## TRIPLE ACTION HAIR RESTORING SYSTEM

hair loss treatment  
**PRODUCT FACT SHEET**

## HAIR LOSS OR WEAK AND THINNING HAIR

Hair loss or weak and thinning hair may not necessarily be only genetic. Age, drugs, stress, prolonged use of harsh hair products, and even lifestyle can be major reasons for this condition. Typically, individuals who lead a stressful life, use an abundance of hair products or frequent hat wearers, often report a higher rate of scalp problems than others.

Whether genetic, age related, or otherwise, hair problems begin with issues caused by dried up sebum (oil) and perspiration layers that over the years accumulate in hair follicles. They form plugs that attack hair from two fronts: first, they choke it by restricting the area from which it grows and second, they often harden the scalp to a shiny surface. That scalp congestion hampers both blood circulation and the flow of nutrients to the hair roots.

When that occurs, men start showing bald patches, especially in the front and back of the scalp. Women may also start losing hair, but they are a little luckier because in most cases it regrows, although much thinner and at a slower rate. But thin or even missing hair may not spell the end. The roots may still be a long way from being doomed and our natural way to stimulate and revive them may keep your hair **ALIVE** for a long time to come.

## HOW DOES IT WORK?

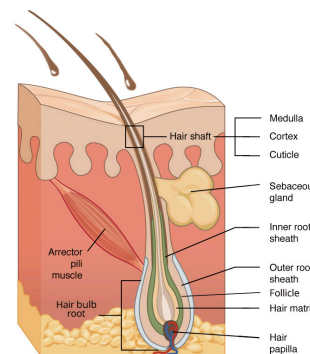

Some thirty-six years ago, a group of Italian medical hair restoration specialists set off to explore alternative ways to treat thinning hair and hair loss. They researched century old traditions of hair treatment using stinging nettle and sea algae which is common in Europe, the Mediterranean, and the Atlantic Shores.

They found television-promoted and pharmaceutical drugs that grow hair by altering gland functions such as testosterone blocking or harsh chemicals, may show growth of some temporary hair, but they may also cause serious and unpleasant side effects in the long term.

That research led to the formulation of a drug free, modern day natural herbal treatment which is free from dangerous side effects – **MARGÒ ALIVE**.

The unique herbal formula found in the *Triple Action Hair Restoring System*:

- ✎ **Dissolves** noxious perspiration salts and sebum (oil) buildup to allow hair to grow freely.
- ✎ **Stimulates** blood circulation to the scalp to enhance the root system naturally.
- ✎ **Prevents** the formation of new follicle plug blockage to avoid future scalp problems.

## THREE EASY AND NATURAL STEPS FOR PROMPT RESULTS

### STEP ONE: Penetrating Cleanser

The natural iodine found in sea algae extracts allows the lotion to penetrate follicles and instantly dissolve the harmful sebum clogs. That opens the way for the remaining herbs to flow to the roots, stimulate blood circulation, and nourish them, which is essential to maintaining a healthy scalp.

### STEP TWO: Herbal Shampoo

The highly concentrated herbal shampoo is free from harmful sulfates and ideally formulated to pair perfectly with the Penetrating Lotion to remove all scalp impurities leaving no trace of residue.

### STEP THREE: Revitalizing Serum

The Revitalizing Serum is designed to actively maintain the essential follicle cleansing, nourishing, and stimulating process on a 24/7 basis. A gentle “tingling” sensation, especially in the early stages of your treatment, is proof of its continuous action. The resulting well-nourished and obstruction-free follicles promote healthier and thicker hair, even in areas where it had been often suffocated out of sight.

### OPTIONAL: Moisturizing Conditioner

Its wealth of herbal nutrients, Keratin proteins, and Vitamin E which is a perfect solution to restore body and shine to dry, brittle or colored hair. The lotion's addition of a natural lemon oil extract assures the ideal pH balance.
