

# SOIL HEALTH AND POLLINATOR HABITAT FOR PRODUCTIVE GARDENS

**MAY 21 5:00-7:00 PM**

Visit a vegetable production system that builds soil health and how to grow produce while providing beneficial insect habitat.

Topics include:

- Managing weeds without tillage
- Growing in cover crop residue
- Establishing beneficial insect habitat
- The good guys: pollinators & predatory insects
- Native habitat plant and insect ID walk
- Opportunities for technical and financial assistance
