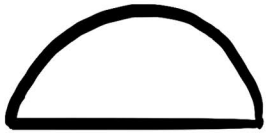
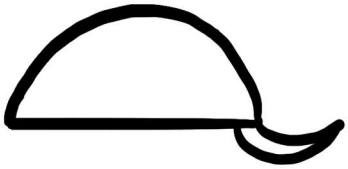
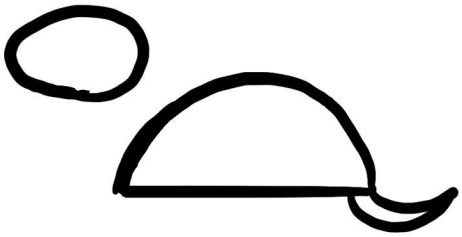
How to Draw a Turtle



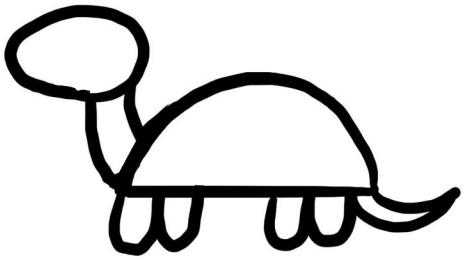
1. Draw a big sideways capital D make the round side pointing up.



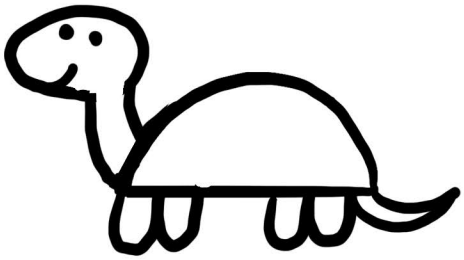
2. Starting at the corner of the D, draw a pointy tail.



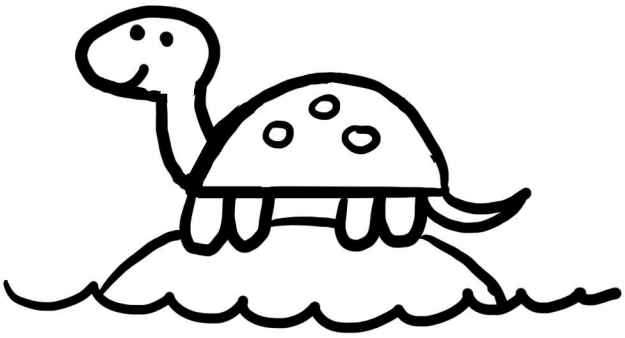
3. Above the other corner draw an egg shape for the head.



4. Draw a neck connecting the head and the body. Then draw 4 stubby legs.



5. Give your turtle eyes and a mouth. Erase the line between the neck and the head.



6. Decorate your turtle's shell and maybe give him a nice rock to sit on.
