

A different kind of campaign.
A different type of Senator for Utah's Dixie.
Hard on Issues. Soft on people.

On the Issues

Education

As your Senator, Chad will champion educational opportunities for every Utah child, enabling them to reach their full potential. In a world where countries like China are striving for economic dominance, Chad recognizes that our children need to master the basics like reading, writing, and math so they can compete globally. **Our classrooms need to be free from distractions and focus on education, not indoctrination**, ensuring that key educational decisions for children remain with their parents. Chad supports attracting the best educators to ignite a passion for learning in our children, by working with parents to prepare the next generation of Americans to be self-sufficient, independent contributors to our way of life.

Taxes

As a conservative, Chad firmly believes that **the power to tax is the power to destroy**. While state governments must have the resources to fulfill their fundamental functions, here in Utah, we consistently run substantial surpluses year after year. Unfortunately, this fact indicates that the government is overtaxing us. Moreover, these large surpluses can tempt elected leaders to expand the role of government by providing them the resources to do so.

Public Safety & Crime

Another fundamental function of our state government, as outlined in Utah's Constitution, is ensuring public safety. Chad will collaborate with community leaders to provide the **necessary resources for safe streets and secure neighborhoods**. He will be an outspoken champion for removing individuals from our society who seek to exploit the vulnerable or profit from criminal activities.

Accessibility, Transparency, & Accountability

As your senator, Chad will ensure accessibility by consistently including his contact information in all communications. He will be transparent by explaining his votes on important issues to his constituents. Additionally, he will be accountable by hosting town hall meetings, especially during legislative sessions, and **actively engaging with constituents to act on their concerns**.
