**TREE SALE PICK-UP:**

**WEDNESDAY, SEPTEMBER 29, 2021**  
**Scheduled Pick-Up Times**

Tippecanoe Soil & Water Conservation District

# 2021 Native Tree & Shrub Sale

ORDER NOW THROUGH SEPTEMBER 17TH

Although we strive to provide all of the trees and shrubs listed, there may be times when these species become unavailable from the local nurseries. If the listed species are not available at the time of delivery, we will work with the nurseries to substitute a similar species.

Please note that all sales are final, however, you have the right to refuse the tree or shrub at the time of pick up if dissatisfied. A refund, minus a 5% restocking fee, will be issued by check within one week. We guarantee a healthy specimen will be supplied at time of pick-up; however, due to variations in planting site conditions and care, no guarantee or refund will be issued after pick-up.

**All Trees & Shrubs \$25.00**

All trees and shrubs are sold in 3 gallon pots. Due to species differences, we cannot guarantee a height at arrival.

Order form and catalogue are available at [www.tippecanoecountyswcd.org](http://www.tippecanoecountyswcd.org) or at the SWCD office located at 1812 Troxel Drive, Lafayette, IN 47909.

Questions? Call (765)474-9992, extension 3

As you select trees and shrubs for your property, note their mature growth size and give consideration to above and below ground utilities.

Know what's below.  
Call before you dig.

**Order today and pick up on Wednesday, September 29, 2021 from 3:00 pm to 7:00 pm at Ross Camp, 9225 W 75 S, West Lafayette, IN 47906.**

# Large Trees

**Acer saccharum (Sugar Maple)** – Reaches up to 80' tall. Full sun to part shade. Prefers medium, well-drained soil. Showy, yellow, orange, red fall color.

**Betula alleghaniensis (Yellow Birch)** – Reaches up to 75' tall. Full sun to part shade. Prefers moist, well-drained soils, but tolerates poor drainage. Showy silver/bronze peeling bark. Yellow fall color.

**Betula nigra (River Birch)** - Reaches up to 70' tall. Full sun to part shade. Prefers moist to wet soils. Fast-growing. Peeling bark provides winter interest.

**Carya illinoensis (Northern Pecan)** – Reaches up to 100' tall. Full sun to part shade. Moist, well-drained conditions. Drought-tolerant. Edible nuts. Low, spreading branches.

**Catalpa speciosa (Northern Catalpa)** - Reacheds up to 70'. Full sun to part shade. Moist to wet sites. Showy flowers and seed pods. Produces ground litter.

**Diospyros virginiana (Persimmon)** – Reaches up to 60' tall. Full sun to part shade. Moist to dry conditions. Drought-tolerant. Edible fruit in fall. Orange fall foliage.

**Juniperus virginiana (Eastern Red Cedar)** - Reaches up to 50' tall. Prefers dry to moist, well-drained soils. Tolerates a variety of site conditions. Type of juniper, not a true cedar.

**Liquidambar styraciflua (Sweetgum)** - Reaches up to 80' tall. Prefers moist, rich soils. Showy red-purple fall foliage. Fruit is 1" diameter spiky ball.

**Pinus strobus (White Pine)** - Large tree, reaching up to 130' tall. Tolerates a variety of sites, but prefers moist, well-drained soils. Often used in windbreaks or privacy screens. Rapid growth.

**Populus tremuloides (Quaking Aspen)** - Reaches up to 50' tall. Tolerates a variety of soils. Showy white bark. Yellow fall foliage. Named for "quaking" of leaves in the breeze.

**Prunus serotina (Black Cherry)** – Reaches up to 80' tall. Full sun to part shade. Moist to well-drained conditions. Produces cherries in late summer. Showy, white flowers in spring. Yellow fall foliage.

**Quercus alba (White Oak)** - Reaches up to 80' tall. Full sun to part shade. Prefers moist to dry sites. Drought tolerant. Pyramid shape crown when young, more rounded shape as it matures.

**Quercus coccinea (Scarlet Oak)** - Reaches up to 70' tall. Prefers moist to dry, well-drained sites. Red fall foliage. Rounded, open crown. Fast-growing.

**Quercus macrocarpa (Bur Oak)** - Reaches up to 80' tall. Full sun. Moist to dry conditions. Drought tolerant. Broad-spreading, rounded crown. Largest acorn of all native oaks. Fast-growing.

**Quercus palustris (Pin Oak)** – Reaches up to 70' tall. Moist to wet conditions. Tolerates some flooding. Spreading, horizontal branches with slender twigs. Fall foliage is bronze-red. Conical crown.

**Quercus rubra (Red Oak)** – Reaches up to 75' tall. Full sun. Moist to dry conditions. Tolerant of pollution and compacted soils. Heavy acorn production every 2 to 5 years. Dark, red-orange fall color.

**Quercus shumardii (Shumard Oak)** - Reaches up to 60' tall. Full sun. Prefers moist, well-drained sites, but tolerates dry or bottomland sites as well. Not shade tolerant. Reddish brown fall color.

**Quercus velutina (Black Oak)** - Reaches up to 60' tall. Full sun. Prefers moist to dry, well-drained soils. Named for dark bark on mature trees. Drought tolerant. Fall color is yellow-brown to red-brown.

# Small Trees & Shrubs

**Amelanchier laevis (Allegheny Serviceberry)** - Reaches up to 30' tall. Full sun to part shade. Prefers moist to well-drained sites. Also called Juneberry. White flowers in spring. Reddish fruit in fall.

**Aronia melanocarpa (Black chokeberry)** - Reaches up to 6' tall. Full sun to part shade. Tolerates a range of soils. Purple-red foliage and blue-black fruit in the fall. White flowers in spring. Spreads by root suckering.

**Cephalanthus occidentalis (Buttonbush)** - Reaches up to 12' tall. Full sun to part shade. Prefers moist to wet conditions (including standing water). Produces white, round flowers. Can form thickets.

**Cercis canadensis (Redbud)** - Reaches up to 30' tall. Full sun to shade. Shade tolerant. Moist to well-drained conditions. Doesn't tolerate wet soils. Pink flowers in spring. Small, understory tree.

**Cornus alternifolia (Pagoda Dogwood)** - Reaches up to 25' tall. Full sun to shade. Moist to well-drained conditions. Small, multi-stemmed tree. Horizontal branches give it a "layered" appearance. White flowers, blue fruit. Provides wildlife food and cover.

**Cornus sericea (Red Osier Dogwood)** - Reaches up to 10' tall. Full sun to part shade. Prefers moist to wet fertile soils. White flowers in spring and red fall foliage. Red twigs offer good winter interest and white fruit favored by birds. Spreads by root suckers.

**Corylus americana (Hazelnut)** - Reaches up to 16' tall. Full sun to shade. Prefers moist, well-drained sites. Also called American Filbert. Fall color varies from yellow to red. Can form thickets. Rounded shape.

**Hamamelis virginiana (American Witchhazel)** - Reaches up to 20' tall. Full sun to shade. Moist to well-drained sites. Tolerates heavy, clay soils. Fragrant, yellow flowers foliage in fall.

**Hydrangea aroscens (Smooth Hydrangea)** - Reaches up to 5' tall. Prefers part shade and moist soil. Drought intolerant. White flowers in early summer. Pruning can encourage flowering.

**Ilex verticillata (Winterberry)** - Reaches up to 12' tall. Full sun to part shade. Prefers moist, acidic soil. Separate male and female plants. Females have red berries through the winter. Suckers to form colonies.

**Lindera benzoin (Spicebush)** - Reaches up to 12' tall. Full sun to shade. Moist to well-drained conditions. Leaves have fragrant, spicy aroma. Small, fragrant yellow flowers in spring. Female plants produce red fruit.

**Physocarpus opulifolius (Common Ninebark)** - Reaches up 10' tall. Full sun to part shade. Moist to dry sites. Named for reddish-brown peeling bark. White flowers in spring. Fast growing. Yellow fall foliage.

**Prunus americana (American Plum)** - Reaches up to 25' tall. Full sun to shade. Moist to dry conditions. White flowers in early spring. Edible plums in summer. Produces root suckers. Caution - All parts except for the fruit are toxic.

**Prunus virginiana (Common Chokecherry)** - Reaches up to 25' tall. Full sun to part shade. Prefers moist to dry alkaline soil. Can form thickets. White flowers in spring. Dark purple fruit in late summer, eaten by wildlife.

**Rhus aromatica (Fragrant Sumac)** - Reaches up to 12' tall. Full sun to part shade. Prefers dry sites. Showy fall foliage. Fast-growing. Spreads to form thickets.

**Rhus typhina (Staghorn Sumac)** - Reaches up to 25' tall. Full sun to part shade. Prefers well-drained, dry to moist soil. Root suckers to form thickets. Showy red fruits. Showy, red fall foliage.

**Rosa carolina (Pasture rose)** - Reaches up to 2' tall. Full sun. Prefers well-drained soils. Can form thickets which are utilized by wildlife. Pink flowers.

**Salix discolor (Pussy Willow)** - Reaches up to 15' tall. Full sun to part shade. Prefers moist to wet soils. Can form thickets. Male plants have showy catkins that resemble a cat's paw. Fast-growing. Can form thickets.

**Sambucus canadensis (Elderberry)** - Reaches up to 12' Full sun to part shade. Moist to wet sites. Large, white flowers in summer, followed by black fruit. Fruit often used in jellies and wine. Produces root suckers.
