ABOUT

This is an introductory horsemanship clinic for groups of students looking to learn more about horses together. The clinic is tailored towards scouts looking to earn their badges but is also perfect for team building activities, clubs, and birthdays!

THEORY

Students will begin by getting a 30-minute presentation with introductory information about horses including safety, care, anatomy, and more. Students will then be split into groups and have the activity table explained. Activities will include a 'build a horse' worksheet puzzle and horseshoe painting which they will take home with them.

GROOMING

Students will then go into the barn and spend some time getting to know their assigned horse, grooming, and helping tack to get ready to ride. Students will also use this time to try on helmets and fit will be approved by one of the instructors.

RIDING

Students will rotate through riding in groups for 15-20 minutes learning to walk, steer, and experience a trot safely. Each horse will have an assigned instructor who will assist 1:1 with students riding. While waiting to ride, the remaining groups will be at the activity table.
