

How to Draw a Bat

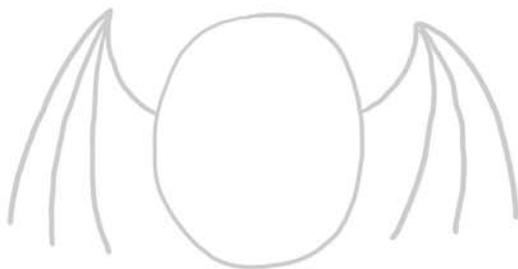

Start with an oval shape. It's best to start with pencils so you can erase later.

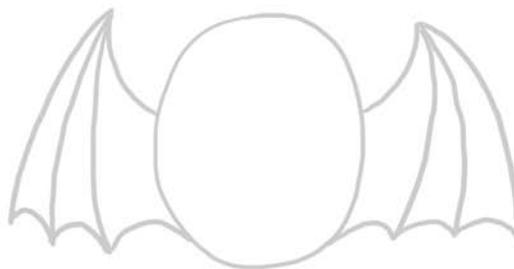

Draw 2 arms sticking out on each side. This will be the start of the wings.

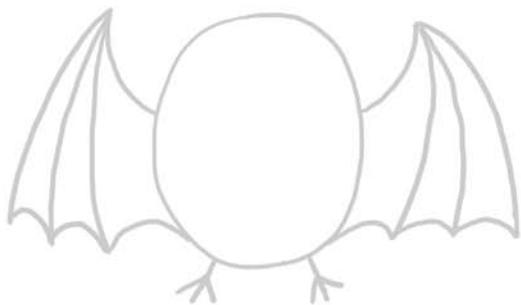

Draw lines down from the ends of the arms.

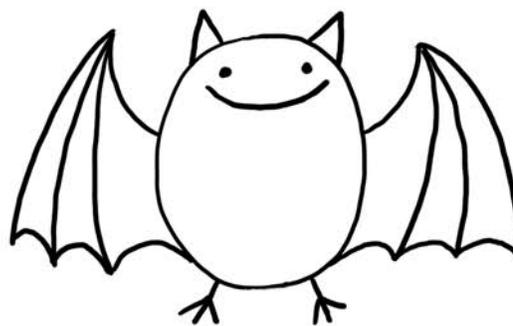

Draw 2 more lines down from the ends of each arm like fingers.

Connect the bottoms of all the fingers to the body with upside-down U shapes.

Add feet.

Add triangle ears and a face. And trace over pencil lines with pen.

Try different faces.

You can color your bat black.

Add stars for a night sky.
