

FIRST PLACE

ELYSE HANSEN

9th Grade - Highland High School

My ship crest design was based off of the first USS Arizona ship crest. My inspiration for this design was previous designs for the ship crests and I also wanted to add a more creative side to the crest so it looked not as simple. For this design I wanted to keep it respectful in favor of the old USS Arizona and I also wanted it to have the feel of the original USS Arizona crest. I went through many different drafts to try and find the design I thought was best. After many hours and designs I finally came to the conclusion that this design was the best I could come up with in the time frame I had. To have the opportunity to work on the new USS Arizona ship crest was an amazing experience and I had a great time working on this design.
