

KARGO KING

Rental System

KARGO KING
ROLL-OFF SYSTEMS

Rental System

The Kargo King Rental System and Rental Deck is utilized exclusively in the **Equipment Rental Market**.

Designed specifically for the needs of Equipment Rental fleets, the Kargo King Rental Deck is designed to accommodate low clearance equipment with it's signature beavertail, making the loading and unloading of scissor lifts and compaction equipment safe and efficient. Unlike traditional hook lift systems, Kargo King's locking mechanism design means the Rental Deck sits lower at ground level with gradual incline to accept specialized equipment.

Additional tie-downs and purposely located chain holders are complimentary features included specifically for the Rental application, and the Warn 8000 lbs Removable Winch is an option selected on nearly every new build.
