

## CM-100MDM

### Multi-Density Pressure Redistribution Mattress

The ComfortZone CM-100MDM pressure redistribution mattress is manufactured in the USA, from the highest quality materials and workmanship. The CM-100MDM is designed to provide pressure redistribution above and beyond standard hospital mattresses to assist in the prevention and treatment of up to stage II pressure ulcers.\*

- Layered multi-density high spec pressure reduction foam provides advanced pressure redistribution to aid in the prevention and healing of pressure ulcers.
- Four-way stretch cover allows easier contouring to patient anatomy to enhance pressure redistribution.
- Patient surface is low shear, low friction and moisture resistant.
- Meets the latest Federal flammability standards
- Available in 36", 42" & 48" widths. Length 80". Custom sizes available.
- 3 Year Warranty
- Made in the U.S.A.

\* The CM-100MDM is designed to prevent and treat up to stage II pressure ulcers. As with all support surfaces when used for the prevention or treatment of pressure ulcers a comprehensive skin and wound care management protocol should be followed.
