banner. By merging our companies, we combine decades of collective knowledge, hands-on experience and technical expertise to give our clients a single point of contact for the ultimate solution and service.

Our group designs, supplies, manufactures, installs and maintains electrical, solar, air-conditioning and refrigeration solutions across the Industrial, Commercial, Agricultural and Residential markets — delivering true turn-key capability from a single group of companies.

Where separately our divisions offered deep expertise in their own fields, together as Signature Group we offer something more: an integrated partner capable of taking a project from concept and design, through supply and manufacturing, to installation and long-term maintenance.

02. Our Divisions

Signature Group is the parent brand uniting four specialist divisions. Each division retains its own focus and identity, while operating under the shared values, quality standards and project management of the Group.

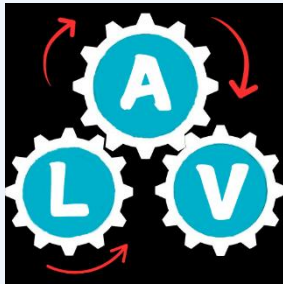

Signature Energy *Solar Design & Installation*

Our solar division, responsible for the design and installation of grid-tied, hybrid and off-grid solar PV and battery storage systems for industrial, commercial, agricultural and residential clients.

Signature Supplier *Equipment & Product Supply*

Our sales and supply house, specialising in electrical, solar and lighting equipment and more — dealing directly with clients and contractors and providing quality products backed by a strong after-sales experience.

ALV Trading *Electrical Installation*

Our electrical installation division, delivering electrical installation and maintenance services across industrial, commercial and infrastructure projects, including high-voltage reticulation and substation work.

Chillcold Electric Trading *Air-Conditioning & HVAC*

Our air-conditioning division, providing HVAC design, installation and maintenance — from precision climate control for factories and laboratories to comfort cooling for offices and retail spaces.

In addition, ESTAC Engineering partners with the Group on commercial projects and financing, extending our engineering and funding capability on larger installations.

03. Mission & Vision

Mission

To give all our customers the personal touch they deserve and offer a turn-key solution across all of our divisions' areas of expertise.

Our experienced and reliable teams are committed to bringing out the best in each other and working in harmony with other trades.

We prioritise clear and effective communication with our clients, enabling us to establish strong working relationships and produce the best possible outcomes on every project. Our goal is to exceed our clients' expectations at all times.

Vision

Our vision is to harness our team's collective expertise and passion so that we may continually produce outstanding work, always deliver our services in a timely, reliable and safe manner, and constantly innovate — ensuring we produce the best possible outcomes for our clients.

04. Company Values

- Use open communication to build good rapport with all our clients
- Provide value-for-money service at all times
- Maintain a relationship of trust and integrity within our team
- Ensure the safety of our team members, our clients and the public
- Operate a clean and tidy worksite at all times
- Maintain healthy, ongoing business relationships with our valued clients

05. Our Approach & Customer Service

Approach

We prefer to run our jobs smoothly, with minimal interruption to tenancies and clients. We are reliable, on time, and produce quality work — all according to regulations.

Customer Service

We believe communication is a vital component of our client relationships. Keeping customers “in the loop” helps jobs run smoothly and helps eliminate potential issues before they arise.

Depending on the client's requirements, we use phone, email and text messaging — as appropriate — to stay in touch with our clients. Communication is typically ongoing on a daily basis, depending on the nature and stage of the job.

06. Management Team

Without a doubt, our people are our most valuable asset. Our aim is to combine our collective knowledge and experience to produce outstanding results for our clients.

Leon Botha Over 30 years' experience as Electrician / Site Manager. Member of the Electrical Contractors' Association of South Africa, registered electrical contractor under regulation 6(4) of the Electrical Installation Regulations (Department of Labour), and DEHN-qualified in Lightning Protection.	Helgard Joubert National Diploma in Electronic Engineering (digital technologies) and over 25 years' experience in business management. Client and customer satisfaction is his first priority, and he plays a vital role in residential solar design.	Francois van Wyk Over 45 years of Millwright and Electrical knowledge — there is nothing he cannot design. Also brings over 40 years of Refrigeration experience as our HVAC professional.
Rita Joubert Our lead in finance, with over 40 years' experience as a Financial Accountant. Holds a Bachelor of Commerce with Specialisation in Financial Management, and is a member of SAIT (South African Institute of Tax Professionals).	Stephanie van Wyk & Corne Joubert Our operations managers, with years of experience in office management. The first port of call for schedules, orders, finance and office queries — Stephanie under Chillcold Electric, Corne under Signature Energy.	Our Teams Every division has its own dedicated team working under experienced leadership, giving our clients loyal, professional service across every project, every time.

07. Track Record & Projects

Across our divisions, Signature Group has delivered a wide range of projects. Our scope of work includes, but is not limited to, the projects below.

ALV TRADING — ELECTRICAL PROJECTS

High-Voltage Reticulation	• CONSOL Glass Bellville — 11kV to 400V • CONSOL Glass Pretoria — 11kV to 400V • CONSOL Glass Wadeville — 6.6kV to 220V • CONSOL Glass Nigel — 22kV to 220V • CONSOL Glass Clayville — 11kV to 220V
Power Generation	• Matimba, Hendrina, Arnold, Komati and Duvah Power Stations
Government & Institutional	• Correctional Services • Department of Water Affairs • Home Affairs • Parliament — Rwanda • NECSA (Nuclear Corporation of South Africa) • South African Revenue Services — Border Posts (UPS Installations)
Industrial & Other	• Mozal, Mozambique • AMRAL • NAMPAK Callett Sorting Plant • ZwavelStream Clinic

SIGNATURE ENERGY — ALTERNATIVE ENERGY PROJECTS

Residential Solar	• Over 200 residential solar installations completed to date
Commercial Hybrid Systems	• 50kW hybrid, 60kWh battery, 33kWp, with genset integration • 200kW hybrid, 200kWh battery, 57kWp — integrated with existing grid-tie plant and genset
Bloemfontein Vodacom Data Centre	• Solar panels, grid-tied inverters and AC reticulation • 150kW and 100kW installations • Vodacom battery project
Further Solar Projects	• Kuipers Solar Project — panels, grid-tied inverters, AC reticulation • Plantforum — 100kW, AC reticulation • Hartbeespoort High School — 150kW, 383kWh battery pack, 100kWp • Thulani Macs — 100kW, 215kWh battery with fire suppression, 41.4kWp • Off-Grid Lodge — 150kW, 324kWh battery with fire suppression, 161kWp

CHILLCOLD ELECTRIC TRADING — HVAC PROJECTS

Goldleaf Tobacco	• 2x 216kW air-cooled HVAC system • Full humidification system to control %RH in factory • Remote plant monitoring system
CONSOL Glass Head Office	• 300kW air-cooled chilled water chiller installed on the roof • Chilled-water hideaway and cassette units in offices and laboratory • ±1,200m² of ducting, plus fresh air systems
CONSOL Glass Nigel — New Factory	• Multi-V systems for the office block • Downblow units for computer rooms • Water-cooled condensing units for the laboratory • Fresh air systems for basement and workshops; ±2,500m² of ducting
CONSOL Glass Group	• Monthly maintenance contract covering all air-conditioning units across offices, factories, canteens and laboratories (Clayville, Nigel, Wadeville, PES, etc.) • Repairs and new installations of various units • Supply of downblow units for the new Ethiopia plant
Additional Clients	• Powertech, Pferd, Avbob, Alisom Communication, Euro-Plastifoam, Nissan South Africa, Washtek • D-Kon (Tshivhengani Residence) — design and installation of AC system • Orion Hotel Group, Pretoria North Metrorail, Faurecia Rosslyn (chiller plant services) • Florad, Fidelity Security, TUT (heat pump repairs and services) • Nampak Bevcan (chiller services, dampers, extraction fans), Generic Insurance (server room repairs and services) • Marsing & Co, Qutuba Squash Court — 55,000 BTU AC unit with ducting and fresh air
