### Re: Non-GMO Declaration

Agrovive Inc. hereby certifies that all products developed and marketed by the company are derived from 100% environmentally sourced microbes with no additives, preservatives, carriers and/or processing aids, and are not derived from a genetically modified organisms or irradiated genetic material sources. Agrovive Inc. products are free from both genetically modified DNA as well as free of proteins derived from genetically modified DNA.

Agrovive Inc. uses GMO-free proprietary strains of microbes sourced by Raison LLC, which subscribes to the Pro-Cert Canada Organic Standards, EU and USDA NOP, all of which forbid the use of genetically modified organisms (GMO) or materials derived from GMO sources.

### Non-GMO Label Declaration

All microbial strains presently marketed by Agrovive Inc. have been created using traditional cultural methods without the use of genetic modification techniques, thus preventing the deliberate release into the environment of genetically modified organisms as defined in Directive 2001/18/EC. The methods used in the development and production of these strains are used to consistently achieve high purity standards and prevent the presence of off-types, including genetically modified organisms. Microbial strain production is carried out in accordance with all existing legal requirements including stipulated microbial isolations. The potential of adventitious contamination in microbial multiplication areas although highly unlikely cannot be totally excluded.
